Thread: [\[GUIDE\] How to create iMacros scripts for promotional events](#)

Balloon - May 2, 2014, 3:44 pm

What is this thread?

Recently there has been a lot of talk about the Skittles XBL promotion. In this section whenever there is a promotional event there will be threads created where users share tips/tricks or brag about current codes they have gathered. When I first saw the thread by BlueTigerSlayer I decided to create a quick iMacros script and gathered 1,000 codes with the gmail dot trick.

[+] If you have a problem, view the frequently asked questions below. Most likely your answer is there.

[+] You need iMacros in order to use this tutorial

[+] You will need an email list to take full use of the script. I released this tutorial mainly because the dot trick was patched and users will be needing this thread later.

[+] You need an Imagetypers account with credits to solve the captcha.

[+] If you want to use proxies on Rotation follow these instructions:

[1] Download the add-on for firefox called "Proxy Tool"

[2] Right click on the bottom right of the browser and go to import proxies and paste in the proxy list.

[3] Then right click the icon again and go to settings.

[4] Select "Rotate Proxy on every new window/tab."

[4.1] Then that way when you play the script on loop you will be filling out the information from a new proxy every time.

If you don't watch the video and post with questions that are explicitly answered in there then I will not help you. I won't even respond. The video goes over literally anything you need to know about completing these types of offers with iMacros.

Video Tutorial

-----

```

I strongly suggest watching my video on how I created it. A couple moments in the video I have a brain fart and forget a few things but I walk you through how to automate the emails and how to setup Imagetypers in order to automate the captcha.

Dot Trick website:

<http://www.exploitn.com/gmail.php>

Generate a list from your regular email address and paste the emails into the "emails.txt" file.

 Extra Useful Code

Get Codes from email:

```

Code var divz = document.body;
console.log("XBOX");
var codes =
divz.textContent.match(/[A-Z0-9]{5}\-[A-Z0-9]{5}\-[A-Z0-9]{5}\-[A-Z0-9]{5}\-[A-Z0-9]{5}/g);
for (var i = 0; i <= codes.length; i++) {
  console.log(codes[i]);
}

```

Paste the code into the console window (CTRL+SHIFT+I). If you have a different promo that isn't Xbox change it to the name of the service, eg. SKYPE. The output in the console will display the codes.

If you have duplicates use this website to sort through them.

 Frequently Asked Questions

Code NS_ERROR_UNEXPECTED: Component returned failure code: 0x8000ffff
(NS_ERROR_UNEXPECTED) [nsIPrefBranch.getCharPref], line 2 (Error code: -1001)

Solution:

Spoiler ([Click to View](#))

This issue either means one of two things. The file encoding is incorrect or the file is not in the \datasources folder.

Encoding NEEDS to be UTF-8. That is the only thing iMacros can read.

How to save it with UTF-8 Encoding:

[spoiler]

[img]http://i.minus.com/isSP418WdRgf3.png[/img]

Code SyntaxError: unknown command: FILEDELETE at line 21

Solution:

Spoiler ([Click to View](#))

Either you don't have an Imagetypers account or you don't have an "image.jpg" file on your desktop. How can the script delete something that isn't there?

Code The first name isn't submitting

Solution

Spoiler ([Click to View](#))

You're connection/computer isn't processing it. Add "WAIT SECONDS=2" under line 9.

I can't get codes from Yahoo emails because they don't stack like gmail.

Solution

Spoiler ([Click to View](#))

Go to gmail on the gear.

Settings.

Accounts and Import.

Import mail and contacts.

Sign in with your Yahoo email and wait for the emails to come in.

You can now use the code above to take the codes out.

Credits to Soccer for the thread layout. I took it from one of his threads.

Lastly, enjoy!

David Ken - May 2, 2014, 4:02 pm

Can you make the IMacro auto clear cache?

keesvwaal - May 2, 2014, 4:05 pm

Thanks for making this tut Balloon,
i think it will helps alot of people. ?

Overkill! - May 2, 2014, 4:10 pm

I just bookmarked this thread to read later. I remember seeing you post about the bot, and I'm sure more promotional events will occur. Thanks for this!

Ellie Goulding - May 2, 2014, 4:15 pm

Thanks for sharing this OP! Finally an automated script, thanks ! :)

PROTONIX - May 2, 2014, 4:37 pm

I got SyntaxError: unknown command: FILEDELETE at line 21

Balloon - May 2, 2014, 4:39 pm

(May 2, 2014 04:37 PM)PROTONIX Wrote: [\[CITE\]](#) I got SyntaxError: unknown command: FILEDELETE at line 21

Most likely because you don't have the file "image.jpg" on your desktop. How can the script delete the file if it isn't there?

Like I said I strongly suggest you watch the video.

PROTONIX - May 2, 2014, 4:40 pm

I did put it on the desktop unless its a windows 8 problem <https://puu.sh/8wJto.png>

Balloon - May 2, 2014, 4:43 pm

(May 2, 2014 04:40 PM)PROTONIX Wrote: [\[CITE\]](#) I did put it on the desktop unless its a windows 8 problem <https://puu.sh/8wJto.png>

Hmm that's strange one sec, let me get on my desktop. What version of iMacros do you have?

PROTONIX - May 2, 2014, 4:44 pm

(May 2, 2014 04:43 PM)Balloon Wrote: [\[CITE\]](#) Hmm that's strange one sec, let me get on my desktop. What version of iMacros do you have?

Oh wait I found the problem. Imagetyperz makes you pay to do the captcha... Do you know any free ones? Thanks!

I would like to know if the email dot exploit works on it aswell. :3

Balloon - May 2, 2014, 4:50 pm

(May 2, 2014 04:44 PM)PROTONIX Wrote: [\[CITE\]](#) Oh wait I found the problem. Imagetyperz makes you pay to do the captcha... Do you know any free ones? Thanks!

I would like to know if the email dot exploit works on it aswell. :3

As I stated in the video it isn't free.

Also like I said in the video the gmail dot exploit doesn't work.

I released this so there won't be a need for a million threads on a script to automate promotional events.

(May 2, 2014 04:02 PM)David Ken Wrote: [\[CITE\]](#) Can you make the IMacro auto clear cache?

I know you can add "CLEAR" to the end of the script but I'm not sure how much it cleans in terms of cache, cookies, etc.

Weebex - May 2, 2014, 4:56 pm

Good tutorial Balloon! Email list of yours still working?

Balloon - May 2, 2014, 4:57 pm

(May 2, 2014 04:56 PM)BlueTigerSlayer Wrote: [\[CITE\]](#) Good tutorial Balloon! Email list of yours still working?

I don't have one lol.

That's why the tutorial is posted. I have no use for it and haven't even looked at the site since I

made that a few days ago.

Tr??e??a??s??u????r??e - May 2, 2014, 5:15 pm

I just watched the video and read the description. Thanks so much for this Balloon! This will really help in the future!

PROTONIX - May 2, 2014, 5:32 pm

Well that blows.. It is a really script though! Thanks for the release :)

I hope people use this more often then purchasing scripts from other people who will sell their script for around \$50 or maybe more. Generous! :)

uR x S0NiiC - May 2, 2014, 6:36 pm

Thanks for the share dude, awesome keep up the good work.

105234 - May 2, 2014, 7:28 pm

Nice tutorial, i did the same thing before the captcha got added and i gave up..
Anyways you play Crossfire? Nice..

Balloon - May 2, 2014, 7:45 pm

Anyways you play Crossfire? Nice..Thanks and yeah I have been playing Crossfire for a long time. Prodigy stopped being active once ADIGA got number 1 so I stopped playing all the time.

?ICE? - May 2, 2014, 8:02 pm

Thanks for the tutorial I'm gonna use this in the future

105234 - May 2, 2014, 8:07 pm

(May 2, 2014 07:45 PM)Balloon Wrote: [\[CITE\]](#) Thanks and yeah I have been playing Crossfire for a long time. Prodigy stopped being active once ADIGA got number 1 so I stopped playing all the time. Nice.. i ranked up to lieutenant colonel by farming and playing legit and then stopped playing since there were sooo many hackers.

Reticulum - May 2, 2014, 8:28 pm

I'm not getting emails, I set up a bunch of email forwarders and are only getting the emails for the ones I manually fill out, not the automated ones. Any idea why?

Balloon - May 2, 2014, 8:57 pm

(May 2, 2014 08:28 PM)Ridge™ Wrote: [\[CITE\]](#)

I'm not getting emails, I set up a bunch of email forwarders and are only getting the emails for the ones I manually fill out, not the automated ones. Any idea why?

Are the emails being submitted into the form field? Because I literally ran through over 1,000 without any problems when I did it.

dhanadhan - May 2, 2014, 9:45 pm

Me too getting Syntax error: FILEDELETE

The image.jpg is on desktop and folder path renamed correctly...when i remove this line of code it gives syntax error for ONDOWLOAD..

Let us know if this error occurs to you as well...

And Thanks for this tutorial...

uR x S0NiiC - May 2, 2014, 10:16 pm

What kind of Error code is it, can you post it?

dhanadhan - May 2, 2014, 10:29 pm

(May 2, 2014 10:16 PM)uR x S0NiiC Wrote: [\[CITE\]](#) What kind of Error code is it, can you post it?

This is wut i get: SyntaxError: unknown command: FILEDELETE at line 21

Balloon - May 2, 2014, 10:39 pm

(May 2, 2014 10:29 PM)dhanadhan Wrote: [\[CITE\]](#) This is wut i get: SyntaxError: unknown command: FILEDELETE at line 21

A user already posted about this.

You either don't have the "image.jpg" file on the desktop or you don't have an imagetyperz account. I'm going to assume the latter.

You NEED an imagetyperz account to solve the captcha. If you don't want to solve the code with the captcha, remove it.

crille612 - May 3, 2014, 7:37 am

Instead of imagetyperz to solve the captcha. Can i make it so that i have to type it in manually and how?

And thanks for the guide :)

Balloon - May 3, 2014, 7:39 am

(May 3, 2014 07:37 AM)crille612 Wrote: [\[CITE\]](#) Instead of imagetyperz to solve the captcha. Can i make it so that i have to type it in manually and how?

And thanks for the guide :)

Just remove the code. For the imagetyperz section

Nighthawk - May 3, 2014, 11:03 am

nice share, you guys should use proxies for every other code or so.

Balloon - May 3, 2014, 11:33 am

(May 3, 2014 11:03 AM)F?ar Wrote: [\[CITE\]](#) nice share, you guys should use proxies for every other code or so.

I should have added that in.

Use the add-on for firefox called "Proxy Tool" and import a list of proxies. Every time a new tab is loaded a new proxy will be used.

(May 3, 2014 11:03 AM)F?ar Wrote: [\[CITE\]](#) nice share, you guys should use proxies for every other code or so.

Proxy support added to the OP. I forgot to add it because I was on my desktop instead of my laptop.

worldww3 - May 3, 2014, 3:50 pm

i keep getting this error : NS_ERROR_UNEXPECTED: Component returned failure code: 0x8000ffff (NS_ERROR_UNEXPECTED) [nsIPrefBranch.getCharPref], line 2 (Error code: -1001)

Balloon - May 3, 2014, 4:02 pm

NS_ERROR_UNEXPECTED: Component returned failure code: 0x8000ffff

(NS_ERROR_UNEXPECTED) [nsIPrefBranch.getCharPref], line 2 (Error code: -1001)
Sounds like the encoding is wrong on the text file. It needs to be UTF-8 because that is all iMacros can read.

Like I said watch the video and most if not all answers will be there. I walk through everything in baby steps.

Trident666 - May 3, 2014, 5:59 pm

How come I get an error in IMacros?

SyntaxError: wrong format of SET commands at line 3

My line 3 has this ->

```
SET !DATASOURCE C:\Documents and Settings\HP_Owner\My
Documents\iMacros\Datasources\emails.txt
```

Balloon - May 3, 2014, 6:02 pm

(May 3, 2014 05:59 PM)Trident666 Wrote: [CITE](#) How come I get an error in IMacros?

SyntaxError: wrong format of SET commands at line 3

My line 3 has this ->

```
SET !DATASOURCE C:\Documents and Settings\HP_Owner\My
Documents\iMacros\Datasources\emails.txt
```

Watch the video.

Most likely the encoding of the emails.txt is wrong. It NEEDS to be UTF-8 because that is all iMacros can read from.

Trident666 - May 3, 2014, 6:32 pm

I watched the video, encoding is set to UTF-8.

This is my code

```
VERSION BUILD=7020226 RECORDER=CR
SET !EXTRACT_TEST_POPUP NO
SET !DATASOURCE C:\Documents and Settings\HP_Owner\My
Documents\iMacros\Datasources\emails.txt
SET !DATASOURCE_COLUMNS 1
SET !DATASOURCE_LINE {{!LOOP}}
SET !LOOP 1
TAB T=1
URL GOTO=http://ssl.skittles.com/
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1 ATTR=ID:Header_ecCode_txtCode
CONTENT=m95mn
TAG POS=1 TYPE=INPUT:SUBMIT FORM=ID:form1 ATTR=ID:Header_ecCode_btnCodeSubmit
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_txtFirstName CONTENT=bob
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_txtLastName CONTENT=vance
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_txtEmail CONTENT={{!COL1}}
```

```
TAG POS=1 TYPE=SELECT FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_ddlDOBMonth CONTENT=%02
TAG POS=1 TYPE=SELECT FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_ddlDOBYear CONTENT=%1987
TAG POS=1 TYPE=SELECT FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_ddlDOBDay CONTENT=%16
TAG POS=1 TYPE=INPUT:CHECKBOX FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_chkXBoxNo CONTENT=YES
TAG POS=1 TYPE=INPUT:CHECKBOX FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_chkTerms CONTENT=YES
WAIT SECONDS=2
PROMPT "Please enter the captcha:" !VAR1
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1 ATTR=ID:recaptcha_response_field
CONTENT={{!VAR1}}
TAG POS=1 TYPE=INPUT:IMAGE FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_btnSubmit
```

Nvm I fixed it. I had to change the code to
C:\Documents<SP>and<SP>Settings\HP_Owner\My<SP>Documents\liMacros\Datasources\emails.txt

Anyone know any good proxies I could use with chrome? The ones from hide my ass keep timing out and work very inconsistently...

jamiecherry - May 4, 2014, 9:45 am

thanks for this mate, i didn't know that you could add a captcha solver to a macro

TheDutchend - May 4, 2014, 3:01 pm

Thanks for this, but the dot trick isn't working anymore right? So we need to find a new method for emails?

Edit: I just watched the video and he mentioned that the dot method doesn't work, but amazing tutorial I gonna use it in the furthur!

.Magic - May 4, 2014, 3:23 pm

You can still do it without the dot trick. The way I do it is I just go to mailimate.com and make as many emails as I need, and then direct them to my email address. Just copy and paste all the emails into the emails.txt file

seanolan1 - May 4, 2014, 7:40 pm

Help mate i got this Error?

jumm...maybe you have a problem with your address folder.
Have you checked that it is correct?

I actually need to update that. I changed the CLEAR location on my desktop. I have to copy and paste it back. I just got done working with the thread and adding extra codes and frequently asked questions.

This user is correct though. I added that there because users wanted to know how to CLEAR cache and cookies. Add it before going to the URL not after submit.

jamiecherry - May 10, 2014, 4:36 pm

(May 10, 2014 04:31 PM)dhanadhan Wrote: [\[CITE\]](#) it suppose to go to their home page where u enter that 5 letter code.

You don't need to use proxies, I use firefox and the "clear" command and I can get the codes i want.

MonopolyMan - May 11, 2014, 6:57 am

Is anyone else now getting this on the skittles website?

"Transaction (Process ID 99) was deadlocked on lock resources with another process and has been chosen as the deadlock victim. Rerun the transaction. Uncommittable transaction is detected at the end of the batch. The transaction is rolled back. "

Cost - May 11, 2014, 7:04 am

Yup happens to me many times. Don't have fix for that but I have the script repeating captcha part when it fails to get a code.

P?kachu - May 11, 2014, 8:25 am

Anybody got a macro to go through yahoo emails and extract the code from it then move onto the next email?

jamiecherry - May 11, 2014, 8:34 am

(May 11, 2014 08:25 AM)P?kachu Wrote: [\[CITE\]](#) Anybody got a macro to go through yahoo emails and extract the code from it then move onto the next email?

Go on your inbox Ctrl+Shift+I in google chrome go to console and paste the code:

```
var divz = document.body;
console.log("XBOX");
var codes =
divz.textContent.match(/[A-Z0-9]{5}\-[A-Z0-9]{5}\-[A-Z0-9]{5}\-[A-Z0-9]{5}\-[A-Z0-9]{5}/g);
for (var i = 0; i <= codes.length; i++) {
console.log(codes[i]);
}
```

Make sure your mail is in the new design

MonopolyMan - May 11, 2014, 8:59 am

(May 11, 2014 07:33 AM)dhanadhan Wrote: [\[CITE\]](#) Yup happens to me many times. Don't have fix for that but I have the script repeating captcha part when it fails to get a code.What exactly do you mean? So do you have it retry if it doesn't work, using the same email?

Cost - May 11, 2014, 9:01 am

(May 11, 2014 06:57 AM)MonopolyMan Wrote: [\[CITE\]](#) Is anyone else now getting this on the skittles website?

"Transaction (Process ID 99) was deadlocked on lock resources with another process and has been chosen as the deadlock victim. Rerun the transaction. Uncommittable transaction is detected at the end of the batch. The transaction is rolled back. "

Your ip is deadlocked I believe. You will have to use a proxy in order for it to work.

MonopolyMan - May 11, 2014, 9:07 am

(May 11, 2014 09:01 AM)Cost Wrote: [\[CITE\]](#) Your ip is deadlocked I believe. You will have to use a proxy in order for it to work.I don't think it's an issue with my IP, since it works about 50% of the time.

Also I have been somewhat switching my IP with a VPN.

Cost - May 11, 2014, 9:47 am

Okay I'm having a new problem now, whenever I run the script it types in the code but doesn't submit it.

dhanadhan - May 11, 2014, 10:00 am

(May 11, 2014 08:59 AM)MonopolyMan Wrote: [\[CITE\]](#) What exactly do you mean? So do you have it retry if it doesn't work, using the same email?

Yup u read it correct. Same goes when the caprcha is wrong.

MonopolyMan - May 11, 2014, 10:25 am

(May 11, 2014 10:00 AM)dhanadhan Wrote: [\[CITE\]](#) Yup u read it correct. Same goes when the caprcha is wrong.How exactly did you do this? Did you have to use JS in order to get it working, or is there a way to do it with a IIM?

Edit: NVM, just going to write a .js file to use with iMacros, since that seems the easiest way.

P?kachu - May 11, 2014, 11:37 am

(May 11, 2014 08:34 AM)jamiecherry Wrote: [\[CITE\]](#) Go on your inbox Ctrl+Shift+I in google chrome go to console and paste the code:

```
var divz = document.body;
console.log("XBOX");
var codes =
divz.textContent.match(/[A-Z0-9]{5}\-[A-Z0-9]{5}\-[A-Z0-9]{5}\-[A-Z0-9]{5}\-[A-Z0-9]{5}/g);
for (var i = 0; i <= codes.length; i++) {
console.log(codes[i]);
}
```

Make sure your mail is in the new design

This kinda works but I only get a few of the codes and not all of them =/

I realized that it only gives you the codes that it sees.

So if you scroll down, more emails load. So make sure all the skittles emails are showing up and then run it.

P?kachu - May 11, 2014, 11:52 am

I have scrolled down so they all load up but still doesn't give me them all.

Does it only do the ones on the screen?

That is on their end.

I'm not sure if it is in any way related to the code.

Sons - May 11, 2014, 4:03 pm

i keep getting this from the website? any idea?I'm fairly sure this is happening because so many people are trying to get codes at once, and their database of codes is somewhat messed up. This could possibly lead to the site trying to distribute the same code to two people, thus causing deadlock. If you reach this you can still use the same email and get the code. unfortunately It's annoying because with iMacros scripts you can't have conditionals, so there is on way to retry. Therefore, you must wirte a .js script and not a .iim script, even then it adds a lot of time. This could be something they did on purpose or just due to the hug of death it's gotten from various forums.

Info on deadlock: <http://whatis.techtarget.com/definition/deadlock>

Just a guess though, could be way off :P

ItzClydeFrog - May 11, 2014, 10:20 pm

How is everyone combatting the cookies? I can get one code then it will say that I need to enter a 'valid email adress' I'm using the yahoo disposable emails. When I clear the cookies it gives me a new code. Anyone know how to get around this? Thanks

Yes ur right but its not 75% for sure and i have given credit to you.

You also realize that there are atleast 5 threads asking how to get codes from emails and separate threads for script errors when you already have it listed in this thread.

Just trying to help....

Balloon - May 11, 2014, 11:10 pm

That is on their end and there is nothing you can do about it other than retrying the captcha.

Falken - May 12, 2014, 11:47 am

Nice method, i will try it out. =====

RoSeawolf - May 13, 2014, 1:18 pm

1. Learn fucking English because I have no idea what you are trying to say.
2. I am not your maid.
3. If you can't figure out the script with a 15 minute video and a written tutorial then god save us all.

UmCyK - May 15, 2014, 11:43 am

OMG maybe my english is no good.

I Thank you for yor answer.

But skittels blocked use yahoo meil. What we must doing.....

RoSeawolf - May 15, 2014, 2:36 pm

Balloon i want to tell you that i've came from another forum ,

and just want you to know that you have all my respect for this script .
Thanks and keep up the good work ?

Target™ - May 18, 2014, 5:18 pm

Will this work on chrome? I'm trying it and it seems not..

Balloon - May 18, 2014, 5:29 pm

(May 18, 2014 05:18 PM)Instagram™ Wrote: [\[CITE\]](#) Will this work on chrome? I'm trying it and it seems not..

No some functions don't work. Download FF, it's free.

Target™ - May 18, 2014, 5:37 pm

Alright. Can i have the email folder on my desktop? Cause i can't find iMacros folder...x

dhanadhan - May 18, 2014, 5:52 pm

(May 18, 2014 05:37 PM)Instagram™ Wrote: [\[CITE\]](#) Alright. Can i have the email folder on my desktop? Cause i can't find iMacros folder...x

should be in ur documents. and yes u can have it on ur desktop too..

Target™ - May 18, 2014, 6:21 pm

The DBC api won't hit submit for me.. it gets up to entering captcha on skittles and that's it..

dhanadhan - May 18, 2014, 6:27 pm

(May 18, 2014 06:21 PM)Instagram™ Wrote: [\[CITE\]](#) The DBC api won't hit submit for me.. it gets up to entering captcha on skittles and that's it..

Are u using the complete code? Last three lines should read,

```
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1 ATTR=ID:recaptcha_response_field
CONTENT={{!VAR1}}
TAG POS=1 TYPE=INPUT:IMAGE FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_btnSubmit
WAIT SECONDS=7
```

Target™ - May 18, 2014, 6:33 pm

Yeah i'm using the entire code. I have the code working except it isn't submitting. hmm
Everything is saved on my desktop and i have folders,etc right..don't think that matters..

shouldn't

```
"TAG POS=1 TYPE=INPUT:IMAGE FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_btnSubmit
WAIT SECONDS=7"
```

wait go first? i think..

Still not working. It has the little thing showing it's going to click it but it doesn't click...what a waste of 6 captchas :(

Spyware - May 21, 2014, 4:03 am

So, I have a issue of it not swapping the email address from the list. How can I address this?

I am using your sec posting where I type the captcha, I have a way to get all these emails with no issue, I just need to find a way to force it to cycle through the emails.

coronafllyest - May 22, 2014, 12:13 am

I was able to get about 150 codes, but then instead of going to the congratulations page it would go straight to the loading page. If I do it manually it works, but it won't allow me to do it with iMacros :(.
I got it to work by trying it on another browser I was using FireFox before. Its now working IE, :)

amurmum - May 28, 2014, 9:03 am

Can someone help me make a address scaper pls?

Balloon - May 28, 2014, 9:05 am

(May 28, 2014 09:03 AM)amurmum Wrote: [\[CITE\]](#) Can someone help me make a address scaper pls?

What do you mean by address scraper. Post the details here and I will try to help you out.

amurmum - May 28, 2014, 9:19 am

<http://www.fakeusaaddress.com/>

I found this website that produces valid address'

e.g.

'216
Bon Secours Health Source
7229 Forest Avenue #208
Richmond, VA(Virginia) 23226
(804) 673-2727
Janis Gardner'

out of this i want the
'7229 Forest Avenue #208
Richmond, VA(Virginia) 23226'

Without the '#208' and I want it saved in a CVS file or something that the macro can then read and paste into skittles page.

So i assume there'll be two macros, one to retrieve the emails and one to paste them in, i dont

know if that makes sense but yeah..

amurmum - May 30, 2014, 3:36 am

etcyco - June 2, 2014, 10:07 am

Hello,

if someone could log in TeamViewer me and make me these codes in iMacros that had automatic. If someone wants I can deposit money by paypal.Chyba that someone wants to do it for free. My skype etcyco

Balloon - August 3, 2014, 4:15 pm

I had to get some codes from my emails the other day.

I added:

A code checker that will click redeem, run through the list of codes, scrape the 7 day trial text, and put the text in a file called working. It will stop running if a code doesn't work.

Yahoo Email creator that works with the default view.

How to transfer Yahoo emails to gmail so that they stack and you can take them out with the code

in the console.

Hope everyone enjoyed the Skittles promo while they could.
