Thread: [Hash Identifier Awesome Program](#)

Eminem? - April 27, 2014, 6:46 pm

Hey guys,

I've had this program for a while now it's always worked great.

You paste the hash and it tells you what kind of hash it is.

I always run this in Sandbox because I'm not sure if it's infected, I don't remember where I got it from.

I recommend running it in Sandbox.

It's a great tool though, here's the download link:

Download:

http://www.mediafire.com/download/jwie5upe4004z70/Hash_Identifier.exe

Good luck!

Post a virus scan whenever you post a download link.

<https://www.virustotal.com/en/file/7bcb607ac522ee3660c1b3cefc74224b10883aee3ebfb5ac8dcb657d078da1be/analysis/1398650230/>

Also, I use this script: <http://code.google.com/p/hash-identifier/>

It works just fine and its open source.

And there's always web based ones like: http://www.onlinehashcrack.com/hash_identification.php

Looks to me like it's false positives.

And yeah the script can work but I like the program better.

Yeah, from what i can tell that program seems legit. Bit big though, not sure why its >1mb. But it ran fine in sandbox and didnt make any calls/connections out to anywhere so it looks clean to me.
