Thread: [\[C#\] n0ise Bot Source Leak + Webpanel](#)

JohnWayne - May 13, 2010, 6:41 am

I found this source at some german page.

Google Translator for the win!

I am sure this will be usefull for some of you ;-)

Quote:Das hier ist der Source Leak von n0ise Bot v1.5 inklusive Webpanel!

[quote]Welche Befehle versteht der Bot?

- Syn-Flood, HTTP-Flood, UDP-Flood, ICMP-Flood
- Stealer (Firefox, FileZilla, Windows CD-Keys) (NEW)
- Download and Execute
- Visit Page (NEW)
- Bot Update
- Remove Bot

Welche sonstigen Funktionen hat der Bot?

- Autostart (Unsichtbar)
- Anti Settings (Debugger, Emulator, Monitoring Software, Sniffing Programme, Virtuelle Maschinen)
- Fake Error
- Disable UAC, CMD, Firewall, Registry, Taskmanager (Benachrichtigungen deaktiviert)
- Melt Server
- Delayed Start
- Mutex
- Icon Changer, Icon Extractor, File Pumper, Assembly Changer (Link)

Welche Funktionen hat das Webpanel?

- Sicheres Loginsystem
- Ausführliche Statistiken über die Bots
- Einzigartiges Taskmanagementsystem: Ihr könnt auswählen wie lange bzw. wie oft und von wie vielen Bots ein Befehl ausgeführt werden soll. So könnt ihr euer Botnetz optimal nutzen!

Sonstige Informationen:

Jeder bekommt seine eigene FUD Binary! Dafür gebe ich euch mein Wort!

Der Bot ist in .NET gecodet. Also benötigt jedes Opfer das .NET Framework 2.0 (oder aufwärts).

Das hat jedoch Heut zu Tage jeder installiert, da es seit Windows Vista fest vorinstalliert ist!

Der Bot funktioniert auf allen Windows Betriebssystemen egal ob 32 oder 64 Bit!

As i am German i tried to translate it for you.
I hope my translation is .. not too bad.

Quote:This is the souce leak of n0ise Bot v1.5 inklusive webpanel!

What commands can the bot understand?

- Syn-Flood, HTTP-Flood, UDP-Flood, ICMP-Flood
- Stealer (Firefox, FileZilla, Windows CD-Keys) (NEW)
- Download and Execute
- Visit Page (NEW)
- Bot Update
- Remove Bot

What are some other usefull things you can do with the bot?

- autostart (invisible)
- Anti Settings (Debugger, Emulator, Monitoring Software, Sniffing Programme, Virtuelle Maschinen)
- Fake Error
- Disable UAC, CMD, Firewall, Registry, Taskmanager (message disabled)
- Melt Server
- Delayed Start
- Mutex
- Icon Changer, Icon Extractor, File Pumper, Assembly Changer (Link)

What functions has the Webpanel?

- Save Loginsystem
- detailed statistics about the bot
- unique taskmanaging system: you can choose how long, how often and how many bots shall execute the task. Thats how you can get an optimal use out of your botnet.

other infos:

everybody gets his own FUD Binary! You have my word!

The bot is coded in .NET. So your victims will need .NET Framework.

the Bot works an every operating system (32 and 64 bit)

Can someone including a Socks5 Reverse function?
Than is the Bot very nice...

I use it for a week, no problems with it.
I missed the Socks5 function..

Source Code - August 25, 2011, 5:40 pm

Thanks for the source. It's very nice. C# isn't that great but that's alright.

SIM-701256 - August 26, 2011, 5:36 am

This is awesome, thank you for the release :)

Please, just let this shit die. It has no content at all as all the links are obviously broken, and you replied to a 3 years old comment in a 10 years old thread.
