Thread: [Crime24 Stealer bad Logs](#)

**idontmind1337** - April 28, 2014, 5:36 am

I wanted to ask you guys why i only get logs with Windows and Internet Explorer Keys instead of real passwords of facebook twitter and all this stuff  
Sometimes it only looks like that:

Date/Time: 4/27/2014 4:45:27 PM  
PC Name: XXXXXXXX  
Windows Version: XXXXXXXX

what should i do against that  
sry im new on this side  
Peace out :D

Maybe the stealer has no features to steal from Chrome, Firefox etc. Think also it steals only password's that are saved.

That stealer is pretty old, so it won't work on new web browser versions.

**idontmind1337** - April 28, 2014, 8:55 am

Would you tell me then which stealer should i use?

**Brado** - April 28, 2014, 9:00 am

You mean you want a keylogger or rat tool..?

**idontmind1337** - April 28, 2014, 9:42 am

A Stealer which is similar to a keylogger but i just want the passwords and not all the incoming typed stuff  
and it would be cool to use one without php panel because im literally to stupid to set it up  
a tutorial would be cool also  
:D

check my threads and use antiav stealer coded by slwestr , it works with all browsers and steals many things , you will not be disapointed with it :)

best regards

Almost every keylogger has the feature to send the logs to your email. You dont have to setup anything it will be all send to your email.

thank you guys you helped me a lot  
and i know that nearly every steal has this feature but i wanted one which is easy to use and

freeware

and of course i want to use filzilla and not any email address

blacklabel i entered the email address of your homepage on netflix but i said i have to wait until it's useable in my country what am i doing wrong? i don't want to make any mistakes so don't judge me pls
