Thread: [Project - Adfly click bot! V1](#)

BByyyyyyyy - April 26, 2014, 5:12 am

Hello Hackforums!

I am currently working on an Adfly click bot program! Here are some screenshots of the bot:

"Settings" Tab:

"Stats" Tab:

Currently the bot uses proxies from a text file in the format: IP:PORT.

Please give me some feedback and ideas for the bot! Thank you! If you have any questions post here or pm me! I may release V1 soon if you guys like it!

Hackforums - The great, responsive, fast proxy changer (not sure who released it).

Theme - [?eumonic](#) - [Teen Theme](#)

Edit: V1.0 has been released here: <https://hackforums.net/showthread.php?tid=4194801> !

PeopleOfTheEarth - April 26, 2014, 5:33 am

looks nice op gonna try it soon gudluck for it ;)

Zonol - April 26, 2014, 5:34 am

Very nice OP. Keep working on it, I'd like to try this out.

Cairns - April 26, 2014, 5:49 am

999.999.999.999:9999?

Lol may I say anymore?

Yeah? that's the format..... not a real proxy.

Rackzen - April 26, 2014, 6:40 am

Yeah , keep up the good work ! If it works , i can help you getting proxies .. All the days i get both of them !

TheBarret - April 26, 2014, 7:14 am

(Apr 26, 2014 06:15 AM)BByyyyyyyyye Wrote: [\[CITE\]](#) Yeah? that's the format..... not a real proxy. You wish, if that was the general range of the ipv4 then we didn't need ipv6 today smart ass.

If you gonna talk smart, do it right , 0 ~ 255 range only.

Ahhh right, sorry, I was just using those numbers to show how the format is in the text file, ill change it too something else that is easier to understand! Thank you!

trasly - December 23, 2016, 1:40 am

I hope you will fix the bugs.. :(

Why would you revive a 2+ year old thread

Terms Of Service - December 23, 2016, 1:44 am

Lmfao I was legit about to post on this thread and say damn good job and shit but then I realized it was 2 years old.. Trasly tf you doin bumpin threads like this ya dam leecher
