Thread: [\[Source\] Simple, User/Pass & Hwid Based Authentication System.](#)

n0tReanimation - May 12, 2010, 5:38 pm

Hello,

I know, this is my first source code release. So this won't be fancy.

Anyways,

This is a VB.NET Source code, Free, leech it however you want. But i didn't leech this. I created this. But its a source where you put in a Email, and a password, and it will check for the email, password and Hwid (Known as Guid for some reason..) and check it to see if it matches. Cool thing about this source is you don't need to set the user's password or HWID. The source will automatically do this for you. The source has a Authenticating PHP Script that the source uses for all auth logins. The Script returns results RC4 Encrypted.

To get this,

[Click here for the Source](#)

Virus Scan:

File name: Simple_Login_System.rar

File size: 28412 bytes

MD5 hash: dae7350445951a1bcbf24bd63140a900

SHA1 hash: 57bafb3758ff224c4f25b25f1593fbee3f7b96

Detection rate: 0 on 20 (0%)

Status: CLEAN

Antivirus Database Engine Result

How to use the source:

IF you open the source, Add the System.Management DLL first! In VB2008, go to Project->Add Reference-> Then look for the System.Management, Select it and click OK.

1. What you will need is a free host.
2. Import acs.sql to your MySQL DB.
3. Edit auth.php to your DB. Edit the RC4 Secret Key Spot. Then Upload it.

Now its ready for use. Just take the Source.rar, extract it, open it, and take the snippets. Take the entire source to your project it. Edit some parts, URL for the login function, and the RC4 Secret Spot from the PHP File.

Adding someone to the DB is not that hard. No Panel so you have to go on cPanel and go to phpMyAdmin.

But its simple. Go to the table, Add someone to the DB. ALL you need is their Email Address, and the Status field to be "4" without quotes. Like mentioned, it automatically fills in the Guid/Hwid and Password for you. MD5 Hashed.

You can give me credits if you like. I appreciate it though. You don't have to :)

Enjoy.

PAGMAN - May 12, 2010, 6:53 pm

i just fell in love. Thank you. This will help me out a bunch.

Dark Coder - May 12, 2010, 6:57 pm

How would I crypt to RC4? o.o

n0tReanimation - May 12, 2010, 8:34 pm

(May 12, 2010 06:57 PM)Boobies Wrote: [\[CITE\]](#) How would I crypt to RC4? o.o
What do you mean?

It's already doing the RC4 Work if of course your talking about the source.

(May 12, 2010 06:53 PM)PAGMAN Wrote: [\[CITE\]](#) i just fell in love. Thank you. This will help me out a bunch.

I'm glad this works for you.

kbhawkman - May 12, 2010, 8:46 pm

Very low post count. Does this work people?

n0tReanimation - May 12, 2010, 8:52 pm

If you want i can help set it up for you free.

Add my MSN: mxc-x@live.com

So, the RC4 Is built into the source code?

ASMAteMe - May 12, 2010, 11:16 pm

(May 12, 2010 08:46 PM)kbhawkman Wrote: [\[CITE\]](#) Very low post count. Does this work people? Just because 3/4s of the users here are nubs doesn't mean everyone is =P

Thanks for this, it will be useful with my upcoming project!

krack0r - May 12, 2010, 11:42 pm

thank you.nice hwid protection.

n0tReanimation - May 13, 2010, 5:02 am

[/quote]

Yup. All you need is a Secret Key for the RC4 and your MySQL DB Info (For the PHP Script)

OT: Thanks for the release.

CodyBooter - September 27, 2010, 9:45 pm

i'm having a problem it works fine, but when i type in my email and a new pass a blank one comes up,
i re-open it i type the same info and nothing pops up.
the password got hashed into the DB so did the GUID?

n0tReanimation - September 29, 2010, 7:42 pm

the password got hashed into the DB so did the GUID? You just put the email, and then it auto-hashes the password + GUID.

Superman² - June 1, 2011, 6:42 pm

Awesome source, but I'm having the same problem as Codybooter

1st time it show a empty msgbox (so I did put "Registered !" in it) but then it load and.. nothing.

But on my db I have my password / guid md5 hashed ... don't understand what's going on.

Is there a problem in the source or what config do I need to make it work (configuration of mysql / php ?)

?Mhaw - June 1, 2011, 6:47 pm

thank for this source very helpful

Coleak - June 1, 2011, 6:49 pm

Why are you ing a year old thread... I should neg rep u...

Superman² - June 1, 2011, 6:53 pm

(Jun 1, 2011 06:49 PM)Coleak Wrote: [\[CITE\]](#) Why are you ing a year old thread... I should neg rep u...

Maybe cause the problem isn't solved, because I found that thread by searching on google. Still wanna know how it work.

I don't give a fuck about rep ? stop being all like god with that "I should neg rep u" do you really think that you're a boss by saying that ? Damn rep fans

EDIT: I forgot, what about helping instead of writing useless comments ?

Yes I can help you with it, next time pm or ask for help from someone, don't the thread.

Add me on msn: coleak907@live.com

The MammoTh - June 1, 2011, 7:09 pm

I be using this. Thanks for posting.

Xieru - June 1, 2011, 8:41 pm

How do I add a user in phpmyadmin?

Wet - June 1, 2011, 8:49 pm

Thanks for this, really needed this.

FANB?Y - June 1, 2011, 10:56 pm

can you make a video for ! i have many confusions ! Please Make a video !

Stenography - June 2, 2011, 2:01 am

could you add some pictures please ?

Thanks.

hackBoTneT - June 2, 2011, 10:44 pm

Not working for me.. I need help.... Can Anybody help???

n0tReanimation - June 3, 2011, 4:53 am

The first thing that comes to mind after the bum is WTF QUESTIONS!?!?!?

I don't mind though.

If you need help with this, PM me or Coleak :S.

Macintosh - June 4, 2011, 8:03 am

Hi ,

I uploaded the .sql thing et the .php , it worked

The first connection , it show a MsgBox where nothing is writed , the second connection it's blocked

, can you help me please?

Quien - *June 4, 2011, 9:22 am*

Nice aport dude ;)

Thanks.
