Thread: [\[Promote OMC!\]OmniCoin Forum/Blog Signature \[Value in USD + Number Of Coins\]](#)

Isildur - April 29, 2014, 4:58 am

Hello there,

I just made an OmniCoin Signature that shows live values of:

-> Number of Available Coins

-> Value in USD per Coin

[img]http://mattsmines.net/OMC/sig.php[/img]

If you can make a better background, PM me with your background & I will add it ;)

You can use it on a forum directly by:

1. BBCode:

Code [url=http://yoururl.com/][img]http://mattsmines.net/OMC/sig.php[/img]][/url]2. HTML

Code

Credits:

@Isildur: Author

@Matt: Signature Hoster

@Matt: API

Note:

Don't use it on HF, for someone told that it's disallowed.

If you would like to host it on your own server, PM me.

I saw this idea and thought it was great. Really awesome idea to make a signature with live stats :)

Hopefully this can be upgraded in the future to show all sorts of magical stats ;)

Isildur - April 29, 2014, 5:16 am

Yes I will upgrade it soon with the ability to choose backgrounds of different colors ;)

I will update it to use Matt's API directly so that it does not take much time to load.

VirusTotal - April 29, 2014, 5:24 am

Wow! That's a brilliant idea dude!!! Congratulations!

Isildur - April 29, 2014, 6:11 am

Thanks @Virustotal :)

Will surely upgrade it & add more cool features.

Magicmann - April 29, 2014, 6:21 am

Whoever told you it is disallowed is correct. Dynamic signatures of any kind are not allowed to be used on HackForums.

On a side note, can I get the script for this?

Isildur - April 29, 2014, 6:31 am

@MagicMan,

yes you can have it.

Do you mind telling me, what is it you need it for?

I will send it ASAP (I am not home currently).

If I forget, just PM me to remind me.

I'm interested in seeing how it works. Want to see the back-end stuff so I can make my own script that will pull information from a game server I run. Plus, I'm too lazy to Google for scripts that already do what I need.

I have PMed you the script.

Sorry guys, the API is down... so you gotta wait unless its up again.
