Exactly why I said I do not endorse doing this whole booby signature thing! Lol

incogneat0 - April 30, 2014, 3:09 am

Another method you could try is actually using a sharpie on paper, take a fairly well lit picture, set blend mode to multiply to remove white background then use warp/liquify as needed.

Just another method for ya!

Fantastic video...One realism tip I could offer is pay close attention to the shadows of your image, that way you can use a curves adjustment to match the 'writing' to the rest of the shadow areas :)

Keep up the good work!
