Thread: [\[TUT\] Exploit Cookies With iCloud Rip To Gain Access To FB](#)

lamnotyou0978 - April 21, 2014, 10:53 pm

Hi all,

This is my first tutorial here so bear with me. I have taken screenshots from the guide that I have written up. Please PM me for a copy of it, but you can find it all below.

Requirements:

1. Google Chrome (Browser)
2. Edit This Cookie v1.2.1 (Chrome Extension)
3. E.P.P.B v1.92 Build 1445 or greater (Elcom Phone Password Breaker)
4. Notepad++ (For exploring cookie file)
5. Full Backup of iCloud (Must have access to login credentials and be as recent as 1-2 days or else cookie will be expired)

Step 1

Step 2

Step 3

Step 4

surfnedd - April 24, 2014, 12:28 pm

Great tutorial...Will this work with email accounts?

Thanks

lamnotyou0978 - April 28, 2014, 9:26 pm

Thanks

I've yet to figure out which strings from the cookies work for any other type of login :(

The Outsider - April 28, 2014, 9:57 pm

Great tutorial, perfectly explained, I'd be giving it a shot. Thanks!!

lamnotyou0978 - April 30, 2014, 9:53 pm

Thanks :) I find the cookies only show up with about 25% of the accounts now at most... so for every 5+ icloud rips, you maybe only find like 1 cookie with the strings..

Gilfoyle - April 30, 2014, 9:54 pm

Nice tutorial OP! Thanks for this. I appreciate it.

Wormdummy - May 4, 2014, 8:26 pm

I will try this out! Hopefully it will work

lamnotyou0978 - May 5, 2014, 12:21 pm

Happy hunting my fellow anons! We have got to team up and figure out what the other strings are for cookies

Wormdummy - May 9, 2014, 6:22 pm

Yeah i have tried and only one had the cookie string and it didn't work for some reason :/

yabba - May 14, 2014, 7:43 pm

Nice tutorial, will give it a try today

lamnotyou0978 - May 30, 2014, 3:00 am

I find that almost all of the cookie files under "Application\com.facebook.Facebook\Library\Cookies" are always encrypted (gives crazy characters when opening) And the main cookie file in "\Library\Cookies" Usually only has DATR... I'm puzzled...

lamnotyou0978 - March 15, 2017, 11:33 am

Anyone know how to get this data without having Elcomsoft??

llama77 - March 15, 2017, 5:51 pm

Thanks for the tutorial think I'm going to try this out

ilovedmo - March 15, 2017, 7:49 pm

So this will help me get into accounts without alot of work ?

CryptoLayer - March 16, 2017, 11:00 am

Nice tutorial, will give it a try today

sweanswen - March 22, 2017, 12:02 pm

Thank you for this. Hope i can do it.

lamnotyou0978 - March 22, 2017, 6:42 pm

Unless any of you have the latest version of Elcomsoft Phone Password Breaker, I dont think this is even possible anymore.. If you have it, what kind of luck did you have trying to purchase it? I tried like 4x and it always failed to complete a transaction.. FAIL

evolving61 - March 27, 2017, 3:19 pm

thanks for the awesome tutorial! will try this forsure very soon.

?ictor? - March 27, 2017, 5:07 pm

This was from 2014 FFS, stop posting in this.

lamnotyou0978 - June 19, 2018, 5:15 am

Guys and gals this method still works. Elcomsoft and Jihosoft iPhone Data Recovery downloads iCloud backups with the right files to pull this off!
