This is a cool thread!

Here is my cinema 4d render of omnicoins :P

[img]http://s6.postimg.org/fiyc0dya9/wallpaper0011.jpg[/img]

I could have made an animation of them dropping but it'd take ages to render due to me using a soft-box for the gold effect XD

VirusTotal - May 10, 2014, 5:46 am

Added to the list!

Thanks UBERHAX0RSAM

Autodesk Inventor using some custom light settings and a slightly modified gold material. Not really a program meant for artwork, but it works. ?

oh i see. nice one! hey if it works use it :D! it is a really nice gold texture. Using cinema 4d its hard to get a nice gold texture unless you want the render to take aggggessss

If someone does make something awesome but it takes them too long to render, I wouldn't mind doing it for them. I just want a low res pre-render first to see if it's worth the time :)

I got bored and figured Omnicoin might want an even simpler logo than it already has... Works okay in award size too, although I had to make the edge slightly wider. I also tried with HF's purple, but the contrast ended up being too small and it looked pretty dull.

I actually really like this. I've always thought it seemed wierd when the OMC logo was Gold and Purple rather than HF's colors. Your logo looks pretty good in the whole HF theme. Doubt official logo will be changed but i like yours and will probs use it as a logo regardless.

I'm on holiday right now. I'll add new images in the thread asap

Cyber Saint - June 18, 2014, 9:05 pm

Thanks for making a compilation of all these graphics, I'm going to be using a few of them for a variety of OMC related projects that I am working on at the moment.

EDIT: There are new avatars in the Omnicoin avatar package here on HF. I am currently using one, actually.

VirusTotal - June 20, 2014, 1:04 am

Edited the thread + added new images :) ENJOY
