Thread: [Hello World!](#)

Nix. - April 12, 2014, 1:41 pm

I'm new here so it only seems right to do a: Hello World!

This forum seems to have a very active community (Something i haven't been able to find) and many great sections full of content! Hopefully i am going to do well here. Over the next few days ill upload a few of my projects (coded in VB6), hopefully everyone will like them. I code in VB6, PHP

and C++ and some other less prudent languages. So anyway to wrap it up:

Hello World!

Have a good day ?

If you do any sort of coding or have 3/16ths of a brain you should stay out of the lounge.

Code public class HelloWorld {

```
    public static void main(String[] args) {  
        System.out.println("Welcome to HF! Make sure to read the  
[url=//hackforums.net/misc.php?action=help]Help Docs[url]!!!");  
    }  
  
}
```
