Hello bud, would love to get a free rdp, lets see what it brings me :)

Thanks and have a nice day !

HelpingOthers - April 21, 2014, 8:49 am

Well I bought a Mac and I can't use this for coding in VB, which I urgently require for coding programme. I will also use this RDP to run programs that help me in PPD. I will not use it for anything blackhat and I can assure you that. Although I can bootcamp on this, It would require a partition on my 256 GB ssd which itself is so small for Mac OS!

I downloaded Microsoft Office for mac and it came with windows remote desktop that can connect to a RDP.

I hope to win 1 RDP :)

I wish everyone good luck!
