Thread: [Select the from the calendar and but only select the right uid](#)

MarMigs - April 19, 2014, 11:26 am

Hello,

I've been working with this little piece of code a while and it has not working still dont know why.

Basically I'm trying to get a full calendar and then put the total_profit in going to the days.

Code SELECT calendar.date AS DATE,

IFNULL(SUM(sells.price),0.00) AS total_profit

FROM sells RIGHT JOIN calendar ON (DATE(sells.date) = calendar.date)

WHERE (calendar.date BETWEEN (CAST(DATE_FORMAT(NOW(), '%Y-%m-01') as DATE)) AND (LAST_DAY(NOW())))

GROUP BY DATE;

This piece of code works, but when I try to refine the search and put an uid, like

Code SELECT calendar.date AS DATE,

IFNULL(SUM(sells.price),0.00) AS total_profit

FROM sells RIGHT JOIN calendar ON (DATE(sells.date) = calendar.date)

WHERE (calendar.date BETWEEN (CAST(DATE_FORMAT(NOW(), '%Y-%m-01') as DATE)) AND (LAST_DAY(NOW())))) AND uid = 2

GROUP BY DATE;

It doesn't work, just leaves the days that it is not null or not 0.00, how can I get the full calendar like the below and still refine the search to only match the uid I want?

Code +-----+-----+

| DATE | total_profit |

+-----+-----+

2014-04-01	5.00	
2014-04-02	0.00	
2014-04-03	0.00	
2014-04-04	0.00	
2014-04-05	0.00	
2014-04-06	0.00	
2014-04-07	0.00	
2014-04-08	0.00	
2014-04-09	0.00
