Cornflower Blue ???-? — *April 19, 2014, 9:52 am*

Offline. Will resume later.

Come join! I have no clue how long I will be coding for.

This game will be a bird shooter for mobile devices for free :D

Made in Unity.

I call this game REVENGE.

Ignore the programmer art!

jazzycool - *June 15, 2014, 6:43 pm*

dude that is good i am also trying to learn unity but don't get that drive to learn also I really want to develop games in 3D but don't have much knowledge in 3D modelling so it really makes me discouraged and make me get away. You should be proud atleast you did this much.

...Grave Dig...

Thanks I guess, I am learning how to model at the moment.

If you want the source for this PM me.
