Thread: [Free YouLikeHits Premium Bot | 1000+pt/1 hr | Never Crashes - No shitty surveys](#)

Byte™ - April 22, 2014, 12:05 am

I just wanted to release another bot, again I did not make this nor do I take the credits for it. c: So I hope you enjoy like my last one. (I found this so I am giving it out)

Make sure you have Imacros!

These are Imacro scripts!

Spoiler ([Click to View](#)) Please click on the browser you are using.

Bots Included :

1. YouTube Likes (Working)
2. YouTube Subscribers (Working)
3. YouTube Views (Working)
4. Twitter Followers (Next Update)
5. Twitter Tweets (Next Update)
6. Twitter Favorites (Next Update)
7. Twitter Re-Tweets (Next Update)
8. FaceBook Likes (Next Update)
9. Google+ Circles (Next Update)

Instructions :

YouTube Subscribers :

1. Go [URL="http://www.youlikehits.com/ytdetails.php"]here[/URL] and verify that your account meets all the criteria.
2. Hit the 'YouTube Subscribers' button in the main menu, followed by clicking on any one of the 'Subscribe' button till you reach the following screen :

Spoiler ([Click to View](#))

3. Set Loops to 9999 and hit 'Play Loop' (Warning : Do not hit 'Play')

YouTube Likes :

1. Log-in to your YouTube account.
2. Hit the 'YouTube Likes' button in YLH main menu, followed by clicking on an 'Like' button till you reach the following menu :

Spoiler ([Click to View](#))

3. As before, select the number of loops as 9999 and hit 'Play Loop'.

YouTube Views :

1. Click on the 'YouTube Views' button in YouLikeHit's home page.
2. Set loops to 9999 and hit 'Play Loop'.

NOTES/TROUBLESHOOT :

1. I will be releasing the remaining modules as and when I have finished working with them.
2. You can either set loops to 9999 or any desired number.
3. Always hit 'Play Loop' and not the 'Play' button.
4. Sometimes you may end up with the 15 minutes YouTube limit every hour. This is normal. Don't fret. Just wait some time and start the script again.
5. In certain cases, the script may cease to function when it encounters an invalid entry/video as I have not designed it to hit the 'Skip' button. There is nothing to do but manually hitting the skip button.
6. If you are not able to earn points with the YouTube subscribers module, check out the official YLH YouTube FAQ page to troubleshoot errors.
7. If you have any more questions, feel free to post below.

(This is detected as unwanted software, so there is nothing to fear! If you don't trust as always run in Sandboxie c: if the install gives you a file you don't want please PM me and I will help remove it for you. (I bundled it with a PPI network) as my last one also.

Recommended: Turn off your AV before opening the file, certain Av's will pick it up as "Unwanted Software" and remove, as said above because your AV will be turned off, I want you to take full safty if you don't trust me and run in Sandboxie! Cheers and enjoy boting mates!
