Thread: [Official ddosDev NTP MONLIST Scanner | \\$50 BTC | Only NTP Scanner On The Market](#)

regexks_ - April 27, 2014, 1:17 pm

What is the ddosDev NTP Scanner?

The official ddosDev NTP Scanner is an automated tool designed to fingerprint IP address ranges for over-sized responses using [CVE-2013-5211](#) and log these IP addresses, filtering their response sizes and generating extremely powerful amp lists for use with the official ddosDev NTP attack script.

Features of the scanner:

Select your own ranges to scan

Multi-threaded

Written entirely in C (no dependencies to be installed)

Runs on any Linux 64-bit OS

Optimized to run as fast as possible on 100Mbit, 1Gbit and 10Gbit connections

Why do you need the ddosDev NTP Scanner?

The scanner is invaluable if you maintain your own attack servers. You don't need to buy lists from anyone, they're guaranteed to be private and you'll seem really cool to all your friends :)

Who has the ddosDev NTP Scanner?

This scanner is private and unreleased which means that nobody has it. Only the people that pay for it will be able to take advantage of its features.

How much does the ddosDev NTP Scanner cost?

The scanner is currently selling for \$50 via BTC. You have full rights to sell the lists the scanner produces in your own shop.

You can purchase the software via HF PM.

Scanning from a Digital Ocean VPS:

Updates

v2.0: Scanner analyzes request packet for full size MONLIST response. Also primes NTP servers with multiple spoofed requests automatically to increase MONLIST response size.

Morchid - April 27, 2014, 3:00 pm

I'd just like to wish my friend Regex_KS best of luck on selling ddosDev. It's a great tool and suggest everyone who's interested to buy it.

regexks_ - April 27, 2014, 5:06 pm

NTP MONLIST is still providing massive amplification factors. This scanner is the only one of its kind available on the Hack Forums market and is almost essential if you run a booter or stresser tool.

Wait isnt ntp dead? And would this kick chargen out of the water?

?????Thr????? - April 27, 2014, 5:41 pm

I'd love to mention that your script's entire base is ripped. Don't lie because you know it's true. </3

Looks like you're closed!

I'd like some constructive feedback here :)

It's definitely not dead. It would kick CHARGEN in the ass!

I Am JT - April 28, 2014, 2:02 am

Vouch for my boy Reg, This will indeed make you look cooler to your friends. Especially if they are from Peru.

regexks_ - April 28, 2014, 9:06 am

I've gotten a lot of PM's regarding the product asking for more information :) looks like the scanner may be taking hold soon!

regexks_ - May 1, 2014, 6:30 pm

Scanner still for sale. Contact me for purchase.

Soccer - May 3, 2014, 7:11 pm

Vouch for my mate regex here, very hq member of the teamspeak.

regexks_ - May 6, 2014, 7:50 am

Updates made to the scanner increasing efficiency during scans on 1Gbps network connections.

Nachoss - May 16, 2014, 5:38 pm

Would you be willing to take Paypal for my purchase? Or do you ONLY accept BCT?

regexks_ - May 19, 2014, 6:00 pm
