Thread: [Cryptolocker - Lockdown and complete prevention!](#)

Machiavellian101 - April 18, 2014, 7:04 pm

As many of you are probably now aware there is a malicious program called CryptoLocker that encrypts personal files and then offers to decrypt them for a paid ransom. However there is now a solution to that problem - CryptoPrevent! Please read [THIS](#) that will take you through a detailed guide on how to download and use CryptoPrevent. This is a very powerful tool that also has the capability to protect against a wide range of malware; not just CryptoLocker.

Aura - April 18, 2014, 7:10 pm

It will also protect you against CryptoDefense.

Also, full FAQ on BleepingComputer about CryptoLocker and how CryptoPrevent works :
