I know that, but that wasn't what the issue was.

You have to agree to the terms and conditions before registering. You cannot view the terms and

conditions unless you're logged in.

So you cannot read the terms and conditions that you're agreeing to prior to registering as you have to be logged in to view them. This has nothing to do with buying services, it's about the registration process.

Yes I have tested this on window XP and it works.

llikebeans - May 23, 2014, 3:27 pm

I was a bit in doubt after I purchased, when I saw you could only have 1 port at a time forwarded, but holy shit the speeds are amazing, I originally have a 60/60 connection, and this is the result on the VPN :D

Speedtest [\(Click to View\)\[img\]http://www.speedtest.net/result/3519465273.png\[/img\]](#)

However Tom, I hope that in the future could at least exceed the limit to 3 ports pr user :)

Nonetheless; I recommend this VPN to anyone who needs a stable, superfast vpn!

***** JIT Debugging *****

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

EDIT: I paid just some minutes ago and I bought the trial version for 7 days. As soon as I load the program the error comes up.

Kind of disappointed.

Doubt you will, but maybe like add it where trusted members who are known for not charging back and shit could refund there money if you know what I mean, like you could do it where we have to message for a refund and you would check through all our kind of threads and threads about us, and if we have anything bad related, for example scam reports or charge back reports you could put them on a black list for not allowing a charge back option. and Just do it manually

On pingdom, we only have 15 minutes downtime from nearly a week ago ,and so the reason you chargebacked because it is down is a lie.

You chargebacked 1 hour after purchase. You basically bought it, use it for 1 hour then chargebacked.

Vouch!

A bit off-topic, but I think it's so funny that in the GUI it says "Instant - Fast" and then upside down "Simple". It was annoying to read 'Simple'. Which genius came with that idea hahaha?

Seb123 - June 7, 2014, 4:09 pm

Just a few questions (:

1. How fast can I surf the internet with this vpn ? I mean does anything like youtube and stuff has to

load for 5 to 20 seconds ? Or is it just as fast as usual ?

2. If I buy the Business version , on how many computers can I run it ? It should run on 2 pc's simultaneously :-)

We have 10gbps servers which depending on your location should be just as fast. Yes you can run it on two pcs if needed however you need to open a ticket before.

We have staff for that. He responded on the thread, the tech staff won't be able to see it, as he only works on the website.

ZAX - June 9, 2014, 11:01 am

I have brought a month of this VPN and I must say that I'm satisfied! The client has a very nice interface and of course a grate connection.

Now i'm just waiting to get my port opened up. Vouch for this grate product, I will definitely be purchasing more of this in the future!

I don't think we are. We state what our prices start from. Thanks for your feedback though.

Don't get you HF sellers, I've seen this with similar services. Yet they don't email market it's like pointless. So if your doing this you'd at least better be doing email marketing otherwise I don't know why you'd hide your prices.

Don't worry about our potential sales. We have buyers coming from all "previous" vpn services on here, and some prefer a solid service over what they have to pay.

I don't know why you are acting like we are doing something wrong.

If you don't like it, don't buy it. This is same to everyone else.

It is not like we want HF buyers money that bad. We have been providing a money back option since day one.

Yes you're such an expert because you run a vpn. No offence but you're acting like a dick and why would we take advice from you ?
