Insidious miner I think that was one of the cheapest as I recall

If you want to go profit with your slave, I'd recommend you to script mine the highest exchanging altcoins/script coins.

You can no longer gain profit if you don't have a 10k+ botnet with bitcoin mining.

I can sell you cheap ones. BTC should be effective, still quite low. But mining doge or lite is better.

And it works the same way? Joining the pool with the workers and etc?

I would be interested in that then.

I'd suggest getting null miner, they are good too.

It seems really expensive unfortunately...
