Make of it what you want, took 5 minutes.

I took parts from a userbar I paid to be designed, so credits to the og designer.

It's awesome! Thanks for sharing ^^.

Rem - April 13, 2014, 1:46 am

I personally like it. It's got the flare of epicness that I just can't describe. Either way, I'd love to see more of your graphics in the future.

HueyTheGod - April 13, 2014, 1:48 am

For some reason I want to say this looks like a stick of RAM.

Hxrry - April 13, 2014, 1:55 am

Don't do graphics much anymore... Anything I produce I can share here though :)

casper0007 - April 13, 2014, 8:22 am

I like that bar looks good mate, thanks for sharing

Duhoh_Temp - April 13, 2014, 8:43 am

Looks pretty awesome to be honest, nice job.

If that only took you five minutes I'd say you've got some hellishly good graphics skills.

Create your own damn ub if you are going to be giving it out to people.

(Apr 14, 2014 09:11 AM)Flashy. Wrote: [\[CITE\]](#) So you just removed bits of his, and thought it would look better?

Like I said, make your own stuff.

Also, I'm not a post whore, I'm actually a designer who designs and creates their own work ? I made this myself and yes I took parts of my paid userbar, however anything I took was tweaked greatly.

There's no need to be a dick, you're one of the reasons for HF's bad reputation. You're just a narcissistic prick who has no idea about the real world and how idea's are constantly re-used, which is similar to what happened here.

You copied his over all look, with the exact same color scheme and everything. You basically stole his user bar, that isnt taking an idea or two from him, its ripping.

Second of all, I wasn't being a dick, you're the one calling me a fucking post whore when almost all my posts are in graphic sections (because I'm a designer and in fbn, not because I'm a postwhore).

You're over here assuming a bunch of shit about me when you joined in 2013 and only have 30 posts.

You don't know shit about me, Hf's reputation, or the "real world" as you said, get a fucking clue will you?

Invisus - April 14, 2014, 10:08 am

As Flashy says. It don't matter if they are not exactly the same. It's what we call a style or a concept rip. Don't make it much less of a rip if you ask me.

Good work detective.

I liked the colors, you can easily change the colors via the hue editor etc in mine unlike his PSD. I liked the font also, so fucking shoot me? You retarded little kid, grow up.

Just because I'm not active on Skidforums doesn't mean that I don't know my shit does it? You are the typical twat, you see a non-active user and assume they know fuck all about anything.

Inco-fucking-rrect you retard. I probably know more than you, in various topics. Albeit graphics isn't my strongest point, yes I took ideas and elements from the userbar that I paid for, I have full use and have the ability to tweak anything about the userbar. So, it's not ripping when it's from my own userbar that I have full use of is it?

Exactly, so yeah. Good day to you sir?

-Nath - April 14, 2014, 10:31 am

This made me lol. I actually can't believe this site :lol:

Lol, this is the last post I'm going to waste with you, I don't even care that you ripped.

It's more of the fact that I feel like you have some type of vengeance you have to settle with me just because I called you out.

I honestly could care less about you or your activity. Its just funny how you resort to a little kids mentality and call me out on saying you know more than me in other topics, which you obviously don't.

You seem mad because Flashy called you out and got you in a pinch. You ripped, took his style and are now GIVING it away to other people for free.

You resort to name calling, so I can already tell you are a child and are just angry because of it.

My rating of this piece: 1/10 (because I like the style and colors) The other 9 of the rating is for the original designer of the piece since all you did was move some things around and make it "yours."

Things are re-used, that is correct but your way of thinking is like if I went out and took a recipe from Tim Hortons or McDonald or something and gave it away for free or sold it to other members, it would be okay to do. Same concept applies.

xvFrosty - April 14, 2014, 6:19 pm

Thanks for sharing, looks awesome! would probably use this

Hxrry - April 16, 2014, 10:58 am

Community is full of retards, none of you seem to realize that idea's can be re-used. It's not a rip.

Blvck Scvle - April 16, 2014, 11:19 am

I really like it, it looks dope as fuck man. Definitely use this, maybe take out the grey triangle in the middle behind the word "Admin" but that's the only thing I can think of.

Gordon White - April 17, 2014, 7:17 am

Nice, absolutely a great piece of Graphic! :)

SonsOfAnarchy - April 17, 2014, 7:42 am

you went for a symmetrical look by the looks of things
the little black part at the top brings it down cause of that in my eyes

put a little more effort into your design

after looking through the comments and seeing what's been happening
you take someones work and then mess it up basically
sorry but wow

Shut up. You're just being butthurt because he told you not to use something you paid for. Besides, he's right, you could have made the userbar by yourself. Why are you insulting him? Because his opinion differs from yours? What's next? Are you going to say that he lives in his mother's basement?

Gørilla - April 17, 2014, 8:43 am

I actually like this and it'd be cool to see Omni wear it haha. But it looks a little dark compared to the background for this website, but it'd work cool with other sites. 9/10.
