Xerotic's Crypto Middle-Man Service

Supported Currencies:

Omnicoïn - OMC

Bitcoin - BTC

Litecoin - LTC

Process:

Each user will send their respective crypto currencies to my wallets.

I will wait for BOTH currencies to be confirmed in my wallets.

I will then send the correct currency to each party.

Rates:

My rates are 2% with a minimum of \$0.25 (meaning that if you are only trading \$1, I will still do the exchange but the amount that is paid to me must be \$0.25 in any of the currencies above).

You must also cover transaction fees.

Why choose me?:

I am a trusted member here. I have absolutely zero deal disputes against me.

Current Mentor, former Staff, respectful profile.

I will provide quick and satisfactory service.

I work from home to I am normally online for a very large portion of the day.

Extra:

Any fees will be paid by the traders. As middle-man I am not responsible to cover for your fees so keep that in mind when exchanging.

Once a deal has started, it can only be stopped if BOTH parties have PM'd me with their consent. In this scenario, I will still be collecting the fee (if any currency has been sent to me).

Thank you and I look forward to doing business with everyone as an escrow that can be trusted.

test what - *May 22, 2014, 4:59 am*

Vouch for Op, This looks good will use this soon.

Tomaten - *May 22, 2014, 5:01 am*

Vouch for Xerotic.

Have seen him around quite a bit, seems like a trustworthy member.
