Spoiler ([Click to View](#))

Hi!

I had a Free Crypt Service before. You can see it here:

<https://hackforums.net/showthread.php?tid=4197719>

I have crypted more than 400 Stub's from people of my previous Crypt service thread.
I provide this service so I can help others. This will make it a lot easier to spread.

Free Crypt Service means that I will crypt your stub (Virus) for FREE.

You don't not have to pay anything.

You also don't need to buy a crypter or whatever because I will crypt it for you for FREE!

A Crypter is software that makes your Stub (Virus) Undetected for AV's (Anti Virus Scanners)..
This will make it a lot easier for you to spread your Stub!

I Crypt everything with my own Crypter coded in C++.

My Crypter support crypting on almost all RATs, Keyloggers and BOTs etc.

Spoiler ([Click to View](#))

Unfortunately you need to meet some Requirements before I will Crypt your Stub.

I'm doing this so it will be longer FUD.

Don't send me a PM or add me on Skype if you don't meet the Requirements! I will check your account before I Crypt your stub!

When people are still scanning it on virustotal or any kind of that scanners and not on <http://fuckingscan.me/> or <http://razorscanner.com/> I will raise the Requirements! So please don't do that.

The Requirements

- Minimal 10 Posts
- Minimal 1 Reputation points

If you don't meet any of the Requirements..
I will not Crypt your Stub, Sorry.

Spoiler ([Click to View](#))

Before I Crypt your Stub. You need to promise me one thing!

Never, never, never scan it on Virustotal or any kind of that shitty Virusscanners. This will destroy your Stub (Virus). And it will make the crypter not FUD anymore.

I have 2 options for you where it is safe to scan your Stub (Virus).

Please listen to me and scan it only with this Two Scanners:

RazorScanner: <http://fuckingscan.me/>

F*cking Scan Me: <http://razorscanner.com/>

You need to promise me this otherwise I will also not Crypt your Stub (Virus).

If you promise me this and you are still scanning your stub with Virustotal or that kind of scanners, I will never Crypt something again for you!

Upload your Stub on my Online Storage

Don't upload it on mediafire or whatever because this will destroy your stub!

Upload it on my Website Storage here:

<http://blacklabel.gs/storage/>

Spoiler ([Click to View](#))

I have a few Features added in my New Crypter.

Unfortunately it's not as much in my previous Crypter.

The Features you can choose are:

- Persistence

The persistence option makes the Crypted file harder from becoming killed by Botkillers.

- Hide File

This will Hide your stub (Virus) in the computer of your victim.

This will make it a lot more difficult to find your stub back.

- Delay Execution

Tell me here how many seconds you want before it will open up.

- Anti VM

This will disable the Virtual Machine and Sandboxie.

- Icon

I can change the icon of your Stub. Send me also the Icon you want.

Maybe there will be more Features in the Future.

But for now this are the Features you can choose from!

Spoiler [\(Click to View\)](#)

Alright if you meet the requirements I will Crypt your Stub.

First of all you can send me a [Private Message](#) or add me on [Skype](#)

 <http://hatscripts.com/addskype.png?u=BlacklabelTM&c=black> 

If you want to use this service you need to fill in the Following:

HF Name:

(Your Hackforums name + Link to your HF Profile)

Total Posts:

(Your Total Posts)

Reputation:

(What's your Reputation)

Agreement:

(Say That you promise only to scan it with

(<http://fuckingscan.me/>) or (<http://razorscanner.com/>).

Features:

(Which Features do you want, See the Features above!)

Download link:

(Add your stub and the Icon you want to a WINRAR Archive.

After that Upload the RAR or ZIP archive here: <http://blacklabel.gs/storage/> and give me the link.)

You can send this form to me by a [Private Message](#) or [Skype](#).

Hey mate I'm willing to pay BTC for your service could you private message me?

Brado - May 23, 2014, 2:34 am

I'm now at work, i will PM all the others tonight!

Christiansis420 - May 23, 2014, 8:09 am

I just wanted to say thanks for being so kind.

I have been so intrigued about the whole RAT process and after countless hours of trial and error I finally got a successful server.

If I ever meet your requirements, I will return and hopefully you can assist me. Need more good people like you on this planet.
