Thread: [Theme Vars Not Parsing \[Not much big issue.\]](#)

Isildur - May 5, 2014, 12:10 am

The theme vars at profile pages, (for example: <https://hackforums.net/member.php?action=profile&uid=2202182>) are not parsing under the "Additional Usergroups".

Here is the bug pic:

[img]<http://i2.minus.com/iAO11ZIHnkPNZ.PNG>[/img]

Its a simple error, may be someone forgot to use global \$theme ?

Or somebody used single quotes instead of double quotes. ?

Omniscient - May 5, 2014, 11:08 am

You're right. Bizarre fact is that \$theme is in global though. :(

Gotta track this down and fix it. I can't have a plugin error like that. :)

EDIT: FIXED.
