Thread: [Will LTC hit \\$15 in 2 months?](#)

Dexter - May 1, 2014, 5:16 pm

In need of a bit money, currently holding 700 LTC. When do you think it will hit \$15?

Need around \$9k in 2 months, so hopefully LTC will be \$15 or more. What are your thoughts?

SIM-2251019 - May 1, 2014, 5:52 pm

From what I see it's hovering around the \$11 mark so we might see it sometime soon,

Hopefully man, I have been waiting long enough. It's been low the past 5 months now. MtGox really fucked us over. Same goes for China. One day BTC is not banned, other day it is.

Everyone though it would be nice for LTC to hit Huobi, but it wasn't. Price have been going down since...

Only bad news we hear the past months now

EziNet - May 1, 2014, 6:53 pm

My prediction LTC will hit \$15+ within 2 week.

Dexter - May 1, 2014, 7:37 pm

(May 1, 2014 06:53 PM)BitMoney Wrote: [\[CITE\]](#) My prediction LTC will hit \$15+ within 2 week. I will quote you on that in 2 weeks.

Keep in mind that you also said BTC would be 550 yesterday.

But hopefully you are right :)

Th3DON - May 1, 2014, 7:39 pm

You won't be waiting long for it to hit 15\$, with my knowledge about it and steady value analysis, it will most likely reach the price of 15-20\$ within 5 months, but not in the 2 month range you are looking for.

So basically you are saying it will hit \$15 in about 5 months, around 150 days?

Ok, so a member says 15 days another says 150 days.

Well, everyone has an opinion. We just have to wait and see :)

Yeah, 15\$ in 15 days that's some Maya calender theory, I approx it to hit 15 within 4 months, peak at around 20\$ in 5.

stts510 - May 1, 2014, 8:34 pm

wait and watch. You won't get accurate prediction. If it would be so, I would be rich....?

G^aNNicus - May 2, 2014, 2:48 am

I would never sell 700 LTC @ 15 \$, i've learned it the hard way in the past, selling prematurely.

Shot Caller - May 2, 2014, 2:49 am

Doubting it, it's just gone downhill in the last 3-4 months, from \$30 to \$11 currently, maybe if you said this last year from \$2 to \$30, you would be right. Also you could probably sell LTC currently for \$13 each if you find the right people selling at like 5-10 a time, would take time but would happen and get you to \$9000.

G^aNNicus - May 2, 2014, 5:39 am

Ltc has hit 50\$ couple months back, there is no reason why it shouldn hit 50 or more again..the way i see there is more and more people getting involved in cryptocurrency, only good things (hopefully) will come out of it.

You can do whatever you want, but i wouldnt sell...and pssibly lose alot of money..just speaking out of experience

I bought bitcoin and litecoin when it was 2-3\$ and made bad decisions and lost hundreds of thousand dollar.

just my 2 cents

just my 2 centsThe Question is in what timespan. If china comes up with more decisions against BTC Litecoins won't raise aswell and might even fall

WreckfullTM - May 2, 2014, 9:43 am

China do this thing with BTC and every other crypto on the internet. Like the user said one day is available another day is blocked so I think that because many people from day to day are getting

involved into mining & exchanging will hit soon some higher prices both on LTC & BTC. I don't know how long but I think that for 1 month it will be a price of \$20 per LTC. Remember that this is just my opinion. I don't force anyone to believe but as I said it's my personal opinion.

Supervisor - *May 2, 2014, 4:23 pm*

If I take past history, past news, recent news, regulation, security, legitimacy as a trade-able currency, volume, demand & supply and A LOT more variable into consideration, we are not going to be on a stable uptrend for long still.

We may go up sooner if very good news happen or if the price hit a disgusting bottom to let new investors get in, new people, new faces.

So much to write about Bitcoin, if you wish to know more about my opinion, please PM me, I would be very happy to talk about crypto currency.
