Best Regards...?

Master? - May 2, 2014, 6:27 am

Files seems to be clean, But as user says below this is stolen.
Give credit where credit is due.

\$lick - May 2, 2014, 6:29 am

Import System.Text.RegularExpressions

Button to grab:

PHP Code

<?php

'creating our httpwebrequest target NOTE: you can use any websites that use to provide proxies directly

Dim the_request As System.Net.HttpWebRequest = System.Net.HttpWebRequest.Create("http://proxy-ip-list.com")

'creating the httpwebresponce

Dim the_response As System.Net.HttpWebResponse = the_request.GetResponse

'defining the stream reader to read the data from the httpwebresponce

Dim stream_reader As System.IO.StreamReader = New System.IO.StreamReader(the_response.GetResponseStream())

'defining a string to stream reader finished streaming

```

Dim code As String = stream_reader.ReadToEnd
'haha here we use the regex
Dim expression As New System.Text.RegularExpressions.Regex("[0-9]{1,3}\.[0-9]{1,3}\.[0-9]{1,3}
}\.[0-9]{1,3}:[0-9]{1,4}")
'adding the proxies to the listbox
Dim mtac As MatchCollection = expression.Matches(code)
For Each itemcode As Match In mtac
ListBox1.Items.Add(itemcode)
Next

```

Button to Save:

PHP Code

```
<?php
```

```
If ListBox1.Items.Count = (0) Then
```

```
    MessageBox.Show("Please click grab to grab proxies and then try saving", "Error",
    MessageBoxButtons.OK, MessageBoxIcon.Error)
```

```
Else
```

```
    'defining a streamwriter
```

```
    Dim S_W As IO.StreamWriter
```

```
    'converting listbox items to string
```

```
    Dim itms() As String = {ListBox1.Items.ToString}
```

```
    "defining a savefiledialog
```

```
    Dim save As New SaveFileDialog
```

```
    Dim it As Integer
```

```
    save.FileName = "Grabbed Proxies"
```

```
    save.Filter = "Grabbed Proxies (*.txt)|*.txt|ALL Files (*.*)|*.*"
```

```
    save.CheckPathExists = True
```

```
    save.ShowDialog(Me)
```

```
    S_W = New IO.StreamWriter(save.FileName)
```

```
    For it = 0 To ListBox1.Items.Count - 1
```

```
        S_W.WriteLine(ListBox1.Items.Item(it))
```

```
    Next
```

```
    S_W.Close()
```

```
End If
```

Button to clear;

PHP Code

```
<?php
```

```
ListBox1.Items.Clear()
```

Stop your bullshit dude.

Release original stuff or don't release anything.

MonEy - May 2, 2014, 7:34 am

People appreciate nothing these days.

Thanks bro, really useful.

I found it to be a useful tool, even if it is C&P.

Arnette Rene - May 2, 2014, 9:06 am

Got it, Thanks OP! i really like it

Im afraid that is rare around here, keep an eye out for

- Ubbylol
- TUP
- idb.
- Electrealek
- Me ?

Coz we know how to make our stuff. period.

Agreed, he will return or most likely already be here under some other lurker name ? hes always around ^^

Cyber Saint - May 2, 2014, 3:21 pm

Ah, a user releasing unoriginal content. He didn't even bother to slightly change it to even attempt to make it look like he made it. Not sure why people do this to be honest, I get you want to look like you know how to program but faking it doesn't help. In all honesty, if you want to learn to program I'd be happy to teach you.

Yup, it always the same old story, it really pisses me off sometimes the nerve they have to claim it as theirs.

Ive been working on a project for months, if u follow my threads u can see steps and progress i make, these idiots just copy/paste random shit everywhere.

I make GDI controls in my free time. Have a few projects I haven't finished. Planning on finishing them soon though.

Made some private bots for games. <http://fluxdev.x10.mx/gyazo/images/b4dbdc40f23.png>

Hmm go for some hack & crack -free applications, and perhaps i will teach ya a trick or two.

Made those bots when I started programming. The code is really messy, but I made a few bucks off of them. I'd like that though.
