Thread: [How do I report individual members for abusive PM's?](#)

Shigbeard - April 20, 2014, 9:20 pm

This user here... <https://hackforums.net/member.php?action=profile&uid=2199719>

He is LQ, and has been abusing me via PM thinking he is top shit here and acting overprivileged as fuck.

Here's a screenshot of the PM.

-snipped-

How would I report this user for abusive behavior via PM, aside from a public name-and-shame?

RDCA - April 20, 2014, 9:26 pm

I wouldn't say that is abusive personally, but you can forward the private message to an Admin if you wish: <https://hackforums.net/showstaff.php>

Also, go to his profile and press 'Add to Ignore List.' Quite honestly, you shouldn't be looking to hurt and argue with remembers. Report him if you're going to and move on. :)

Send a Pm to admit or report it. Don't witch hunt, it's not good ok?

Shigbeard - April 20, 2014, 9:38 pm

Aight I've PM'd Paradoxum about it, I'm hoping this will get resolved.

If you check his posts all his posts scream LQ and "BAN ME NOW IM SHITPOSTING LOUDLY"

iDuL - April 20, 2014, 9:38 pm

I don't think you're allowed to post PM details.
Am I wrong?

Shigbeard - April 20, 2014, 9:45 pm

It doesn't matter, someone has -repped me for sharing it, so if people don't like it I wont do it.

RDCA - April 20, 2014, 9:48 pm

Yeah, you can't post private messages. Also, you might as well cancel your PM. He is going to get banned either way.

too late, its been sent already.

May as well close this thread, the topic has been solved.
