Thread: [Unleash the FULL CAPABILITY of Windows!](#)

Sacred Symmetry - May 2, 2014, 6:11 am

Hey Guys, basic tutorial today.

im basically showing you how to unleash the full capibility of windows 7/8 in terms of advanced settings.

Step 1:

Make a folder and name it this (without quotations)

"AdvSet.{ED7BA470-8E54-465E-825C-99712043E01C}"

Step 2 : Dont F**ck Your PC UP :P

And its all nicely indexed :DD

Screenshots!

Winners - May 2, 2014, 6:13 am

Is that it? I'm confused. Just made a folder and it's apparently done?

Sacred Symmetry - May 2, 2014, 6:19 am

@winners. make a folder and name it AdvSet.{ED7BA470-8E54-465E-825C-99712043E01C} Press enter and open it.

0x03a8 - May 2, 2014, 8:05 am

Nice job, this is pretty handy actually!

Sacred Symmetry - May 4, 2014, 5:15 am

More Soon. Had people PM Me about this not Working. Its pretty simple :P

Tommytoocute1215 - May 4, 2014, 6:08 am

thanks alot now this can be very useful do u know how to do this on xp??????

SIM-1550131 - May 4, 2014, 6:11 am

It's really nothing special.. just shows you the list of everything you can do in the control panel but ok. Good job I guess? Idk.

xploD - May 4, 2014, 7:09 am

I think in windows 7 this is called god mode or something.

Suffixed - May 4, 2014, 7:14 am

Hmphh, "Windows cannot open this file".

UkVenoM - May 4, 2014, 10:30 am

If i'm not wrong this is just a CLSID Or a Windows Class Identifier if you prefer, I made a post about these in the past. And as someone said above its just showing what you can do in control panel.

Mikrozeser - May 4, 2014, 10:44 am

Thanks for a nice way to see more functions of windows easier ;)
