Thread: [\[Simple Spreading TuT \]Spreading Your Virus With A Picture Website\[Easy \]](#)

Hackzable - May 13, 2010, 4:02 am

Ok, This is my first tut so don't flame me ?

This the method i use to spread

it works like this:

You send a link to someone he/she clicks on it and sees a picture at photobucked/[censored]
then gets asked if he/she wants to download a file yourpicturenamehere.jpg.exe the person sees
the trusted site hes on and clicks yes

Online Preview:

<http://photo-bucket.webs.com/>

I included a test site in the .zip

There are 3 .html pages in the zip notes are added to them what to change

Download link:

<http://www.multiupload.com/HPX49OYJ6Q>

Hope it will help you ?

1995ad - May 13, 2010, 6:41 am

its a really simple technique.. its all about renaming it and nothing else...

Phreak™ - May 13, 2010, 6:42 am

Pretty Simple, But Couldnt They Just Right Click And Save The Picture.?

Hackzable - May 13, 2010, 7:24 am

Phreak, yes they can but why do that if you see a file with an image icon popups to download ?

-mothered- - May 13, 2010, 7:39 am

I guess It's all about capturing the Interest of a given victim, hence a prompt to download a file of temptation.

I'll check this out In greater detail soon.

Cheers mate :)

krishnav891 - May 30, 2012, 11:42 pm

does any 1 tried this is this work ?

haskabab - June 26, 2012, 11:20 am

I don't see any popup when i visit that website? No exploit pack i hope xd? otherwise, well played.
:P

kompasstools - August 6, 2012, 7:17 am

Can u expatiate ON IT and let get to know how its done becos i tried it and it did not work

Hackzable - September 24, 2012, 9:59 am

This infection method works with the use of frames, the user thinks he is on photobucket, [censored] etc... but instead a window is opened with your virus file

molby61 - September 24, 2012, 2:37 pm

Interesting read must give it a try

scorpionwally8 - September 24, 2012, 7:21 pm

cant download no file there ...was gonna try it out

Vile Soul - September 24, 2012, 7:41 pm

like the tut but tuts go in the tut section no?

chrismaker - October 15, 2012, 7:29 pm

Link no longer works. Would like to try this if you can reupload the files. Thanks regardless!

T-rom - October 15, 2012, 9:30 pm

Guys this is a year old.

This method still can work with some sites.

Go find your own :p

_degenerate - January 26, 2013, 1:07 pm

Very nice very nice it still works great. Thank you !!

jazz56 - February 17, 2013, 12:08 am

I will try this to see if it works. thanks

Bignuts27 - February 17, 2013, 12:14 am

Great method, I am definitely going to try when I get my rat working. I really appreciate this!

ppp - February 17, 2013, 6:32 am

you'd only be hacking dimwitted dweebs for downloading a picture with .exe as the extension..

xonic34 - February 17, 2013, 6:39 am

(Feb 17, 2013 01:08 AM)jazz56 Wrote: [\[CITE\]](#) I will try this to see if it works. thanks

Why grave dig this thread? This is 3 years old.

Anaestheist - December 20, 2013, 8:54 am

Not something i would fall for.. you really need to be dumb to fall for this in my opinion xd. Not trying to insult anyone but still...

MrTing - December 20, 2013, 8:55 am

This is why the thread is so old. Stop grave digging this.

Mnikkilla - December 20, 2013, 7:41 pm

Thanks for sharing will try it ! :)
