Blackout HTTP Bot

Coded by: EXECUTION

If you'd like to order [click here](#)

Blackout v1.0 - About the Bot |

Blackout is coded in VB6 Which means it requires no dependencies to run. It is developed for those who want to be able to pick and choose between different features. Because of Blackout having no dependencies you can expect good install rates on all systems.

Blackout v1.0 - How modules work |

When you buy Blackout you will be able to buy add-on packs of plugins. When Blackout has installed itself on a system it will connect to the c&c and check for available plugins. If there is any it will download them and run them in memory. This means plugins will not need to be crypted. Blackout comes with a loader module also. This is to ensure maximum execution rate. The loader module is only 24Kb smalls and makes for amazing execution rates.

Blackout v1.0 - Core Features |

-
- Anti UAC Disables UAC
 - Hide File Hides the file from file explorer
 - Autorun Automatically runs the file on system bot

- Anti sandboxCW Sandbox

Sunbelt Sandbox

Norman Sandbox

Sandboxie

Anubis

- Anti VMWM Ware

Virtual Box

- Anti Sniffer (bot will not connect when any of the below sniffers are active on the bot.

Wireshark

Cain & Abel

- Download and Execute a file in memory. File can be detected and it will still run without any detections in most cases.

- Download and execute. This drops the file in the bot directory and runs it.

- Update removes Blackout on execution of newly downloaded file.

- Reboot bot with immediate effect.

- Sleep until reboot

- Kill removes the bot

Blackout v1.0 - Plugins |

- Browser stealer Steals logins from Chrome, FF, IE, Safari and Opera

- Adlink clicker Works with Adfly, CoinUrl and Link-Bucks links. Also comes with website visitor feature.

- DDosUDP

HTTP

Syn

- FTP Logger Logs all ftp connections and sends Login info to panel.

- Keylogger Logs window titles and buttons. Ability to select what windows gets logged will be added in future updates.

- Persistence provides both File and process persistence.

Other Information |

Hosting Information

This was coded and tested using ZPanel. We recommend ZPanel for it's ease of use.

It automatically installs all dependencies required for the webpanel. If you decide too not use ZPanel you can manually install the following.Apache/Nginx

PHP 5+

MySQL

-Bin size is 124kb. This Is the main bot. We recommend you spread the Loader module though which is only 24Kb

-We cannot currently vouch for any crypters. If you own a crypter and would like it tested with Blackout contact me by pm.

You will be featured on our thread if your crypter is found to be compatible.

Pricing and Contact |

-Blackout Core + Loader + DDos and Persistence modules 30\$

-Browser Stealer 5\$

-Ad Clicker/Website visitor 10\$

-FTP Grabber 10\$

-Keylogger 5\$

-Rootkit 20\$

-Core+all plugins 60\$

-All plugins+Builder 100\$

- More plugins are being added so keep checking the thread.

-We currently accept BTC/LTC and PM

-You may also contact me via Jabber: yugurt@exploit.im

-If I contact you from anywhere other than the above address or HF PM, verify that it is me.

~Arcane ?Thanks for the vouch :)

And no not that terribly confused with the amount of builders we are selling.

Cakeb\$\$\$ - April 29, 2014, 1:04 pm

The new patch to remove the ocx error is in bug testing. If you bought a builder you will be sent a new copy as soon as it is done. Please don't pm me for your builder.

If you bought a bin please message me to receive a updated bin. I will announce when the update is out.

Cakeb\$\$\$ - April 30, 2014, 2:26 pm

Update will take longer then expected. Lots of unexpected bugs found during testing.

Cakeb\$\$\$ - May 3, 2014, 4:50 am

Update is out. I have sent out updated builders to everyone who bought them.

If you require a updated bin send me a message and i will get right on it.

Hey yugurt

I have test

the ocx error is fixed

Thank

I vouch for Blackout HTTP!!!!!!

wieland - May 4, 2014, 4:18 am

this looks quite good, does anybody tried the rootkit yet? How is the stability of the bot? Greetings

Kuky - May 4, 2014, 4:21 am

Does the ad clicker plugin use http/s refers to prevent a click becoming invalidated due to suspicious

behaviour?

xuNsh1ne - May 5, 2014, 4:33 am

Hi,

Which hosts are you using with Blackout HTTP?

Regards,

sure it uses referrers, otherwise your account would be banned after just a few clicks.

It's 60\$ for the pack with 1 bin with all the modules. And ofcourse that includes the webpanel.

Looking forward to dealing with you. ?

Reticulum - May 7, 2014, 11:22 pm

Are their any reviews of this? It looks very good however I'd like to be reassured before purchasing.

To be completely clear with you.
Some customers have contacted me with issues and we are currently looking into them.

Cakeb\$\$\$ - May 9, 2014, 4:41 pm

We will no longer be setting up panels for free. If you find a bug or have issues we will happily help but we won't hold your hand through the whole process.

From now on if you want your panel setup for you on your hosting it will be 25\$ extra.

john12 - May 10, 2014, 10:04 am

I want to vouch for Blackout. Very high execution rate and everything works like promised.

h u l k - May 10, 2014, 12:29 pm

30\$ for the core package.

20\$ for the rootkit module.

I do no longer sell blackout HTTP

I will be offering support until a new seller is found.
