Official by Kyoto Animation with authentic character voices!

All SOS Brigade members keep your desktop alive!

They wander around your desktop or sit at the table, cute voices with click and hover reactions!

Mikuru's outfits are interchangeable!

When wandering around your desktop

These are pretty funny to have on the screen.

Thanks for the share.

Me too!

I prefer the K-On ones to the Haruhi ones myself ^^

There are actually quite a few. Google "Shimejis"

Sweetie - May 4, 2014, 11:16 am

Can I use both K-on and this one at the same time? :3

Yes but you'll have to sign a waiver stating I'm not responsible for kawaii overdose.

EsKay - May 4, 2014, 12:11 pm

Pretty cool =). Downloaded and thanks for it!

Osuka - May 4, 2014, 12:16 pm

haha nice upload the k-on and others release officials ^.^

edit: wait how do run these?, just run the exe or? -.- sorry

Run the executable for which characters you want on your desktop from the Characters folder. If you run the MascotSOS inside the Table folder it will spawn the table and all of the characters to sit at it.

This is the shit. Thank you from the bottom of my heart

But I fucked up at some point. I clicked too much on Yuki, there was this halo of light and she transformed into that shy Yuki like in the movie

That is insanely cool. I had no idea that happens.

I found the way to change her back:

<https://www.youtube.com/watch?v=AVa48OThZQI>

Another way of resetting her, and any other characters back to the old mode is to press Windowskey+R

Type in "appdata" and hit enter. Go to your roaming folder and delete MascotYuki, MascotHaruhi, MascotSOS, ect. folders.

I want these so bad but last time I failed and hit accept to a bunch of addwares.

Scared

Thank you so much man.

I found out another fun way.

Do the yuki thing with only Haruhi with her, haruhi will transform into movie haruhi, now run MascotSOS.exe, and drag Haruhi to it, put her on the computer, now open MascotHaruhi, and voila, she's back to normal

There is no installer for these o=

Also I moved the downloads to dropbox instead of sendspace since some people don't use adblock.

Sutorimu - May 5, 2014, 9:16 am

Is there possible to keep them from moving away from their position?

Seriously? Are you afraid of ads?

Wow.

Unfortunately only the K-On ones will stand idle and take walk breaks.

The Haruhi ones just like to keep walking forever until you place them at the club table.

All ads are easily to remove (aslong as the ads are legal and doesnt use for example root kits etc, dunno why some one would have ads with rootkits but just saying x))

I didn't understand either, it made me open the rar as an exe and then spammed me with a bunch of accepts and declines and I missclicked on an accept I shouldn't have.

It was called Gorilla Price

Still easy to remove.

Load safe mode and delete the shit.
