Thread: [\[STOCKS\] *Make \\$50-\\$500 Per Week* \[METHOD\]\[TUT\]\[BROKING\]](#)

Online Warrior - April 30, 2014, 7:16 pm

Description: Hello Hackforums users, I am here to see who would be interested in buying an eBook about stock broking. I recently perfected my stock method a week ago. I made around \$50-125 in 2 days, now stocks is a very serious thing. If you want to start you have to be motivated and passionate about it. You do need a starting initial amount and that's it. You just need to follow the tips, tricks, and method I include in the eBook and you will make money in-no time. In order to achieve a profit from these method you must be up-to-date on current events, as stocks change every day. Please know that the money you invest does not go to me but a brokerage firm. Only money I would receive is the payments for a copy of the eBook. *I AM NOT SELLING IT YET*

Requirements:

- 1-2 Hours of research per day
- Beginner broking knowledge
- Initial amount of around \$50

If anyone is would be interested in buying the eBook please PM about it or post below, I have not finished the eBook yet. Just want to get a set number of people that would think about buying it.

Define: A stock investor is an individual or company who puts money to use by the purchase of equity securities, offering potential profitable returns, as interest, income, or appreciation in value (capital gains).

*Also currently looking for a graphic designer that would be interested in making a deal with me for graphic for this specific eBook.

Thanks for the PM's very much appreciated
