Castle - April 22, 2014, 8:01 am

If you don't know what these addons are, they're all paid addons. These addons may also be referred to as Dynasty addons. These addons themselves break blizzards ToS by being paid, I know they're old and have probably been shared before but I'd like to share them here with HF.

You can get viruses from the addons brah, that's how WoW accounts get hacked.

I provided virus scans for all addons, if you don't trust them than don't use them. But I've been using them and have 3 90's.

Ongle5 - April 22, 2014, 5:32 pm

Can anyone vouch? :D Would be awesome to have these

raitom - April 23, 2014, 8:19 am

I downloaded it and tried it. Everything works great, thank you !

Senior Sherlock - April 23, 2014, 9:21 am

Tycoon is just a beefed up auctioneer GUI, that being said, the beefed up ui with the smallest bit of change, is extremely big increase to the addon. Can anybody confirm?

WAFFLES AND CHEESE - April 26, 2014, 2:09 am

besides the fact that this is useless, just take some time to make your own binds and you are fine lol

Castle - May 27, 2014, 3:14 pm

These are still here.. Just saying.

Quest_Master - May 29, 2014, 9:50 am

THANK YOU CASTLE!!! Much love!!!!!!

sweatpants - May 29, 2014, 1:48 pm

Thanks for the addons man. Impulse is quite useful for macros

A virus from an addon? No, I don't think so.

You can get viruses from fake addons which are actually executables but not addons in general.

I can assure you that your accounts theft was NOT due to any addons. You've either installed a keylogger or a RAT and I suggest you visit <https://hackforums.net/forumdisplay.php?fid=115> and make an infected or not thread. ?

Hey, thanks for taking interest in these addons :P

Manacore: The core addon that allows all of the others to be used, also acts as the "GUI" for them all.

Tycoon: This addon when used along with "Auctionator" will suggest the best items to farm/gather by logging competition, and want in YOUR servers market! Oh, did I mention it has paths/locations for every item!

Booster: This is quite like Zygor guides but, it's quite literally just a leveling guide.

Edge: Edge is very useful if you're unsure of what glyphs/talents/stats your current class/specialization is supposed to choose. You just click it open, pick rogue, then choose assassination and it'll tell you the pros/cons of an assassination rogue, the glyphs needed, and the stats.

Impulse: Impulse is an addon that will allow you to choose your hand placement on the keyboard with prearranged keybindings (Not every user will agree with this addons keybinds/be able to find comfortable ones.) Impulse also provides great macros for your class/specialization.

I hope I was able to answer most of your questions about these addons, if not please just ask. ?

Fudster - June 15, 2014, 8:34 am

These addons were pretty useful. then one day it said the addon is outdated. and didnt load. went to the addons panel "enabled out of date addon's and they dont work correctly anymore :/"

Does anyone have the updated addons?

It runs the code silly. Accounts have been hacked before because of bad addons that had DLL files in them or key loggers.

???

It runs a code for the WoW framework, You'll only get hacked if you run an .exe in an addon

???

I did that. I unrared everything than placed files in the add-ons folder but it didn't work. Any possible way to help? Perhaps over Skype?

Make sure theyre enabled via the addons button on character login page. Load outdated as well.

Jerioke - November 20, 2014, 1:06 pm

Have these files been updated to the latest version of the addon so that it is compatible with Warlords of Drenor?

WoW addons are restricted from using or making calls to DLL files by the API that blizzard uses. The API also stops any addons from making calls out to the internet. Therefore, It is not possible to have your account hacked through running a WoW addon. Like it has been said before, if your WoW account gets hacked, it is because of an EXE, keylogger, PUP, something other than an addon that is on your computer.

Zygor guides uses an EXE to update their addon. When it is downloaded from zygor's site, it is safe... downloading from any other site, get rid of the exe and just copy and paste the folders to the game directory.

(Nov 23, 2014 07:18 AM)Castle Wrote: [\[CITE\]](#) I've updated manacore and zygor just now :) TY for that, though I was a little concerned because when I clicked on the links, they said they were uploaded back in like April? But the addons are working again. Thanks.

Edit: Booster seems to not be updated. No guides for WoD and the guides that are there are not loading at all. A Lot of LUA errors. Tycoon seems to be working. Currently in the gathering of data phase, so will have to wait to confirm completely.

Rekk Dan - December 5, 2014, 11:51 am

Tycoon was uploaded in April, is it up to date?

Father Weary - December 14, 2014, 2:05 pm

These drop my fps to 23 from 150.

wot.

Picaboo - December 28, 2014, 3:33 pm

Would be really good to have an update on these as the current Manacore is giving FAR TOO MANY ERRORS!!! :(

Apart from that the Tycoon addon is brill and I use that. :) But it's spamming the shit out of my window. haha

You can get it via Firehawk (<https://www.getfirehawk.com>) or download and install it manually: <https://www.guidesfrom.us/DynastyCore-805.zip>

Moromum - February 25, 2015, 2:13 am

fed1 - February 27, 2015, 2:59 am

TrioxX - February 27, 2015, 3:04 am

There's an updated version of Tycoon (formerly "Tycoon 2"). You can download it here: <http://www.mediafire.com/download/2u52z7l2x5yup3p/Tycoon2.zip>

To use this, you need to delete everything related to Tycoon (DynastyTycoon, DyanstyCore and the other DynastyTycoonContent). Plus, with this new version, you can't use Edge or Impulse anymore, because the Core is updated to another version. Either wait until everything is updated or use this version.

whitewarrior_111 - August 6, 2015, 1:04 pm

Except Impulse Rest are working Please reupload it.
