dotcppfile - May 3, 2014, 12:15 pm

Wait, did you program this software?

Kusatsu - May 3, 2014, 12:17 pm

yup.

I did. Why do you ask??

Anyways I just want to share something valuable:)

I am not into facebook and I am not going to use this application but by the things it does and the image you shared, I can see the extreme details in there, thats some amazing porgrammimg. Actually, this may not be the most important tool in this section but this is indeed the best contribution. Respect.

PS: the picture got removed for some reason.

Kusatsu - May 3, 2014, 12:27 pm

Oh yes, I deleted it, my fault, I add it again:)

Anyways, this is the limited version and not the full one:)

But it should be helpful for some people:)

end909 - May 3, 2014, 1:50 pm

Wow this is super awesome and like dotcppfile said nice job, it looks very clean and simple to use. Thanks for the release! :D

Kusatsu - May 4, 2014, 12:13 am

thanks:D

Some positive rep would be nice:D

Jeng...jeng....jeng.... SPYWARE Detect!!!

jeng jeng jeng amazing post man , a spyware detected as a spyware , what a scoop !!!

LeetWave - May 4, 2014, 5:34 am

Luhe.Fiha.A Is a nasty virus,wouldn't recommend downloading.

GreyPhantom - May 4, 2014, 5:56 am

Time to sneak the source code.

coolerfarmer - May 4, 2014, 5:57 am

7 posts! This is very suspicious! Pay attention!

GreyPhantom - May 4, 2014, 6:00 am

Update! my AVG detected the tool as virus

<http://prntscr.com/3g3419>

Additional info:

The user should give a screenshot of the tool. Lol

MrRapidz - May 4, 2014, 6:03 am

Most likely backdoored, the user has just joined and posts this. And asks for positive rep lmao.

DarK-D3v!L - May 4, 2014, 6:09 am

i will analyse it right now and post the results here ...

Kusatsu - May 4, 2014, 6:09 am

LOL.

Nobody test this tool.

So please dont talk like this only because I'm new.

The with the viruses is because of my obfuscator I guess.

Kaspersky and most other GOOD AV-Scanners dont detect anything.

But so what, if you think I try to fool you, that's quite not my problem at all.

Ah and the funniest thing:

Only free and/or shitty AV-Scanners detect a virus such as Symantec and AVG.

So test the bot yourself before you judge a program!
