KilikRELOADED - May 2, 2014, 2:53 am

I know that you can't trust me, since I have a low amount of posts, and no reps.

However I am more than willing to try it out for you, and give it a full review in less than a day if you

decide to slip me a copy of this program. Think about it :)

Regards,
Kilik

?lack Hat™ - May 2, 2014, 3:50 am

I'd Like to try out your program, and i will give the best detailed review i can. Thanks in advance

N???e?o - May 2, 2014, 4:44 am

Can I have this bot please?

I would like to try this bot for website traffic :)

Review:

Quote: Software: "Link Bot v0.0.0.1 Beta"

The program design makes usage a delight.

Upon first run I see the possibilities before me, just browsing the menus make me understand each step.

Although very well organised user friendly GUI he has gone thru the effort of to make a step by step guide easily accessible in the help section.

You can not fail to understand what to do, Now let's try it out and see if it does what it's suppose to do....

Test subject: Website traffic.

9/10

The bot simulates organic traffic, to make your page rank higher [or maybe not but then that's an idea for you to work on]

by searching google, finding your webpage* (*if it's within the first 10 pages for chosen keyword/s), clicking it, and going to all sections of your page that you have chosen, spending a set amount of time there.

But that is not all, before it goes to your page it clicks a few of your competitors websites but only spends 1 second there, thus making google think they have less relevance than your page! :)

Running it now for 10 days I can see my webpage has moved up several spots in google search page ranking,

I am very pleased and I intend to continue running this software,

while also building backlinks on my own since the bot does not yet do that, until I'm top 3 in search results, so far so good.

Test subject: AdFly Traffic.

9/10

Along with the website traffic test I've been running the software on my AdFly links and it surely does what it's suppose to,

as I'm not big on AdFly I have increased my profits ALOT.

It might not be the fastest bot but then again I have not seen another like this!

It's fun to work with! And I make money from it!

To wrap it up, this bot delivers what it promises and even more!

Final score:

9/10

And the 9 is ONLY to encourage further development!

(It's really a 10/10)

? Just some imagination, I don't really know what it does yet but I would love to try it out and offer ideas on further development ?

(EDIT: Who missed this?>>> In order to get this program i would like you to;

1 - Write a review of the program and post it below.)

Spyware - May 2, 2014, 5:19 am

Bot Rose

Design 9/10

Rose offers a simple and sleek interface that allows for quick and easy access. Upon loading the software I was quickly able to understand how to use it.

Over all I feel the GUI is well done and something the creator has put a lot of thought into. Over all I feel that he should possibly focus a bit more on clean lines but over all a wonderful looking program.

Adfly Usage 8/10

While the application clearly handles the loading and handling of the adf.ly links flawlessly it does not address the process of proxies use at a higher level

This could result in some unsavoury events that might come at a later time for the users of the software. The creator has demonstrated the ability to cleanly code the software thus giving me the believe that he can fix this issue.

YouTube Views 7/10

Understandably the connections to you-tube quickly stress, I was unable to get over the standard 301+ view cap that plagues a lot of newer you-tube videos.

Possibly having a different routing, or handling of the proxies will allow for the elevation of the issue, I was more than able to get multiple views on every video I tested with very little ease.

Overall 9/10

Over all I am giving this software a 9/10 it offers wonderful usability, it also offers the ability to quickly add not only hits to your website, but also your Adf.ly You-tube and I am willing to bet other

Add websites with little to no risk. Over all this software is still in beta and should be used with caution but I feel that it will actively handle anything you can through at it.
