Thread: [mIRC Clone Shit \(script\)](#)

Kamay - May 12, 2010, 1:39 pm

think this would be the best spot...

somewhat useful in knocking others out of mIRC, either for fun or for taking shizz

from some proxy forum i think it(s)/was proxyfire
originally known as SilverBotLoader

Due to:

Code Please correct the following errors before continuing:

* The message is too long. Please enter a shorter message it is [found here](#) or [here](#) (orig)

save as whatever.txt

on mIRC/NNScript -> Tools > Scripts Editors... -> File > Load... > whatever.txt | then hit OK
right click on the status window > CloneScript

self-explanatory from there on out

if anyone has the original SilverBotLoader in .mrc or whatever form please post it

any help on getting it into a /command form is appreciated

Spoiler ([Click to View](#)) 1 month time limit via pastebin~

had tons of fun with this in the past month or two, thought i'd pass it on to you

Civil_Chaos - May 12, 2010, 3:03 pm

Looks like a bit of fun :)

I Am Legend - May 27, 2010, 8:04 am

I'm still unsure on how to work these scripts, can anyone explain?

I Am Legend - May 28, 2010, 12:32 pm

Well the maximum that can join a #channel is 3, shouldn't it be able to bring more people in. Also I get banned for 10 mins if I keep the clones there for more than 30 seconds. Do the Socks4/Socks5/Proxy parts work? If so where do I go around getting them from. Thanks :)

Da Loser - May 28, 2010, 1:10 pm

Ok I Loaded The Script Now What :S

Status Window?

Kamay - May 28, 2010, 3:18 pm

I'll slap some shit together in paint...

E:Spoiler ([Click to View](#))

still need help -> reply

Keedo - *March 1, 2011, 8:22 am*

thanks man! I'll slap some shit together in paint... too!!!

P-Kito - *March 1, 2011, 11:01 am*

This script is a kind of ClonesXS for mirc.

I can offer a much better Python script if you want it.

SmokeyMP - *July 11, 2011, 10:40 am*

Sorry for the I have this script loaded and all, but after I hit "connect", it seems to connect to the proxies but I cant seem to get them to connect to the server??? Am I missing something??? I should have just set up that VPN, I'd have my botnet right now :(

Under Statistics in the Actions tab, "Connected Clones" stays at 0, while "Total Connections" goes into the thousands...
