As the description of Polymath indicates, Polymath is not a group with one specific theme or topic. Our goal is to build a group with a set of individuals with different and broad knowledge, so that we as a group can cover multiple things here on the forums.

To apply for Polymath, write an application where you tell us about yourself and post it on this thread. There are no specific requirements on how you should set up your application. Please note that we will only accept members whose skill-sets match well with our requirements and show a certain indication of quality throughout the forum.

Please keep the application below 150 words.

Do not ask us if you have been accepted, or if we have read your application. If you get into Polymath accepted, you will notice.

Is someone really booting the site?

Bet - April 20, 2014, 11:08 am

[img]http://i.minus.com/ivm3a7DWxk3V.gif[/img]

My name is Dylan, I am a 16 year old from Australia. I love to talk and would consider myself a nice, outgoing and friendly person. I really enjoy learning, and I see it to be a main component in my skill-set. I am currently in Year 11 at a high-school in Victoria, Melbourne, I study Physics (Year 12 level), Programming, Web-Design, Japanese and all the other usual subjects. In my spare time, I enjoy gaming, mainly on the PS4 or PC, in which I excel at. I also enjoy participating in some minor activities involving ratting, doxing and web-design/programming/coding/marketing. As I said before, I do enjoy learning, which is what else I do in my spare time. I can learn and adapt to pretty much anything.

Colorado - April 20, 2014, 11:12 am

Hello, my username is obvious Colorado. I am involved in a ton of different skillsets, I do a lot of Web Programming.

I used to be heavily involved in PHP/MySQL coding, but I've switched to making site skins for forum systems like IPB for a little money.

I released a couple PHP applications for free in that time frame here on HF, but I haven't been too active with PHP.

Lately I've been getting into 3D development, especially after the announcement of Source Engine 2. I currently design maps and other related things for Source Engine games.

I am in college and I am hoping to graduate this winter with just a basic associates of arts, not wanting some expensive useless degree.

I also mine cryptocurrencies, I have 2xR9 290s that I use for mining and I try and help as many people as possible get started and learn about cryptocurrencies.

I used to be involved with IT support (specifically Cisco IT Networking) after completing their courses I found myself leaving the area of IT for a job, it's boring.

I am training to become a mortgage lender, very random, I have someone that is going to allow me to work under their company.

EDIT: Figured I'd add I am 19 years old.

Cyrus - April 20, 2014, 11:12 am

Oh & I'm Cnotes, spend most of my minutes alive on my computer, don't go out much during the week mostly just at the weekends, I like learning, I like adapting, I like Polymath.

notempest - April 20, 2014, 11:12 am

My name is [deleted] and I am [deleted] years old. Unlike many members of the community, I came onto the forums without being too proficient with computer technology or the business field.

However, it's only been a positive learning experience for me as I am gaining vast knowledge every day. I hope that continues.

Regardless, I am currently an undergraduate psychology student with a minor in international relations at a university in the [deleted]. Since I live at college, I am heavily involved on campus. I hold numerous leadership positions regarding clubs/events and aid with scientific research as well. I take academics very seriously and am always looking for ways to be innovative and to improve myself. Conversely, I'm pretty easygoing, contrary to popular belief.

Some facts about me:

- I cannot snap my fingers.
- I drink a lot of tea.
- I'm [deleted]"

Kind regards.

My name is Ego, I am a game reviewer/commentator as well as a Radio channel host. I LOVE music and video games, considering they have always been around me. I am also a student learning computer security/analysis as well as a Video editor. Hosting a radio here on HF has always been a goal for me as well as possibly doing game reviews for the HF community, I just like to help people how ever I can. I've been streaming on my "HF Radio" here: <https://hackforums.net/showthread.php?tid=4178906> . After a long time of debating what I want to do on HF, I have come to the conclusion that I couldn't see myself anywhere else other than hosting a radio for the community and being a student for various programs offered here on HF. I try to remain professional when on HF as I love to make a great impression on people, I am very caring and will go to my fullest extent to try and help others however I possibly can. I currently lead the VFX sector within Brotherhood and it is the first of it's kind here on HF! I love that sector to bits, but I spend most of my time around music and improving my radio station.

Radio, Gaming, Editing, Computers. Pretty much sums me up in a nutshell! Thanks for taking time to read this, much appreciated.

Warm Regards, -Ego.

My name is Cozzi, and I am interested in joining Polymath. I have a broad knowledge of specific things around this forum (Most fall under the same category). That include

- Marketing
- Business
- SST
- Cryptography (VPNS)

I am currently expanding my knowledge in the business/marketing section. Where I am pursuing my future career in, to specialize.

Thank you, I hope to further my conversations with Polymath in the future.

incc - April 20, 2014, 11:17 am

I'm Incc, as I'm sure you're aware. I don't normally do applications so I'm not sure what to put here so I'll try to make this brief and concise. I'm a 19 year old student at a university, I graduated top 99% of my class and scored a perfect ACT score. I'm majoring in biochemistry with a pre-med track that will result in me being accepted into a prestigious medical school where I will then study neurosurgery and graduate as a neurosurgeon. I like to help people learn and have tutored people since I was in middle school, which also coincides with my intended career choice. I apologize if it sounds as if I'm boasting but I'm not sure how to list my achievements and whatnot without sounding like I'm bragging. Back on topic, I'd like to join Polymath as I enjoy learning and helping people learn and better themselves.

?ain - April 20, 2014, 11:19 am

My app:

I'm Cortex. I'm pretty decent and love everything from writing to botnets. I'd like to join Polymath simply because it seems like a very high quality group. It seems like a great learning opportunity, and that's what I really want. I spend lots of time on the interwebs and can learn anything very quickly.

12Chainz - April 20, 2014, 11:19 am

Hey, I'm StandUp, previously known as Jest.

I've been here for over 5 years, I'm proficient at everything from marketing to politics. I joined this site when I was 15 so I've had time to mature and understand how HF works. I attend a top University, and plan on going into entertainment law. I also perform stand up (comedy) sometimes as a hobby. I have a laid back style(of posting) and don't like to take myself too seriously. I stand up for what I believe in and know how to deal with a wide variety of people.

Im gone brah - April 20, 2014, 11:21 am

I'm Zayne. I'm quite interested into coding, pentesting & Linux management.

I'm going to take my first certifications very soon & that's awesome. I'm trying to appease myself by learning new programming languages & new exploiting techniques. Also I'm trying to spread a positive effect to the community & I abhor negative things.

I'm currently coding in html, php (basic - learning), css, Ruby. I may not be the best, but I'm trying my best.

I will probably take some security / web application penetration certifications / and am currently taking a web design course.

Facts about myself right now;

- I'm in my cabin.
- I'm using a keyboard smaller than my hand because I accidentally broke my keyboard.
- It's late, so I spell bad.

Pray - April 20, 2014, 11:22 am

My application:

Hello there, I'm Chieftain. I'm currently 17 years old and attend a Middle College. If you don't know what a middle college is, it's a community college and a high school put together. I get to go through high school while taking college courses and getting credits. Anyhow, I'm hoping to study law once I am out of M.C./H.S. and become a lawyer. Currently, I play a lot of League of Legends and love playing golf with my dad. I'm quite active on the site and do my best to only post where I think it will matter. Anyhow, some fun facts about me: I speak 3 different languages including Russian, English, and Spanish. I'm only fluent in Russian and English, though. I'm 6'0. I don't like sports too much, but I used to play hockey and was a competitive swimmer, got bored of both and quit. I probably have more online friends than real life friends. For some reason, it seems much easier for me to meet people I really like online and get to know them rather than in school, probably because I hate interacting with the people who go there. Oh, and I have 9 pets including 5 cats, 2 dogs, a guinea pig, and a turtle.

Anyhow, I believe that's all I can say about myself for now.

Thanks for the recruitment and the unique giveaway.

Aceman - April 20, 2014, 11:25 am

My name is Aceman or Josh. I am currently studying computer networking looking to specialize in network security or at the very least have an in depth knowledge of it. Intellectual conversations and discussions are something which interest me as well as monetizing online. Currently my top priority is learning a lot more about monetizing and profiting online which I'm currently succeeding at. After my current project I plan to move onto bigger and more profitable things once I have established myself more as a trusted seller. When I am not working on school work, learning, working, or trying to make some extra money I am playing League of Legends. I work 24 hours a week in IT at my college through a student work program, have a 4.0 average, and am always open to new opportunities.

Some things about me

-I'm 16

-I enjoy doing GFX

-I talk alot

-I LOVE sleep.

Thanks for reading my application, Hope you consider me for Polymath.

I am a very wide skill set from graphics and computing to multiple languages (English, Portuguese and Japanese) and science (Physics, Chemistry, Biology). I enjoy Hackforums because I can teach others and also learn at the same time. There aren't many opportunities out of HF where I can do this so that's why I love the site. First off, I am a skilled writer and enjoy creating short stories and articles. Ever since I was a child I noticed I had a gift when it came to writing. Throughout my entire life it seems I have only been able to truly express myself in writing. The natural ways words flow on paper amuses me and my vocabulary continues to grow daily. Writing is an important part in my life not only because of expression, but also because I found the love of my life writing. We met at a local writing competition and we tied for first place. Since then we have been very close and often share story ideas with each other. Writing brings meaning to my life, what brings meaning to yours?

I've been following Polymath since the very beginnings. I was denied in my first application but it never hurts to try again. I've been a very active user since 2009, and I attempt to help other users to the best of my ability. I have basic knowledge of coding in different fields, but it's not praise worthy. I'm a very social person and car enthusiast. I'm still in high school but I'm earning college credits by taking AP classes such as Calculus, English 4, Chemistry, and Biology. I thoroughly enjoy marketing and have been working on finding niches. I also do some web design. I look forward to hearing from you,

I like to self-teach myself many things that I don't really get the opportunity of studying in order to expand my knowledge, I like to learn and educate myself as much as possible. I also enjoy gaming, I started gaming with the Gameboy colour and Playstation 1, and have been addicted ever since. I enjoy FPS, racing, and RPG games the most. I hope to join and share my knowledge with the members, and hopefully learn a few things from the members.

Names Brandon or BlueTiger(preferred).

I do graphics for any kind, but havent gone far into the graphics timeline, been doing it since late

January, only still a beginner, not close to an intermediate. Still have a long ways to go, you can go see my latest work in my signature. I have some basic knowledge in computer tech such as in programs, AV, AM, computer parts, gaming specs, and just basic computer security and the dangers on the internet. Not a pro white hat person but a beginner. A beginner in doxing, only knows how to find a portion of someone on the internet with a simple skype ip search and google maps. I dont consider myself HQ nor anything else, just a simple kind and generous person in both lifes of in real life and HF.

Have a good day.

Obli - April 20, 2014, 11:50 am

My salutations. I am +Oblivious, and I am a tagger. A tag is an abstract/artistic signature, definition may differ depending on the tag artist. In real life I'm a 23 years old adult who is simply bored.

My portfolio can be found at <http://vocaloidandsuch.deviantart.com/>

I am not the best, but at the same time I am not the worst there is. Tagging is my passion, one of the few things I'm good at, I practice daily on my smudging. Some have advised me to follow pochy's style, but I want to make something new and unique in my tags.

I used to be an asshole in the past, but I realized that I was wrong about myself and others.

Thanks for the opportunity.

Username: Mahdy

Age: 19

About me: I am into graphics, gaming, a skill set in hacking and I love getting to know people and give out a helping hand. I'm a people person, I get along good with almost anyone. I try to give what I can in whatever I have the knowledge in. I try to make the best out and make light of any situation. People around who really know me can and would say I am a very kind and helpful member. I am always here for anyone who needs it, emotionally, or physically. My skills are many, I can elaborate for hours, but I'll spare you for that.

Marketing, I love that. "Clinkity clank, clinkity clank, money goes into my piggy bank." I'm trying to expand to other forums as well in order to gain more recognition.

Writing, I love that too. Words don't come easy, but when they come, they flow.

I know I'm a real polymather because I'm a born mate. I get along with others fairly well, and I keep my pokerface most of the time, but I smile whenever it's needed. I've always spread good mood and I'm the so called "Smile-Starter" in my class at school.

Komodo - April 20, 2014, 12:10 pm

Hello, this is Komodo. I joined HackForums a little over 4 months ago, and I have learned a lot here. I started out with mostly BlackHat themed things, but now I am beginning to become more of a White Hat Hacker. I am very active on HackForums, and Polymath looks like a great group that I could spend my time in.

I would be willing to do anything required by me for the group, and would love to be a part of it.

Sorry for the short application, had to keep it under 150 words.

?ing - April 20, 2014, 12:10 pm

My name is Aidan, I've been on HackForums for almost a year and have always been as helpful as possible when I can be. I am quite into my gaming and I use all platforms but mainly Xbox and PS4, being friendly and gaming with members is always fun. I have good knowledge on Computers and would love to join Polymath.

Transported - April 20, 2014, 12:15 pm

I'm Simple, and this group fits me perfectly considering I have skill sets in multiple areas such as; marketing, monetizing, graphical art, and several basic hacking tools such as RATs, Botnets, etc. I would love to join this group because I'm an extremely active member always looking to learn more, from every subject. Ever since this group was first created it has been my goal to post on a recruitment thread, and since this is open, I figured I'd give it a go. Thank you for reading my application!

Sincerely,

Simple.

My name is Reece, I've been on hackforums for just over a year and i enjoy browsing around the forum, helping members and learning new skills. I am advanced in: Rattng, i also used to help people setup their rats on Hackforums. I mainly code in VB.Net, its basic but easy to learn. I used to do some eWhoring and got myself quite alot of cash \$400+, but seen too many dicks, so i stopped. I'd love to join Polymath because i am really HQ and i'd like to help users out with that sexy user bar on my profile.

Promethazine. - April 20, 2014, 12:19 pm

Short version, 150 words limit :/

My skills are:

- I consider myself being very social, I can talk to people, comfort them, share experiences and listen (etc.) I've got a lot of knowledge of human nature, which I can't explain in words, but what I can say is: it feels like you're always 1 step ahead of everyone and that is a huge advantage.
- Ratting, been doing it for over 3 years now and i'm experienced with multiple rats.
- SE'ing, this isn't allowed here, but my skills aren't limited to e-whoring only.
- E-Whoring, did this for a long time now, don't do it anymore but I think I made over 2k during the time.
- Marketing, I'm good at marketing products onsite, and even in real life. Give me a pen and i'll sell it to a stranger within 10 mins.

Kind regards,
Promethazine.

I'm here applying to be a part of Polymath member, I'm an active member and like to be involved around and by being a part of Polymath I like to bring even much activities to the group and help Polymath to be improved even better group and be in a better place of group, doing contest which belongs of the group Polymath. I have knowledges I'm good at making money as that's the main thing. I like to help others with hacking, and web based coding as I can do these following stuff. I also own a studio I'm into music and such stuff.

Keeping it with less words and detailed as possible, thanks.

G??gle - April 20, 2014, 12:21 pm

Alright so this will be my application. Since it can only be 150 words long I'm not going too much into detail.

Literaly my entire life I've worked with Apple. Laptops, phones, iPods, iPads, etc...
This way I know the system from the inside out. Hardware and Software. I always like to help others with their problems. It makes me feel good when I resolved their problem.

I'm also really into graphics. GFX and VFX, but more GFX.
I like to make drawings, logo's and thread designs in Adobe Illustrator.
If you'd like a portfolio you can always PM me.

But I'm more applying for the computing sector, I think I really fit in there.

VRUMM - April 20, 2014, 12:22 pm

I'm a huge cryptocurrency nerd. I managed the Omnicoin reboot project, and believe that cryptocurrency has the potential to change the world. I'm also a lover of open-source development, and have a github filled with lots of lines of code. It'd be interesting to join Polymath, and share my knowledge in there.

My name is "Rivaled" other than that known as Vanish.

I specialize my self into the terms of "Hacking", I did code a bit, but I stopped. I normally hang out in

the server stress testing section, or the marketplace. I do make money online, and I know what I am doing. I am a greyhat, and I am able to help anyone out if needed, I ran a DDoSing service on HF along with a partner. I also do have experience with alot of other terms, "Doxing" "Bruteforcing" "Cracking" "SQL's" "XSS's" "C++" "Pentesting" and more. This is limited to 150words, so I honestly did not know what to put. I am also very interested in gaming, I spend around 10+ Hours a day on the computer. If you want further information, please send me a PM.

Hello, I'm Cookie Monster™, but you can call me Justin if you wish.. I suck at applications so here is my best:

I have never applied for any other groups because I felt they were "LQ" and I didn't fit in with the group "theme."

I'm a customer support rep for GGServers so, technically, I do make money online. I'm also an aspiring webmaster. I know HTML, and I'm in the process of learning PHP & CSS. I love computers & servers, ask any one. Sh1eld, I'm not really a fan of you, but I'm willing to put that to the side, and hopefully be good friends.

Thanks for your consideration!

I'm also loving the AI chat(When it is online)

D?vil - April 20, 2014, 12:32 pm

My name is Devil/Jamie, I am 16 (17 in a few weeks). My main interests are game development, marketing and gaming.

I have been making iOS games since the age of 13 when I released my first game and I am now fairly advanced in 2D game development. I will be going to college later this year to study HNC game development. I now focus on helping new developers and am currently in the process of making tutorials for a mentoring program.

The last interest is marketing, I make a fair amount of money online. This started with game development as I discovered new ways to make money with game development other than just releasing games, game development is a growing market and it is great to learn right now, this made me more interested and ever since I have been learning more and investing in new businesses opportunities.

Gaming was the reason I wanted to start game development, I have a strong passion for games. Although I love the big games such is LoL, Battlefield and CoD, I also have a strong interest in smaller indie games.

Justin Timberlake - April 20, 2014, 12:47 pm

I finally made it in time! Why do I want to join Polymath?

Well, I haven't really attempted to join any groups yet, and this would be my first. It really caught my eye because of how popular it became within hours. I'm sure it's a great group if you need to limit recruitments. I've seen a lot of creativity from you guys, and I also enjoyed the radio broadcast.

Okay, more about me: Ever since I joined, I've been looking for ways to help people. I love the feeling when I give something away, so I held giveaways like Xbox live and PayPal. I enjoy gaming, like most people, but I also enjoy learning. I try to help out in the education section and have some discussions in SRPP. I don't specialize in any one area, but rather I try to use my knowledge to help people out to the best of my ability. If anything, I would have to say I can help most with school related things.

Time to go play with the chat bot!

Introduction

Spoiler ([Click to View](#)) Hello!

My name is Dude here on Hackforums, but you can call me Tarjeik or Tar for short. I am 16, turning 17 in just a few weeks.

I have been a member since May 2012, and just recently become active buying L33t and Ub3r with only a month in between.

Tiny bit about myself. Spoiler ([Click to View](#))

My main interests are currently within the fields of investment strategies, gaming, learning C# (just a tiny bit at the moment, will be learning some more soon.) and watching movies and TV-Series (If you need someone to discuss a TV-series with, tell me the name, give me a week and I'll discuss with you).

I spend a lot of time on my computer. During week-days I can spend 5+ hours online, and during weekends even more.

I have been a member of Hackforums since May 2012, as I mentioned in the introduction, but I have just recently become active some months ago due to being busy with school and such.

I am still busy with school but I can say that everything is going just fine even though I don't give a fuck.

Why I think I should be accepted. Spoiler ([Click to View](#))

I am active in a lot of subforums (sections) of the forum, and I am willing to learn whatever seems fitting for me.

I am currently in the beginner phase of learning C# and when I am finished with this I will find something new to learn.

As I mentioned; I spend a lot of time online, and this gives me a lot of time to learn new things.

So to conclude; You should accept me because I am (mostly) high quality throughout the forum, I am a quick learner and I don't easily forget.

- 'Dude

Sorry for going over the 150 character limit, but it's terribly hard to stay under it.

Hope you consider me this time Sh1eld, as I rewrote it entirely.

phybe? Jr. - April 20, 2014, 12:53 pm

I'll keep this short.

I'm Kevin. I'm just a normal HF user.

I think I can bring activity and giveaways to this group. I can host giveaways and freebies in the name of Polymath to help attract publicity.

Feel free to go through my threads. You may need to be in some of the groups I'm in to see some threads.

I post a lot, mostly in the Group SFs.

Thanks for reading it.

I'm Krox, and I'm interested in many subjects; I'm currently studying C, right after PHP and MySQL, and I'll jump to C++ as soon as possible, as well as ASM. I'm also working hard on maths, one of my favorite subjects, along with problem solving in maths and computer science. I usually work with Android, Windows, Linux, and web servers until a few months ago. I can help with web servers, scripts and sites, usually where there's PHP.

I play and I've played many online games, and I do enjoy a lot working with others in a team (out of games, too!). I do sports and enjoy running sometimes. I'm also interested in chess, and I play it a few times every week.

I study many other subjects not so related to computers, mainly because of school.

I'm interested in learning new things, and open to study and to change my views.

Hey, so this will be my 3rd time trying to apply.

I cant help it.. the group is so sexy and I am even more intrigued based on the release of this AI bot.

Personally I believe that I have skills in various topics.

If I had to pick my core skills it would probably be my entrepreneurial mindset and my desire and interest for the future.

I dont know if this correlates, but AI and technology have been an interest of mine for some years now.

Good luck with whatever you guys are trying to accomplish.

Edit* What did you code this in? AIML?

Are you using pandorabots or a chat script?

[img]http://i.minus.com/ivm3a7DWxk3V.gif[/img]

Hello, my name is tdog0403 and welcome to my application. While I don't have too many interests or skills, I tend to be quite well in the few I have. My favorite thing to do, like many teenagers, is playing videogames. I'd like to get into competitive gaming, but I will never gave the time for it. Another thing that interests me is having intellectual discussions and debating. Since I like to debate, writing is a must have skill. I love to write, which can be a use in many situations where others do not. I tend to think of myself as a relatively good writer, but my main problem is verb-tense agreements (I tend to switch the tense of my verbs). Finally, my last interest is programming.

However, due to all the school work I have I haven't had time to pursue programming and develop any knowledge of it.

'Snorlax - April 20, 2014, 3:15 pm

yay..? I don't think anybody got that.

Thornzzz - April 20, 2014, 3:15 pm

Thornzzz's Application.

Name:Will

Age:16

Why do I want to join Polymath? I feel like it's a good group that I can have intellectual discussions and debates with members who will actually take them as serious as me. With doing that, I also wish to learn and to further myself in the group. Sh1eld told me once that I "Don't think before I post." so using this group I hope to fix that problem.

About myself: Well, I like to debate on topics such as Political Parties and Religion. I'm hoping to become a Social Worker for High School students when I become older. Some of my skills are Debating, Helping others with things such as Suicide, Divorce and Relationships and I am a good baker. That's really it about me.

I typed in polymath members.

Renium: Lazy employee

Happeh: 5000 OMC

Nick: 230 OMC

Lani: he is fat

Varosion: swag

Snorlax: not fat. Just big boned

Aura: je m'apelle David

Froggy: hop hop

Vinnie: 5 times serial rapist(lol)

Zymtom: stealth

Stealth: ironic username

420: 420 means love and compassion (maybe something to do with 143, in Farmer Yellow's avatar)

I know a lot of this isn't new, so just think of it as a summary.

There was some more stuff, but I can't remember.

Well I'm going to keep it brief and short because I don't believe much detail is needed to give a brief introduction of myself. I'm a programmer that found haven in learning to create my own applications at nine, through means of coincidence and no external help was ever given to me; let alone my parents barely knew what a programming language was. I mainly focus on application development using C# (.NET framework) and at the moment I am progressively aiming to pickup C++. This group seems decent and I believe I am an individual that you guys could want to know. I'm a pretty dope dude to get along with and great to talk to but I won't be anyones bitch.

Have an extensive knowledge in Computing, Android phones, gaming and computer hardware. I currently study civil engineering, previously studied physics and chemistry. My knowledge is very academic based, and thoroughly enjoy Physics (Quantum, standard and theoretical), Mathematics (calculus, vectors, complex), Chemistry and occasionally Religious studies, Literature and Historical based studies. If accepted, you will not only be inviting a great person to talk to, but also an Academic, one who likes to take in knowledge at the same pace as teaching others. I strive to help, as those who are helped may one day help you. My goal is not a user bar, recognition or respect. Just the personal gratification of passing ones knowledge onto another.

Hello, I'd like to apply for Polymath.

Application:

Spoiler ([Click to View](#))

I believe I have a chance in qualifying for a group which has the tagline 'Polymath is a group of individuals with broad knowledge.'. I was brought up in the kind of family that encourages a pursuit for knowledge and understanding, whether by studying at University or travelling the world to experience other cultures which together make up humanity. I was taught never to take anyone's word for anything, to find things out for myself.

I'm from Scotland and currently I'm studying at University. Although I'm enjoying the course that I'm studying I don't want to know a lot about one subject, I'm much more interested in a broader spectrum of knowledge. Why? Well the answer is simple, I'm a very cheery and positive person which makes me interested in the whole world around me.

P.s I'm great at pub quizzes (not being cocky - challenge me ?)

P.p.s I love nothing more than travelling to new places around the world

Cheers

- Oliver

Hi, I am Dusk (Jay) and this is my application.

I am a 18 year old boy (My birthdays in 2 weeks)

I'm an introverted artist on multiple levels.

I love art, creativity, literature and everything colorful.

I'm an energetic, extremely friendly person, you can ask me anything and I would never shy away. I'm always honest and up front. I could never hurt another person in any manner, I try not to anyway, as no one is perfect.

As I said, I love art and live in that kind of word.

I love my Digital design, my photography (I've completed a course in Design fundamentals and Photography) and my writing, more than most things. I love writing, I'm currently trying to write a

few books at the moment. My favorite genre being apocalyptic, post- apoco and fantasy.

I would also call myself an intellect, straying far from the sheep of the world and living the way I want to, and how I need to. I play chess, I read, I do all sorts of abnormal things. But I'm a quite un-revealing and untrusting person. Although I love friendly people, I love people.

Anywho, I'd really like to join pollymath, simply because I like the userbar, the way you asked us to apply and how my name would be white if I was in a group :) honesty.

Hey there, I would love to get into polymath #ClicheOpening.

You will make the decision of whether I am what you guys need, however, I will just tell you a little about my self.

I am from the UK studying computer science, biology and further mathematics. I run my whole life off of three simple values: Respect, dedication and trust.

I feel very strongly that you need all of these traits in order to do well in life in any situation. Respect others to earn respect. Dedicate yourself in every way humanly possible to everything that you do, no matter how big or small; trust people, have faith in your family, friends and others, understand

that they want the best for you.

I know it is short, its just my values, I am basically saying that I want in.

to "Steal pigs". If it was referring to you it'd be "Steals pigs" and the bot would continue the typed
sentence.
