Erm, what is it? Is it just a bunch of images put onto a gradient background? I know it's your first attempt at Photoshop but there's no real technique or art here...

Check this out, <http://www.good-tutorials.com/tutorials/photoshop> , follow various tutorials and then apply the techniques you have learnt on your own work.

Good luck.

I probably should have mentioned that this is for my youtube gaming channel, I like cats so I made "myself" a cat with gaming stuff.
