Zen - April 20, 2014, 6:05 pm

Decided to buy it cuz fuck it, I play LoL and Mashinate is a really good LoL player. Being only Silver 3, I'm always looking to get better.

Let me start by saying, I spend a lot of time trying to get better. Whether it's in game, reading /r/leagueoflegends, watching videos/streams, I usually know my stuff.

I bought the eBook with OMC and received it quite promptly.

And that's when I realized this eBook was different. 60 PAGES. THATS HOW MANY PAGES ARE IN THIS MONSTER OF AN EBOOK. I don't think there's another eBook on HF that can top that.

That said, this isn't 60 pages of filler and BS. This eBook literally covers all the lanes, and the most common champions in each, and specific strategies for each. I skimmed through and I can tell you, this isn't copied pasted from Mobafire or anything like that. This is original, good shit.

I can honestly say this is one of the few purchases I'm satisfied with on HF. Do NOT hesitate to buy this. Simply an amazing buy for the price. GLWS!!!

Back then,ive wasted over 250 dollars buying worthless money making ebooks. Why would people sell an ebook for 20 dollars when you can make '200 dollars a day'. It's obviously to make money for themselves and give a useless method to the buyer. Makes no sense whatsoever.

This isn't money making. These are ways to greatly improve your mechanics,decision making, map awareness, etc..

Pro players and streamers aren't the only players that can give tips and tricks to climb the ladder. Other players that are high up on the ladder can also provide tips and tricks. Do they work? It really depends on the person applying them.

I have always believed eloboosters can teach you more about climbing than pro's.

Simply because they do it as their job, while pro's just stay at high level.

Any vouch from people above Platin???

I've had experience with coaching but the conclusion is always "mass gaming" to improve but I never got told how exactly I can become a consistently good player.

I don't need explanation how to play every role and all these basics. I need to know how I can use every single advantage I got to the maximum crisp of the game.

Just bought package 2

Review:

The e-book is lengthy with it's 60 pages, and has a very accurate description of every role with several champion guides and tips for each of those roles.

Al tough the e-book is spotless and truly worth it i recommend buying at least package 2 since, in my opinion, there should be an extra chapter teaching you how to capitalize and abuse your opponents mistakes.

knowing the writers of this e-book I'm pretty sure they will be very capable in explaining this during the coaching sessions provided.

i'm sure this e-book will prove very helpful for all elo's but mainly for Bronze and silver.

I also shouldn't forget to mention that this might be planned for a future update for the e-book, which you will receive for free once it comes out. (if you bought package 2 or higher)

I currently rate this e-book 8/10

And if the part i suggested would get added this would be at least 9/10

Right now im working on a chapter covering " meta breakers " (SilSol, IncarnatiOn, Apdo)

However, capitalizing on your opponents mistakes is something that is easy to teach via coaching, but we will more than likely do whatever it takes to add a chapter covering this aswell.

Okay, so I bought the book like 3 days ago, I didn't write a feedback when I finished to read it because I want to write a full description of what I think of it. (Sry in advance for my poor english :p)

This book is really big (60 pages) so don't worry about the content, everything's here. I really enjoyed read this book because I learnt a lot (every page are important imo) and with it, you know how you'll play your game before playing it ! So you can focus on many things that you won't without read this e-book.

I was really happy to learn a lot, but I needed to try it IG to see if it really work. And it work, really, really well. I can't carry every game atm cause I need more practice but at least, I played really good every game I did after reading this book !

Buying this is really worth it because pay for a boosting or some coaching is meaningless with this book. You can save money from coaching and do your boost yourself !

Vouch for IWM !

Plenty of these players are Platinum / Diamond. I've never heard of that ebook, sorry.

But regardless, if you are bronze, silver, gold, platinum or diamond for that matter, this ebook will make you IMPROVE.

It's 60 pages worthy of reading content, alongside with a coaching hour.

Just skimmed the ebook after purchasing; here's my honest review.

Grammar: 9/10 ; Nothing noticeable.

Layout: 6/10 ; It could definitely be formatted better for an easier read, however section titles are indicated and it isn't just a brickwall of text.

Information: 8/10 ; As a gold 4 player, I knew roughly 10% of this information prior. Everything else is unique and well-thought.

With 60 pages of content, an hours time of coaching, and sure-to-come updates, this is definitely worth the \$30 I dropped on it. I truly believe this can help any player between Bronze and Platinum elos.

This would fit for every rank in my opinion, however silver players obviously learn more, but considering there's 60 pages and around 45-50 of them are based on laning, and then 15 roughly about general gameplay I definitely think it can help you out.

Thanks!

I know, I am the best EUW player here. ?

This seems really promising as it's from IWM (as I bought a boost from his services before)

Question, is the coaching from the Gold or Diamond coaching supported in NA? If so, I'll probably be back. ?
