

Forum:[Hack Forums](#)

Thread: [\[MarketPlace\] Deal Disputes + Rep Count + Trust Scan in Postbit](#)

King of Hearts - April 29, 2014, 8:10 pm

What Does It Do?

When you open a thread in the marketplace, this userscript checks to see if any poster has open deal disputes. You can also click on the link to see the deal dispute. This script also checks a users reputation and tells you how many negative and neutral feedbacks the user has (amount not value). It also searches the first page of the feedback and looks for words such as 'scam, shady, liar, caution' and lets you know if those are mentioned. Last but not least, a trust scan link is placed for ease of access.

Example:

Gif: Spoiler [\(Click to View\)](#)

[Download it here.](#)

Installation Instructions [\(Click to View\)](#) You will need to install a script manager :For Firefox, use [GreaseMonkey](#).

For Chrome, use [TamperMonkey](#).

Then, just go [here](#) and click on "Install this script", and then on "Install".

If you want to review the source, just click on "See the source of the script".

P.S Thanks [Hash G.](#) for the instructions template :)

At the moment, this userscript only searches [Hack Forum's Deal Dispute Database](#). Please do not rely on this to check for scams. I will not be responsible if you are scammed and this userscript showed that the user had no scam reports.

This is my first user script and my JS/JQuery skills are a bit rusty, so feel free to critique the code. Feel free to thank me anyway you can. Even if it's by just keeping this thread alive.

Changelog:

Spoiler [\(Click to View\)](#) 0.1: Plugin released as beta to test for bugs.

1.0: Major jump. User script much more stable, various bugs fixed. Ability to click deal dispute and go there added.

1.1: Fixed two bugs.

1.2: This script also checks a users reputation and tells you how many negative and neutral feedbacks the user has (amount not value). It also searches the first page of the feedback and looks for words such as 'scam, shady, liar, caution' and lets you know if those are mentioned. Last but not least, a trust scan link is placed for ease of access.

Loomaanaatii - April 29, 2014, 8:18 pm

Very very nice userscript right there. Just added it to my chrom3!

i?irXa™ - April 29, 2014, 8:22 pm

Wow this is very nice. Now I just need to figure out how to add it to chrome as i'm half retarded and have an IQ lower then 5

ComponY - April 29, 2014, 8:24 pm

I've never really used custom scripts, but I might start. Maybe even make my own.

King of Hearts - April 29, 2014, 8:26 pm

(Apr 29, 2014 08:22 PM)Paradox?? Wrote: [\[CITE\]](#) Wow this is very nice. Now I just need to figure out how to add it to chrome as i'm half retarded and have an IQ lower then 5

Do you have tampermonkey installed? If so, click on the small box on the toolbar and click add new script.

(Apr 29, 2014 08:24 PM)ComponY Wrote: [\[CITE\]](#) I've never really used custom scripts, but I might start. Maybe even make my own.

Me neither. I made this for someone who posted in the suggestions saying he needed something like this.

ComponY - April 29, 2014, 8:29 pm

(Apr 29, 2014 08:26 PM)King of Hearts Wrote: [\[CITE\]](#) Me neither. I made this for someone who posted in the suggestions saying he needed something like this.

So I installed the script, and have yet to see anything on the postbit. I'll try to keep playing around with it. I'm sure it's just a switch on/off configuration I'm missing here.

EDIT: That's exactly what it was. Got it to work, thank you.

i?irXa™ - April 29, 2014, 8:30 pm

(Apr 29, 2014 08:29 PM)ComponY Wrote: [\[CITE\]](#) So I installed the script, and have yet to see anything on the postbit. I'll try to keep playing around with it. I'm sure it's just a switch on/off configuration I'm missing here.

I'm having the same issue. It worked on the first page I went to and now it doesn't work again. Like I said my IQ is around 5.

ComponY - April 29, 2014, 8:32 pm

(Apr 29, 2014 08:30 PM)Paradox?? Wrote: [\[CITE\]](#) I'm having the same issue. It worked on the first page I went to and now it doesn't work again. Like I said my IQ is around 5.

Click the TamperMonkey tool in the top right of Chrome. After that, make sure that you see a green check mark and with it "Enabled". From there, make sure that the script is fully copied and on your TamperMonkey. Last, go to the Marketplace, and try to view a thread. Should work from there.

The reason why:

```
Code if(x[1].innerHTML == "Marketplace"){
```

i?irXa™ - April 29, 2014, 8:34 pm

Ah thank you. I was very lucky and when I clicked a random thread it was a market place thread.
Great script 10/10 would bang

ComponY - April 29, 2014, 8:36 pm

(Apr 29, 2014 08:34 PM)Paradox?? Wrote: [\[CITE\]](#) Ah thank you. I was very lucky and when I clicked a random thread it was a market place thread.

Great script 10/10 would bang

No problem. Basically any page that contains "Marketplace" and has a post-bit, should show the tool.

Thanks again for this script, I'll be using this and more as well.

Dickleson - April 29, 2014, 8:38 pm

this is nice, even if I don't deal much on HF :p

One problem I have found.

it shows an incorrect number of disputes under a name as found in this post of mine

<https://hackforums.net/showthread.php?tid=4201268&pid=39799958#pid39799958>

Fatboy Slim - May 1, 2014, 4:03 am

Would be nice if you clicked the deal disputes : number it would actually go to search the username in the Dispute DB.

Anyways thanks for this release.

SIM-1729678 - May 1, 2014, 4:07 am

userscripts.org is online again, would be great if you post it there!

Fatboy Slim - May 1, 2014, 4:11 am

(May 1, 2014 04:07 AM)ScreemS Wrote: [\[CITE\]](#) userscripts.org is online again, would be great if you post it there!

<http://userscripts.org/scripts/show/486153>

OP, if you want me to remove it, PM me.

King of Clubs - May 1, 2014, 10:10 am

Nice scrips but it doesn't appear to be working for me on google chrome.

King of Hearts - May 1, 2014, 2:48 pm

(Apr 29, 2014 08:38 PM)vdub Wrote: [\[CITE\]](#) this is nice, even if I don't deal much on HF :p

<https://hackforums.net/showthread.php?tid=4201268&pid=39799958#pid39799958>

I'm not sure what you mean. He has one deal dispute and that's what it shows.

@Fatboy Slim, I'll add that to the next version. If you could remove the userscripts link that'd be great. I've updated the OP.

@-Webb: The script only works in the marketplace. Have you opened a thread in the marketplace?

I'm working on a way to decrease the amount of requests this sends the server.

Fatboy Slim - May 1, 2014, 3:34 pm

Removed it.

It's true what the other guy says it shows 1 when he has 4.

King of Hearts - May 1, 2014, 3:38 pm

(May 1, 2014 03:34 PM)Fatboy Slim Wrote: [\[CITE\]](#) Removed it.

It's true what the other guy says it shows 1 when he has 4.

Thanks. Yes he has more than 1. However, only 1 was reported to /disputedb.php which is HF's Deal Dispute Database (where I get number of disputes).

(May 1, 2014 04:03 AM)Fatboy Slim Wrote: [\[CITE\]](#) Would be nice if you clicked the deal disputes : number it would actually go to search the username in the Dispute DB.

Anyways thanks for this release.

I've added this feature.

Spoiler [\(Click to View\)](#)

King of Hearts - May 1, 2014, 9:53 pm

(May 1, 2014 09:25 PM)xadamxk Wrote: [\[CITE\]](#) I like this, good idea mate xD

But since the database isn't completely updated, consider this idea :3

A lot of people don't get a scam report, instead neg. rep saying scammer with a link. Maybe extend this to search their neg rep, and come back with results?

I know that would use a number of resources, but would be fully useful xD

That's a good idea. If there are no reports in the db, I'll search the neg rep for words like scammer, beware, etc and then I'll link to the rep instead.

SHADOW REALM - May 2, 2014, 5:24 pm

```
"function getScams(user){  
    var data = null;  
    $.ajax({  
        type: "POST",  
        async: false,
```

```
url: "disputedb.php",
data: {
  username: user,
  action: "do_search",
  submit: "search",
  my_post_key: document.documentElement.innerHTML.split('my_post_key =')[1].split(';')[0]
}
```

Omni doesn't like automated scripts going through the site, I'm pretty sure if you just linked it though it would be fine. Like without it actually going through the DisputeDB

King of Hearts - May 2, 2014, 5:26 pm

It's really not that automated. You consent to the search. There are userscripts which do similar things. As for linking it, it isn't a GET setup. I'd have to automate a post request, search and replace html with returned result (which is what I am doing atm).

Dickleson - May 2, 2014, 5:28 pm

(May 1, 2014 02:48 PM)King of Hearts Wrote: [\[CITE\]](#) I'm not sure what you mean. He has one deal dispute and that's what it shows.

King of Hearts - May 2, 2014, 5:30 pm

(May 2, 2014 05:28 PM)vdub Wrote: [\[CITE\]](#)

he has like 4?

As I said they aren't reported. Also to reply to your search suggestion: You'd have to wait 30 seconds between each search. Imagine opening a thread and wanting to see a dispute only to wait for .5min/post*10 posts = 5 minutes for the thread to load.

Squidward - May 2, 2014, 5:31 pm

Hmm, this is only for deal dispute DB entires, right?

King of Hearts - May 2, 2014, 5:33 pm

(May 2, 2014 05:31 PM)Squidward Wrote: [\[CITE\]](#) Hmm, this is only for deal dispute DB entires, right? At the moment yes. I'll work on a negative rep check later on also.

Dickleson - May 2, 2014, 5:33 pm

Anyway you can scrape the D&D section 24 hourly using some sort of script and store UID's on a db that automatically counts the number of times a id is referenced in a title and then display the amount of times below a users name by matching it on db.

King of Hearts - May 2, 2014, 5:37 pm

(May 2, 2014 05:37 PM)King of Hearts Wrote: [\[CITE\]](#) Without being IP Blocked by omni? No. The best thing is to promote the use of /disputedb.php

Any way people can promote it more than it already is?

milkywaythegodfather - May 2, 2014, 5:45 pm

I was thinking about requesting that you add that it searches HF for their UID in a thread but then I realized that you can only do 1 search per 25 seconds so it wouldn't be very efficient.

Nice userscript either way!

\

I think I found an error.

On <https://hackforums.net/showthread.php?tid=4174507>

he has one deal dispute but when you click on it, it shows nothing.

King of Hearts - May 2, 2014, 6:35 pm

he has one deal dispute but when you click on it, it shows nothing.

Sorry about that. I've fixed it. It was a simple encoding error. I've also fixed another bug where if there was a post by a closed account, it wouldn't show.

King of Hearts - May 15, 2014, 3:03 pm

I've been pmed that Userscripts has had a lot of downtime recently.

Here's the script:

PHP Code

<?php

// ==UserScript==

// @name Deal Dispute on Postbit

```
// @namespace http://codeinstitution.net/DealDisputePostbit
// @version 1.0
// @description Deal Disputes will be shown on postbit
// @require http://ajax.googleapis.com/ajax/libs/jquery/1.8.2/jquery.min.js
// @include *hackforums.net/*
// @copyright 2014+, Saad T (King of Hearts)
// ==/UserScript==
```

```
URL = window.location.href;
if(URL.indexOf("hackforums.net/showthread.php") > -1){
    var x = document.querySelectorAll('.navigation > a');
    if(x[1].innerHTML == "Marketplace"){
        injectjs();
        posts = $("#posts").find("td[class='post_author']");
        authorInfo = $("#posts").find("td[class='smalltext post_author_info']");
        var l = posts.length;
        for(var i = 0; i < l; i++){
            username = $(posts[i]).find(".largetext");
            var res = username[0].innerHTML.match(/<a href="(.)"><span class="(.)">(.)</span>/);
            usernameN = res[3];
            authorInfo[i].innerHTML += '<br /><div id="dealdispute'+i+'
"><a href="javascript:void(0)" onclick="document.getElementById(\'dealdispute'+i+'
\').innerHTML = getScams(\''+usernameN+'\');">Check for Deal Disputes</a>';
            //getScams(usernameN);
        }
    }
}
else if(URL.indexOf("hackforums.net/disputedb.php?user=") > -1){
    var user = URL.split("?user=")[1];
    document.body.outerHTML = /<body.*?>([\s\S]*)</body>/.exec(getScams(user))[1];
}
}
```

```
function getScams(user){
    var data = null;
    $.ajax({
        type: "POST",
        async: false,
        url: "disputedb.php",
        data: {
            username:user,
            action: "do_search",
            submit: "search",
            my_post_key:document.documentElement.innerHTML.split('my_post_key = "')[1].split('"')[0]
        }
    }).done(function( dataR ) {
        data = dataR;
    });
    return data;
}

function injectjs() {
    $('<script type="text/javascript" src="http://ajax.googleapis.com/ajax/libs/jquery/1.8.2/jquery.min.js
" /><script type="text/javascript">'+ 'function getScams(user){var data = null; $.ajax({ type: "PO
ST", async: false, url: "disputedb.php", data: { username:user, action: "do_searc
```

```
h",      submit: "search",      my_post_key:document.documentElement.innerHTML.split("my_
post_key = \\\")[1].split("\\;")[0]  })).done(function(dataR) {  data = dataR;  }); if(data.indexOf("

data).find('table:eq(1)').find('td');var count = 0;  for(var i = 5; i < tds.length; i+=5){  if($(tds).eq(
i + 5).text() == "Open" &&$(tds).eq(i + 3).text() == user){      count++;  }  }if(count == 0){retur
n "Deal Disputes: <span style=\\\"color:green\\\">None</span>";}else {return "Deal Disputes: <span st
yle=\\\"color:red\\\"><a href=\\\"/disputedb.php?user="+user+"\\\">"+count + "</a></span>";}}' + '</script
>').appendTo($('head'));
}
```

-zYMTOM - May 20, 2014, 2:30 pm

Great tool by this fellow member. Thanks for the share.

Vitamin Energy - May 20, 2014, 3:03 pm

That is actually pretty great :)

Keep up the good work buddy :)

A Powerade - May 21, 2014, 7:11 am

Nice userscript! This might come in handy when I do Marketplace things.

King of Hearts - July 31, 2015, 8:31 pm

(May 22, 2014 12:54 PM)xadamxk Wrote: [\[CITE\]](#) Any progress on this implementation?

So a year and a bit over I found this userscript on my old laptop. Anyways, I've decided to update it a bit.

I've made the following changes:

Quote:This script now also checks a users reputation and tells you how many negative and neutral feedbacks the user has (amount not value). It also searches the first page of the feedback and looks for words such as 'scam, shady, liar, caution' and lets you know if those are mentioned. Last but not least, a trust scan link is placed for ease of access.

I've also reuploaded it here: <https://greasyfork.org/en/scripts/11359-deal-dispute-on-postbit>

Please let me know of any bugs and such.

Thanks,
KoH

King of Hearts - August 2, 2015, 5:37 pm

(Aug 2, 2015 05:20 PM)xadamxk Wrote: [\[CITE\]](#) How have I never seen this script before? xD
It's pretty cool.

You have, look at the second post above yours :P

I just grave dug and updated it.?

Hash G. - August 3, 2015, 3:23 pm

This userscript is literally gold. Great job!

Edit: But the link in the OP is broken.

King of Hearts - August 3, 2015, 3:44 pm

Thanks,
KoH

Eternal. - August 31, 2015, 10:47 am

This looks awesome, will be using it from now on. Thank you!

King of Hearts - September 7, 2015, 10:15 am

(Aug 31, 2015 10:47 AM)Eternal. Wrote: [\[CITE\]](#) This looks awesome, will be using it from now on. Thank you!

I'm glad you've found this useful.

If there's anything I should add, let me know.

King of Hearts - October 20, 2015, 3:24 pm

I'd like to bring this back up.

Please use this userscript, it helps. Also, the new servers should make the requests even faster.

Raymond Reddington - October 20, 2015, 10:21 pm

From the new scammer reps rule implementation, this wouldn't be difficult? I mean no one can leave a "SCAMMER" feedback just that way.

Ahri????? - October 21, 2015, 12:14 am

Shit this is just going to make people afraid to deal with me.

Mcbride - October 21, 2015, 12:29 am

Posting to find this later

Inj3ct0r? - October 21, 2015, 4:39 am

Good job OP. Will definitely try it. Hope it makes the marketplace cleaner.

PurpleIsAColor - October 21, 2015, 4:43 am

Is it just me, or is it broken?

Maybe it requires an upgrade or?

Am I just retarded?

Atharva - October 22, 2015, 10:19 am

I am using this.

Thanks a ton!

(Oct 21, 2015 04:43 AM)PurpleIsAColor Wrote: [\[CITE\]](#) Is it just me, or is it broken?
