Ok guys, before you take a look at this picture, I just got two things today, that I never used before!

First my Wacom Bamboo Tablet, and PaintTool SAI!

Anyways this picture is a bit cheesy but either way, this took me around 10 minutes to draw and 30 to paint, so let me here your intake :D

Ah ok. I recently got the Intuos tablet and was wondering what the differences were (and what might have led you to choose the older one).
