Note: This is for Null Products and marketing only. Do not mix this up with Nulls main group theme, security.

Information:

This region of Null will be all based on marketing and business related, so those here thinking it's for the white hat scene, turn around and keep waiting. What I am looking for is coders or product owners for Null Products. You will be selling your products/services within Null and outside HF to 3x your income. You will be working alongside Null, therefore you will be granted a spot in Null, your products will be advertised in our SMF, site, advertisements, and you will also be given free graphics for your products/services. I am going to expand this section of Null, I don't care if it is white/black hat products, as long as it has a trail of high quality, you will be reviewed. Please don't waste my time by offering your VPN's or Crypters. Please read below for more information.

Requirements

- [+] 0% warning levels. (This will be reviewed)
- [+] No scam reports. (If there are any open/closed reports on you, I will investigate them and make my decision.)
- [+] Act mature in all cases within Null
- [+] I don't care who you are or what you can make, you must be approved by us leaders.
- [+] No, I will not accept re-sellers while your coder is busting his ass by making your product.
- [+] If you're a coder, be prepared to get started as soon as possible.
- [+] If you have a current product, be prepared to re-brand it. (You will be offered free graphics)
- [+] If you are going to submit your app about your VPN or Stresser, please close this tab,

Current Products - I currently own a signature shop:

<https://hackforums.net/showthread.php?tid=4091590> , as well as working on a Video Advertisement/Production service that will feature products made here on HF as well as elsewhere. (mainly for products, may turn this into a service) as well as my "PitchNiche" Service which can be found here: <https://hackforums.net/showthread.php?tid=4153413> . PitchNiche just needs an extra

boost in order for it to kick off, I can guarantee that it is a very high quality service just like how I present myself on HF. I try to keep all my online matters strictly professional unless in a group lounge or skype room.

Will You Re-Brand Your Product - Most Definitely, would be beneficial for all of us.

Why Accept You And Not The Person Above You: Obviously I am not the most well known marketer on HF, nor do I plan to be. I am more of a service type of guy and am very interesting in assisting others. "PitchNiche" was my creation for my passion to help others. I am looking to always develop niches in the market as I currently do with PitchNiche, which is an extremely unique service and can have the potential to generate a lot of income if backed up by a solid foundation. (In this case, Null). I currently run a very large section of a business known as Vemma, and my teams branch is earning roughly \$10,000 a month, which is not bad for a 17 year old manager. This goes back into the company funds, and I manage a group of around 10-20 people. Working for Null has been a motivation for me ever since joining HF back in January of 2014 ? , I have come a LONG way since then and just recently got into my second favorite group (Legion). I am being mentored by some amazing individuals as well as working with people from Jade and Diamond marketers and getting into the online marketing world. I genuinely think that my services (mainly PitchNiche & my advertising service) will benefit Null as well as help the Marketing team out on any projects we come across due to my management/thinking skills. Why choose me from the next guy? I have the passion an desire to prove my skills to the fullest extent and will go out of my way to get above and beyond marketing expectations, sure I may not have a better product to offer, but given a spark, I am able to think of niche products that will stand out from others.

Thank you for your consideration & time while reading this.Warm Regards,-Ego ?

Do You Meet The Requirements: Yes

Current Products - Currently looking for the right project to invest in.

Will You Re-Brand Your Product? Most definite

Why Accept You And Not The Person Above You: I would like to be accepted, because I am a hard worker, and very dedicated. I have money to invest and have familiarized myself with many "product" fields on HF. Now i am looking to settle down and invest in one project to bring it to the top.

Why accept me and not the person above? I wont take this question "literal" but to all the people above me. I believe you should accept me, because I am looking to start a project. Not really a VPN/Booter. I could, but I'm looking for something that speaks out to me and is somewhat unique here on HF. Something others I believe dont have the "mindset" for. Most people are in for the quick buck, I of course, like the quick buck but I am looking for a project to put all my devotion into. For a long term income.

Thank you, and I hope to further my conversation with Null.

Do You Meet The Requirements:

Yes, other than my warning level which will return to 0 on the 24th of April.

Current Products -

MoneyMulti - Monetization eBook. Also going to be releasing a VPN with my partner, Reama, soon.

Will You Re-Brand Your Product:

Yes, I was originally planning to rebrand Money Multi anyway so this is the perfect opportunity.

Why Accept You And Not The Person Above You:

I can't tell you why you shouldn't also choose the user above me because I personally believe they have as much chance of being accepted as me, but what I can tell you is that I strive in doing the absolute best I can in whatever it may be. I am willing to share my skills and knowledge with all the

members of Null, aswell as share my complete product line. I also believe that selling my products with Null would not only increase sales, but would also improve Null's name - not only known for its elite security but also for releasing truly outstanding products.

I'm currently part of The Brotherhood Business & Marketing sector so I'm able to use the upcoming SMF to advertise products. I was also part of the Complexity Business & Marketing Sector before it disbanded and became Infamous.

I'm just going to wrap things up by saying a huge thank you to Soccer an Null for this kind recruitment, Null has always been a group I've always admired so it'd be incredible if I were to be apart of it.

Languages: HTML, CSS (+/-), JS (+/-), PHP, VB.NET.

What Products/Services Can you Bring: I don't really know, usually people ask me when they need something, and if I can, I try to help them. I also like to code big projects but I don't have much time as before because of exam times. For now, I can code about ~40h per week. When it's not exam times, I can code about about 80h weekly.

Why Accept You And Not The Person Above You: Why not xD? Well maybe he could bring something that I can't bring but I am sure I will do my best to make Null leaders happy :)

Thanks !

Time Zone: GMT + 2 (Amsterdam Zone)

Age: 16

Do You Meet The Requirements: Yes

Past Work (Optional): <https://github.com/iVisii>, I made more applications but either I've lost them or they aren't opensource (also some projects are outdated because newer versions are under development). For instance:

- SocksNET: Open-source SOCKS Library for .NET
- SocksPE: Packet Editor based on SocksNET ([Preview Thread](#))
- iDesktopVision: RAT (Stub written in C++, Controller in C#)

Languages: C, C++ and C# (Real-life: Dutch and a bit of English)

What Products/Services Can you Bring: I never made anything to make money or that is intended to be sold on HF, this doesn't mean I can't make them (I can look at my RAT or Packet Editor for instance) but I never bothered to sell them. So I'm expecting that someone tells me what I should make (or finish) to sell on the market.

Why Accept You And Not The Person Above You: I'm not sure if I should bash the person above me and say I'm superior or tell why I'm a good developer (language barrier I think). To answer both:

- The user above me had worse grammar then me and didn't construct his application well. This makes me think he didn't put effort in his application. I can't really say more since I do not know the user nor he is applying for a developer spot (I think but he does use that application..)
- I'm a fast learner and always trying to improve myself, for instance last week I'm busy to improve my reading-speed so I can read articles and books faster and learn more in less time :D

I finish my goals although it might take some time.

I can work with a group

I can lead a group

I'm relaxed, I don't stress a lot which makes me more efficient

I have a lot of free time

Kind regards

Ps: I hope you don't mind I bolded the questions to distinct them better.

Is that true? Vinnie thinks my eBook is pure shit, even though it's been vouched and rated high for however long I've had it up on HF. I offer it to all members who qualify at no cost. But it's shit according to Vins (probably because he's butthurt from me winning the last conversation/argument we had about his group or whatever), and since you mentioned him in the post above, it doesn't matter if I apply or not, he'll keep me out of the group, probably at all costs.

Let me know if you can override his... opinions (which I know you can because you're in charge). I probably won't even bother applying because of Vin (and his opinions), unless you disagree, which I highly doubt will happen, but whatever small chance there is, it's there, so there is somewhat of a possibility.

I'm fucking 16 and wrote my eBook on my own. Sure, for the information I did not completely know everything about, I did give credit at the end of the last page, but I didn't rephrase copy-pasted paragraphs from Wikipedia. I choose not to sell it because I'd much rather give out my informative, high quality (a now saturated phrase because of all the, like you said, little kiddos that write a paragraph in Notepad and sell it for 50 bucks) eBook at no cost to members worthy of receiving my product. I keep an eye on who gets my shit to make damn sure they don't leech or rip from it.

Give me some time to add a bit more information, and I'll send you a copy if you want. And, again, I would apply, and seeing as Vins hasn't replied to me yet, I am considering possibly applying, but I'll keep waiting to see what happens. Well, what do you have to say to me? By the way, Soccer, I never, ever, ever saw you in the sections I lurk in (BSDaCLI, C/C++/Obj-C, and the general coding section). Not that that matters, but all of a sudden you come out of nowhere and have a group now. Maybe it's just a coincidence. Maybe not. I don't know nor do I care.

Let's see what happens now.

In my opinion, 1x deserves this a lot. From my experience with him, he's very skilled.

MOST of you haven't received a PM due to your applications. You don't the fact in my head that you are worth this position.

Second sentence does not make any sense, at all.

Do you accept marketers?

I am a copywriter, I write sales pages. PM me back if you do, please.

I'm wondering this as well.

I haven't seen the null leaders give any feedback recently.

Soccer - May 5, 2014, 3:12 pm

Reason there hasn't been anyone accepted is because,

- A) Offering mainstream products
- B) We already have experienced web developers in Null.
- C) I don't need you if you can't manage your time when making something certain or if you need to go to someone else to complete it.

Time Zone: eastern U.S

Age:22

Do You Meet The Requirements:yes

Languages -

javascript both client and server side(node.js), actionscript 3.0 including the flex SDK with experience in rich internet application development and custom component class creation(the hallmark of an above average flex developer)

and i know a bit about java but not as much as i should

What Products/Services Can you Bring: if you need RIA's developed, you've found yourself the best hemorrhagic fever for the job

Why Accept You And Not The Person Above You: i GURANTEE im the only flex developer that will ever apply, and the one that knows the most about actionscript so you literally have to accept me because there will be noone else.
