Thread: [uber user group image is a homepage image?](#)

Sc?rpi? - May 1, 2014, 6:57 am

I'm on my phone so I cant give an example but will update when I get home

Is the Ub3r userbar a huge image of an hf homepage for anyone else?

Jeff Jordan - May 1, 2014, 6:58 am

I'm seeing that for the L33T userbar.

Nath - May 1, 2014, 6:59 am

Not for me UB3R bar shows as -

Delirium™ - May 1, 2014, 7:00 am

It doesn't look like a homepage to me. What bothers me though is the fact that the text is not vertically centered.

Emoticon - May 1, 2014, 7:00 am

I see it too, very strange. I think it's something to do with hotlinking for Omni's new CDN, considering the link to the image redirects.

If you look closely the screenshot was taken in 2011 and is actually Omniscient logged in... lol that admin panel link.

Those who can't see it have the old image cached I can only assume.

Here's a mirror of what I see.

You motherfucker, now it bothers me and will bug me for ever >.<

?ã?ž?@ - May 1, 2014, 8:15 am

i think they did that on purpose to give it a 3d affect

I actually like it this way. Some sort of 3D feeling.

Promethazine. - May 1, 2014, 8:16 am
all the way!

I never even noticed until he pointed that out. I took a quick scan over the image did not like and did not look again. lol

Fat Tony. - May 1, 2014, 8:17 am

I have the normal format of the userbars and I'm using hackforums on my iPad.

Not bitching at him but he is right. Ugh yes it is indeed not vertically centered but I am sure all minor errors will be fixed soon. No its not a homepage image it shows normal here.

If the issue doesn't resolve itself flush your DNS and then clear your cache. This happens on occasion.

Erwin Schrödinger - May 1, 2014, 9:12 am

When I was on my iPad it happened.

I just cleared my history, cookies and cache, and it worked again!

Hopefully I helped! :)
