Thread: [Need bot created for traffic to website with clicking and browsing](#)

toldmiki - April 18, 2014, 5:37 pm

You know I use Murgee Auto Mouse Clicker but it's not enough. I need better and more.

I need someone to create a bot on a website that browses the website, stays for a certain time, clicks on ads and other links. Browses those links and clicks on areas of those sites. Also not every user will click on ads etc.. Let me know how much this would cost.

Thanks

You know it's only additional for me because I have a lot's of firefox addons and ip hider. So I need only a simple bot which is browsing and clicking.

Code this yourself in C with the Windows API. Set the mouse position, and command Windows to click there at those coordinates.
