Thread: [FREE RAT Helpdesk | Test Install | Crypting/Building | Portforwarding - Zelix](#)

Zelix - May 2, 2014, 2:11 am

Do you need help with your RAT or do you have questions?

Feel free to look at my [RAT Setup & Mentoring service](#), you will get everything you need for a cheap price.

Hello HF! ?

DO YOU WANT HIGH-QUALITY ICONS FOR YOUR RAT OR KEYLOGGER? YOU CAN FIND 300+ ICONS HERE > <https://hackforums.net/showthread.php?tid=4457599>

I made this thread to help you guys out with problems regarding building your stub, crypting it, using a HQ icon, get a test-install and all other problems!

You can put your question underneath this thread, and I will give you a detailed answer with pictures when needed. ?

[Click here! Credits to Nitoh for the download! Password = thankyou](#)

Which questions could you ask me?

You can ask me questions about your stub settings, help with portforwarding, help with crypting your file, using a HQ icon, get a free test-install and more! Just post your question below.

Where to contact me?

If you don't want to post your question below, you can contact me with:

Skype: Xaiqiz

HF: Zelix [Click here to send me a PM!](#)

(May 2, 2014 02:35 AM)ToxicRat2000 Wrote: [\[CITE\]](#) Vouch for this guy. Tested my stub, it worked. Reply in literally 20 seconds. JehovahWitness - May 2, 2014, 7:51 am

Yo man, I don't have a static IP, I have a dynamic IP so is it still possible to portforward to use with a rat?

Zelix - May 2, 2014, 7:53 am

(May 2, 2014 07:51 AM)whittywex Wrote: [\[CITE\]](#) Yo man, I don't have a static IP, I have a dynamic IP so is it still possible to portforward to use with a rat?

Yes, you can use uTorrent to portforward.

Just change this to the port you want to forward:

http://portforward.com/softwareguides/utorrent/PF-UT1-uTorrent-preferences.jpg

Don't check "Randomize port each start" and you're ready to go! ?

JehovahWitness - May 2, 2014, 7:59 am

andrea2048 - May 3, 2014, 10:39 am

totally new with ratting. never had any experience of having a slave but got to try my stub on myself. started with DC-Legacy and tried the 5.3.1..

now, i just want to know... what free crypter can you recommend for me?

i just want to try it on my friend's pc (w/ his consent ofcourse)... i just want to try if it'll work on a poorly secured pc without crypting the stub and when I crypted it with a free crypter.

once i fully understand everything, then i'll get some paid crypter for actual use. and with that, what paid crypter can you recommend then?

PS: i'm planning to use RAT to mine bitcoins with the help of my soon to be beloved slaves.

thanks in advance!

(May 2, 2014 07:53 AM)Zelix Wrote: [\[CITE\]](#) Yes, you can use uTorrent to portforward.

Don't check "Randomize port each start" and you're ready to go! ?

is that the only thing we have to do when we want to port-forward using uTorrent?

don't we have to modify some internet settings on our system or on the router?

Zelix - May 3, 2014, 11:15 am

I won't recommend a free crypter, cause they will be not-FUD in notime.

The only thing you have to do is to disable your firewall, and the portorward method with uTorrent should work.

NOTE: First open your RAT and listen to the port and after that run uTorrent. ?

andrea2048 - May 3, 2014, 11:28 am

The uTorrent method is for people who CANNOT portforward with their router.

I recommend EasyProtect it is a easy and cheap crypter and always FUD.

kafrakos - May 5, 2014, 1:57 pm

i have 2 questions please :)

well, for dark comet [stub file i mean :p] , is it necessary to tick EOF in crypter?

and ; if DComet slows down slave's computer ?

thanks

Zelix - May 5, 2014, 2:29 pm

(May 5, 2014 01:57 PM)kafrakos Wrote: [\[CITE\]](#) i have 2 questions please :)

well, for dark comet [stub file i mean :p] , is it necessary to tick EOF in crypter?

and ; if DComet slows down slave's computer ?

thanks

1. It is NOT necessary to use the EOF option on DarkComet.

2. It will not slow down the Computer unless you are opening hided programs which use much RAM/CPU. ?

kafrakos - May 5, 2014, 3:07 pm

thanks :) i added u on skype ;) hope to see online soon :P sent u a message of who i am :P

(May 18, 2014 06:10 PM)hello im me Wrote: [\[CITE\]](#) Please help, i really don't know what to do. I made a thread about my problem, here;

<https://hackforums.net/showthread.php?tid=4234000>

Well... looks like OR 1) Their AV picked your RAT up or 2) You are not listening to the port or 3)

your no-ip DUC isn't online..

Also DarkComet is unstable when it comes to startups. ?

Try njRAT, it's stable & fast.

(May 18, 2014 04:04 PM)BrennenK012 Wrote: [\[CITE\]](#) Hey buddy, just added you on Skype. I need your help quick

I am still available, send me a message if you still need help. ?

another house
Yeah, you can use a dynamic dns for that, like no-ip.
But, you need to portforward the same port if you want your slaves to come back, you can use a

VPN if you cannot portforward. ?

domien - May 31, 2014, 4:32 am

Yo man.

I'm not trying to be skid or something, but I need to test some things with my RAT.

Do you know any free crypter so I can start with the tests?

I won't let the crypted file being distributed by my AV or some online scanner.

Thanks in advance.

Zelix - May 31, 2014, 4:39 am

(May 31, 2014 04:32 AM)domien Wrote: [\[CITE\]](#) Yo man.

spiderwebhacker - May 31, 2014, 4:02 pm

hey guys, so .exe is becoming an issue, is changing it to .scr better?

Zelix - May 31, 2014, 11:11 pm

(May 31, 2014 04:02 PM)spiderwebhacker Wrote: [\[CITE\]](#) hey guys, so .exe is becoming an issue, is changing it to .scr better?

No, .scr still has the .exe logo, you can try using the .pif or .com extensions to make it look legit.

nemesisobaara - June 1, 2014, 4:18 am

Very good job u are doing OP..thumbs up mate..hey! I gat a problem with darkcomet..I tink darkcomet is no more stable..sometimes slaves click and u dnt get a pop..sometimes,they appear,u close the darkcomet panel and re-open and they are all gone..I tink we are close to the end of darkcomet..I will like a reply from u since u are into ratting big time...

Zelix - June 1, 2014, 4:21 am

(Jun 1, 2014 04:18 AM)nemesisobaara Wrote: [\[CITE\]](#) Very good job u are doing OP..thumbs up mate..hey! hodosh54 - June 26, 2014, 12:50 pm

what about the free crypters? what do you think will be ok?

Zelix - June 26, 2014, 1:04 pm

(Jun 26, 2014 12:50 PM)hodosh54 Wrote: [\[CITE\]](#) what about the free crypters? what do you think will be ok?

No-one.

1) Some of them are backdoored.

2) They will be un-FUD in a few days.

3) Most of them will corrupt your file.

Etc etc etc.. just buy a cheap crypter (EasyProtect)

BlaQ - June 27, 2014, 7:23 am

Hey, with no-ip being down due to Microsoft suing them, how can I setup a RAT? I don't know many other methods that are effective enough. Thanks.

Zelix - July 10, 2014, 10:37 pm

(Jul 10, 2014 04:31 PM)Cerruth Wrote: [\[CITE\]](#) Hey, with no-ip being down due to Microsoft suing them, how can I setup a RAT? I don't know many other methods that are effective enough. Thanks.

If you have a static IP, you could use your own IP.

Otherwise you could use a new DNS, like:

<http://freedns.afraid.org/>

<http://dot.tk>

etc.

joburg1911 - July 10, 2014, 10:49 pm

mikewitt - July 10, 2014, 11:31 pm

I created a thread to ask the following questions, but no one helped me. Could you please help me?
?

<https://hackforums.net/showthread.php?tid=4331453&pid=41151009#pid41151009>

1. Am I correct in my understanding that if you enable port forwarding to a specific port on a specific device only that port will be opened, while on the other hand if you disable your router's firewall, EVERY single port on EVERY single device on your LAN will be opened?

2. Why is the IP you get by ipconfig or by using softwares like Wireless Network Watcher different from what you get by visiting sites like whatismyip.com?

3. Why do you not need to do port forwarding when using a VPN with a static IP exactly? Do VPN softwares open the ports for you?

Thanks in advance!

Zelix - July 10, 2014, 11:39 pm

(Jul 10, 2014 11:31 PM)mikewitt Wrote: [\[CITE\]](#) I created a thread to ask the following questions, but no one helped me. Could you please help me? ?

1) Yes and no, when disabling the firewall you still need to open the ports.

2) Cause that's your IPv4 address and not your WAN IP.

3) Yeah, but you first need to open the port through your VPN which is very easy.

mikewitt - July 11, 2014, 1:28 am

(Jul 10, 2014 11:39 PM)Zelix Wrote: [\[CITE\]](#) 1) Yes and no, when disabling the firewall you still need to open the ports.

3) Yeah, but you first need to open the port through your VPN which is very easy.

Thanks for the reply ?

If when disabling the firewall you still need to open the ports then what is the purpose of the firewall? Isn't it supposed to act like a barrier by blocking all the ports?

Also why can't we use reserved IP for RATS while other programs can. For example browsers use port 80 while RATs cannot?

Zelix - July 11, 2014, 2:24 am

(Jul 11, 2014 01:28 AM)mikewitt Wrote: [\[CITE\]](#) Thanks for the reply ?

Cause you can only listen to 1 port at the time.

& No, the firewall doesn't block all ports, if it did you wouldn't be able to go to the internet on port 80. It just blocks malicious things.

mikewitt - July 11, 2014, 2:33 am

(Jul 11, 2014 02:24 AM)Zelix Wrote: [\[CITE\]](#) Cause you can only listen to 1 port at the time.

1. Than how can you simultaneously use 2 or more browsers at the same time, like for instance I

am streaming 2 YT videos on Google Chrome while browsing Facebook on Firefox and twitter on another? And when my family members are using the same router and they are browsing as well?

2.Blocks malicious things how? How can a firewall recognize malicious things??

Zelix - July 11, 2014, 2:53 am

(Jul 11, 2014 02:33 AM)mikewitt Wrote: [\[CITE\]](#) 1. 2.Blocks malicious things how? How can a firewall recognize malicious things??

1. They use it for the same thing > HTTP

2. A firewall is a kind of antivirus for the incoming & outgoing connections.

bigphish - July 11, 2014, 6:35 am

Need help . Installed the rat, tested the server on myself, and it works. After I crypt it , and try and test it it will not show up?? Not sure why, I am really new at this and used tuts on HF to set everything up. But I hired a paid mentor to help and he insists I can't see it after it's crypted because it's not completely FUD? The guy I got the crypter said that's bullshit, which makes sense because the uncrypt server shows up. Any help will be greatly appreciated!

myronownage - July 11, 2014, 6:51 am

Hi got FUD file but i dont know if it works. Could i get a test install plz :P? Gr netherlands :p

(Jul 11, 2014 06:51 AM)myronownage Wrote: [\[CITE\]](#) Hi got FUD file but i dont know if it works. Could i get a test install plz :P? Gr netherlands :p

Yes you can, feel free to add my Skype.

@Above, add my Skype too.

5 Cents - July 11, 2014, 7:43 am

Hi

I'm adding you on skype now, I was wondering if I could get some test slaves.

iubjaved - July 11, 2014, 8:25 am

Just added him on skype. Hope he helps me with port forwarding, crypting and binding ^_^

CrypticX - July 11, 2014, 5:56 pm

I don't know if you already answered this question, but what is the best dns to use? I heard No-Ip was not good anymore?

GamerBoy1499 - July 11, 2014, 10:16 pm

Can you help me setup VPN, port forward and dark comet?

Zelix - July 11, 2014, 10:47 pm

(Jul 11, 2014 05:56 PM)Str8ballin Wrote: [\[CITE\]](#) I don't know if you already answered this question, but what is the best dns to use? I heard No-Ip was not good anymore?

Use dot.tk or <http://freedns.afraid.org/>

5 Cents - July 11, 2014, 10:48 pm

(Jul 11, 2014 10:47 PM)Zelix Wrote: [\[CITE\]](#) Use dot.tk or <http://freedns.afraid.org/>

Zelix, I have you on skype.

Any confirmation if you got those installs yet bro?

Zelix - July 11, 2014, 10:49 pm

(Jul 11, 2014 10:48 PM)5 Cents Wrote: [CITE](#) Zelix, I have you on skype.

Any confirmation if you got those installs yet bro?

I don't have ANY slaves/bots anymore, I got a new router + my no-IP got disabled.

I can only give test-installs.

roben81 - July 14, 2014, 8:27 am

i have problem with portforward.

MY no-ip was disabled so i go here <http://freedns.afraid.org/>.

1)i run the bat file

2)i set the unencrypted server but it run only in msconfing not to the interface of the rat

3)i crypt the server and i try to run it but nothing show up.

What i am doing wrong?

port is open and firewall/av disabled

mikewitt - July 14, 2014, 8:33 am

Not a RAT but a keylogger:

What are the "forced steam", "recommended", and "native stub" options and what do they do?

Thanks in advance!

Baksuzirati - July 14, 2014, 2:08 pm

hey need help to check rat working or not.. TEST INSTALL please :D

added u on skype.

MaatiZaouri - July 14, 2014, 2:33 pm

My dark comet stub just doesn't make any victims, i've tried it on myself and other computer many times but it still doesn't work. I have all the settings correct and port forwarding setup. I've altered many domains alot and now i'm using a dyndns one and it just doesn't create a victim. I used to use no-ip until it randomly stopped working and now when i use dyndns it still doesn't work.

my port forwarding is working well.

I'm pretty sure it's being detected by Av because of the site i upload to because when i tried to download on both my computers chrome detects a malicious file. However aside from this i run the stub straight off of my desktop and it still doesn't work. Whenever i combine it with a picture and spoof it with a JPG fake extension it doesn't work, it just opens the picture and that's it no victim created.

I have made a fresh stub and each time i create one it doesn't work. Even when i change the mutex it still doesn't work either. Also i am using dyndns so i'm not sure if this is the problem

Another thing i just tried it changing the mutex a few times and saved stub to desktop; now i try to open the file sandboxed and there is an error which occurs. I change my network settings to 127.0.0.1 and then try it and it works perfectly even though my port forwarding is successful [I have checked on canyouseeme.org] This makes me suspect the domain being the issue.

I have been told that it won't work using my dyndns due to not being able to connect to my external ip. I have uploaded my rat on rghost and it says it has 2 downloads but the thing is i do not have any victims so would it be possible for me to get any test installs please.

Any help is appreciated, thank you.

Vivicore - July 14, 2014, 6:34 pm

I need help portforwarding.

Please PM me/

Zelix - July 29, 2014, 5:12 am

Hey guys, I will be on vacation these 3/4 weeks so I can't help you guys out.

Zelix - September 16, 2014, 9:31 am

Hey guys,

I am back from my vacation and I have some time to help people with their problems.
Feel free to ask any questions!

PS: I won't be online on Skype for a while so you can post your questions here, I will answer your questions on the thread or ask for your TeamViewer. ?

I am online on Skype now, going to help you now. ?

SwindlerBob - September 16, 2014, 11:48 am

Thanks again for a thread like this OP much help

Zelix - September 16, 2014, 11:49 am

No problem, answered your PM ?

salt835835 - September 17, 2014, 7:14 am

i need your help to setup rat please

tisla - September 18, 2014, 4:51 am

I have asked some questions on skype. I sent you a friend request. My skype name is live:tahs33n.
excuse me. but you have not answered my questions on skype

Zelix - September 19, 2014, 8:25 am

@Above, sorry guys! I was on school and has some tests.

I am available again and I will be online on Skype this weekend. Try to PM me with your questions to get an immediate answer.

Mandelbox - September 19, 2014, 2:40 pm

I need to purchase a FUD Crypt for my RAT server. I'm willing to pay \$8.00 via Paypal and I will go first because I am new, if you are trusted. Please add me on skype because I cannot PM yet.

SteelCity131-16

Thanks guys!!

Zelix - September 19, 2014, 10:58 pm

@Above I don't sell any crypters, you could look for crypters in the Cryptography or RAT section.

Zelix - September 20, 2014, 12:42 am

(Sep 20, 2014 12:37 AM)Andrew Limey Wrote: [\[CITE\]](#) Zelix do you have / know where to get some nice icons that looks like the Windows ones?

I really want a legit looking image icon for example:

The .png one.

The .JPEG one

thanks :)PNG:

Where did you download the DarkComet? Is it a safe version.
& Easyredirect.log could be a log file of the view site option but I never got that.

mr.popper - September 23, 2014, 12:28 pm
I downloaded it from official darkcomet site 2 years ago, when the project was alive.

Zelix - September 23, 2014, 12:33 pm

Download what? DarkComet?

Thanks for posting I think. ?

Hassan Gazi - October 11, 2014, 12:30 am

You seems to be busy on skype :P

Asking the question here ?

Actually, I made my own stub and crypted it with different crypters having different ratios like 12/40, 4/40, 1/40 and then sent almost all of them to my different friends who opened the files but didn't get infected. What is the actual problem here? I just sent a file having 1/40 ratio to one of my friend who opened it as well and found the content hidden it though he didn't appear on my DarkComet.

I tested the stub after creating on Anubis as well as on myself and it worked fine. It just doesn't work after I crypt it. Is there any solution of this? Thanks a lot in advance ?

Zelix - October 11, 2014, 12:31 am

Download Sandboxie > www.sandboxie.com & try the stub on yourself before sending it to your friends. Yes Yes, I know you are busy with other people. It's a no problem for me :) Keep this great work up. I will try to catch you later ?

Well, I actually downloaded Sandboxie and followed this guide:

<https://hackforums.net/showthread.php?tid=435649>

but couldn't find any file as shown in the guide though when I opened the file manually without Sandboxie, my computer appeared on my DarkComet which I think shows that the stub is working

Thank you for reply ?

Zelix - October 11, 2014, 12:43 am

Well, damn??????

Thanks a lot, you really helped me out?

just found that my firewall settings were on (even I turned them off) and wasn't accepting ports from outside probably resulting the DarkComet not receiving the victims?

Though, I think that it will work perfectly now???

Will try it and will post the results here?

oh and by the way, I would like to know that is it good to use Module Startup, File binder and Icon

changer of DarkComet?

Thanks a lot in advance?

?

?

Don't use any settings on DarkComet except for the network settings.

On your Crypter use Startup, Protect Process and the icon changer.

Hassan Gazi - October 11, 2014, 1:36 am

(Oct 11, 2014 01:30 AM)Zelix Wrote: [\[CITE\]](#) Don't use any settings on DarkComet except for the network settings.

On your Crypter use Startup, Protect Process and the icon changer. Noted?

Ok, so made a new stub by using following settings:

- Clicked Random on mutex multiple times, named the server and profile
- Added host in Network settings with port
- Skipped all the steps and then went to Stub Finalization. Clicked 'Save the profile" and generated the stub...

This is what most of the Tuts shows on HF

Thank you for your help also. ?

Really appreciated that?

Zelix - October 11, 2014, 1:39 am

(Oct 11, 2014 01:36 AM)Hassan Gazi Wrote: [\[CITE\]](#) Noted?

Vouch for Zelix. I personally have not experienced his RAT help desk, but what I have heard from numerous friends is what brought me here to write this vouch. Zelix is a very experienced RAT mentor, and I am positive that he will be able to help you with any problem you could ever face with a RAT. Zelix is not only an experienced HF member, but also an amazing overall person to have around. He has a wide variety of skills and attributes, which in turn, make him one of the most HQ and helpful users on the forums.

VOUCH!

Yes I already have you on Skype. ?

Still available for questions guys. ?

goldpieces - June 26, 2015, 12:49 pm

I failed many times in fort forwarding :(why router setting are very different than i saw on videos and other tutorials, can u help me mate ? :(

Zelix - June 26, 2015, 12:51 pm

Yes bro, I sent you a PM with my Skype. ?

#250th reply ?

kucykucy - June 26, 2015, 1:37 pm

Great service and Good guy 10000% vouch. Totally know what he is doing.

Zelix - June 27, 2015, 2:33 am

Thanks for the vouch bro, I hope you enjoy the RAT. ?

omagad - June 27, 2015, 7:07 am

Greetings,

just a question cuz I dont want to create new thread over this. Does any noip-like site work with rats nowadays? Cuz I cant get it working.

Or is there any substitute for this process?

goldpieces - June 27, 2015, 12:24 pm

This guy is awesome , he did my port forward in just 2 mins wow !

wish i can kiss him :)

#No homo

Haha, no problem man, happy RATting! ?

kucykucy - July 16, 2015, 1:44 am

Bro pmed you. I need help. Formatted my laptop. I will pay if you want me to

matissshakeris - July 16, 2015, 5:28 am

Vouch. He helped me without any payment. And made find a crypter that actually works.

Zelix - August 21, 2015, 12:37 pm

Sorry guys, I was on vacation, I am back for support again! Just hit me up with a pm or post below.

toome - August 29, 2015, 10:00 pm

I bought new crypter and I think something is wrong with it, when I scan my crypted file it's 2/35 or something like that but I can't get no any slaves what ever spreading method I use.

Can you help me please to test it is it working or not?

Zelix - August 29, 2015, 10:15 pm

That's no problem, feel free to add my Skype or send me a PM!

?

DamienVC - August 30, 2015, 12:43 am

Portforwarding and crypting settings are probably the most cases where assistance is needed.

Glad to see you're doing it for free.

Zelix - October 9, 2015, 2:34 am

Yea, I get a lot of requests about those.

I re-opened this help desk, I am available for support on HF and on Skype, let's go! ?

The OG FurFag ? - October 9, 2015, 2:54 am

Vouch for Zelix, fast to respond, courteous, very nice person and very helpful! :)

SliceNDice - October 11, 2015, 3:21 am

Vouch for him! He did my rat setup but is slow to respond :(

Goes AFK Alot on me :(Which is not ideal

Zelix - October 11, 2015, 5:31 am

This is a free service, I can't be online 24/7..

Zelix - December 12, 2015, 4:56 am

Re-opening this guys, I'm available for live RAT support and help again.

LET'S GO!

limb3r - December 13, 2015, 11:01 am

Bookmarking for the future. Great service offer mate

Emotional Patrick - December 13, 2015, 11:27 am

Do you know of any good .exe binders? Preferably free, or if you could possibly bind my server to something with a program of your own.

Shoe - December 13, 2015, 12:03 pm

Added you on Skype. Port forwarding doesn't seem to be working. Thanks!

Mister Guwop - December 22, 2015, 7:38 am

Vouch for this nice person as soon as he skyped me I lost all my blockchain and he hacked my

paypal.

JUST KIDDING.
hes top kek.

VirtualMon3y - December 29, 2015, 1:36 am

Hi,

Are you willing to provide support for this Rat I found and have made a thread about (KilerRat its an offshoot of NjRat) if anyone needs it? I don't really have the time. Would need you to test it a bit more, provide support for anyone that needed it and I would link your thread on mine as support.

<https://hackforums.net/showthread.php?tid=5110823>

Let me know with a pm?

Thanks

Zelix - January 6, 2016, 2:00 pm

Not really active guys. Please bare with me. I'll be offline a lot..

aGFjaw-- - January 6, 2016, 2:15 pm

I'm using quasar + njrat, because they are free, and I'm actually ratting just for keep 4-5 "slaves", but not for malicious purposes.

So I don't need crypter, binder, nothing of that.

The problem is that njRat is not too good yet.

Every time that someone goes wrong, like a windows update delete a file, or similar things, I'm not anymore able to restart it, because if I re-open mother file, nothing happen.

I solved creating a new acc, but now I have a different problem.

I can see all .exe related to njRat opened, in process manager, and to startup, but I receive no connection.

I tried netstat and all software to sniff connections, and there are no connections related to the njRat, but it's opened, and if I kill it, I get a BSOD.

Before you say me that it does not use a TCP Protocol, I can assure that's false, because in the past, I always used netstat and tcpw to check his connections with success.

Hope you can help me!

James Burnham - February 13, 2016, 3:43 am

How do you monetize rats?

Zelix - March 19, 2016, 4:28 am

(Feb 13, 2016 04:43 AM)Darth Burnham Wrote: [\[CITE\]](#) How do you monetize rats?

Depends on what RAT you have, what functions it has etc.

I'd recommend a Botnet to monetize (if you can get thousands of bots you can do trafficking, ads, hidden web pages and so on).

Or you can mine coins, but that depends on the quality of your slaves.

Or you can mine coins, but that depends on the quality of your slaves.

That sounds good. I am totally new to this monetizing method. I don't know much about it but I am eager to learn. Is botnet method a method that requires more than 2 weeks of spreading to give you an average \$20 a day? I know that it depends on how much work you will put in this but I wonder, let's say that I am not retarded and I put 3 hours of work a day. Would it bring the above results in 1-2 weeks?

Thank you for doing that helpdesk, Zelix.

Zelix - September 10, 2016, 2:33 am

Re-opening this again. I don't have the time to help you guys through skype because of some reasons, so for now I will only be answering through HF.

Doing this since the day I joined HF and I feel like I have to continue doing this.

Let's go guys, ask me anything :3

Purple Kief - September 10, 2016, 2:35 am
