(Jul 12, 2014 05:12 AM)Jolien Wrote: [\[CITE\]](#) This is my Review:

I bought his Spreading Guide and after ~20 Mins i got his Ebook pmed.

After reading it i started to set it up. It was quite easy, because he explained everything well in his Ebook.

After a few Hours i got my first Results.

The more time you spent on his Method, the more will you profit from it.

I personally think you should rise the price to 30-50\$. It is too cheap.

Thank you for selling it to me.

It's the first really working Spreading Guide for me. And i bought about 30 Spreading Guides.

Good luck with your sales!

(May 5, 2014 12:09 PM)Doxicity Wrote: [\[CITE\]](#) I've used Vulnerable's method before, and it worked wonders for me. For \$15, it's incredibly worth the money, considering the amount of slaves that can be gained through torrents, and the money made. You'd be a fool to compare this to other spreading guides. Best of luck selling this.

(Aug 9, 2014 05:40 AM)TarAldar1on Wrote: [\[CITE\]](#) Just have to vouch for this ebook.

I never buy ebooks as they are usually crap and a waste of time and money, but this one is actually really good.

When it comes to the methods there isn't really anything new there, but it gives you a much greater understanding of whats important to do the very first days of spreading and how to set it all up to avoid beeing detected.

Also underlines some very important steps that i often neglect because i am lazy.

Luckily enough i had allready started with the first few steps so i could go straight on to the spreading.

When i woke up this morning i allready had 20+ slaves and thats only from one torrent :)

Started from scratch now to follow every step and build my own little slavers bay ;)

This guide is not anywhere else on HF.

It's simple but requires a few hours before almost autopilot.

FUD server and VPN is a must have but not required to get a few bots.

1000 - 1500 bots in 24 hours is possible, but you need to have som luck and wizdom :) 200bots in 48 hours is more likely for a newbie, but follow the guide exactly and you will get amazing results!

Remember to read the gude well, and follow every instrucion.

Good luck with the sales, this was my honest opinion :)

It's about torrent spreading what do you think it does not include except anything but torrents? ???

I've seen enough vouch begging from various groups to know not to trust them. Show ne proof, heck, I'm a brotherhood members, show me via teamviewer a sample for proof. If this gets 1000's a week, then a sample should be no problem.

No investment.

Not much effort is needed, just some time to make sure you don't get banned would be better though before you start spreading.

As another user stated, I'd like to see screen shots of this working. If I wanted to get tons of vouches I could throw a thread link into another forum, pay for vouches, mass message on Skype, etc etc. If I saw some screen shots of this in action and/or someone's HUGE botnet (as, 1000 per week must make it huge,) I'd buy this instantly.

Don't expect any proof. OP has already been asked and the first reply from OP about it was "Not really, here is a 'valid' vouch.". I'm not buying or or almost buying it until OP stops the excuses and shows proof. It shouldn't take long. If it really is true and you get 1000 slaves a week, OP should be able to wait a day and show us 142.8571428571429 many slaves.

It's a pretty basic guide to spreading on torrent websites. The guide is great for people who are BRAND new to trying to spread. If you have a general idea on how to spread on torrent websites, then I'd suggest not buying the eBook.

I don't care what you think, don't buy it then.

The only reason i have not provided proof is because i have stopped ratting a lonh time ago.

tty666 - June 6, 2014, 2:09 pm

I bought it I vouch anyway because if you are noob/starting to learn then it's a good ebook but I can only join Linode there is no real uber tip here.

It's just how to do a clean torrent spreading but there is really no magic trick to speed up your spreading if you already know the technique.

So vouch because it's reliable but maybe too expensive without real uber trick (support package could help a little bit new users also for 25\$)

PS : I would liked dedicated section to spread on piratebay for example as it becomes more and more difficult ... the ebook is general not precisely giving a method on particular torrent website.

This is my Review:

I bought his Spreading Guide and after ~20 Mins i got his Ebook pmed.

After reading it i started to set it up. It was quite easy, because he explained everything well in his Ebook.

After a few Hours i got my first Results.

The more time you spent on his Method, the more will you profit from it.

I personally think you should rise the price to 30-50\$. It is too cheap.

Thank you for selling it to me.

It's the first really working Spreading Guide for me. And i bought about 30 Spreading Guides.

Good luck with your sales!

Just have to vouch for this ebook.

I never buy ebooks as they are usually crap and a waste of time and money, but this one is actually really good.

When it comes to the methods there isn't really anything new there, but it gives you a much greater understanding of what's important to do the very first days of spreading and how to set it all up to avoid being detected.

Also underlines some very important steps that i often neglect because i am lazy.

Luckily enough i had already started with the first few steps so i could go straight on to the spreading.

When i woke up this morning i already had 20+ slaves and that's only from one torrent :)

Started from scratch now to follow every step and build my own little slavers bay ;)

great guide for those who haven`t had any luck with torrent spreading, Worth the bucks! For those who are very good at torrent spreading, , don`t bother.

This guide is not anywhere else on HF.

It`s simple but requires a few hours before almost autopilot.

FUD server and VPN is a must have but not required to get a few bots.

1000 - 1500 bots in 24 hours is possible, but you need to have som luck and wizdom :) 200bots in 48 hours is more likely for a newbie, but follow the guide exactly and you will get amazing results!

Remember to read the gude well, and follow every instrucion.

Good luck with the sales, this was my honest opinion :)

Is there more to this ebook than common sense? You make legit torrent accounts, you bind ur shit to a working torrent / program and then share it? Is there more it? You seed the torrents with bots you already have? More trusted torrent acc & seeds the better. Properly crypting and binding your shit

Does this guide/ebook give insight on how to make your torrent spreading accounts more legitimate, how to get more seeds and/or what specifically to spread in order to get the quickest results?

It does have some ideas of what you mentioned but it's not as basic as you think it is. There is more technique to it.

Vouch for this method works like a charm

Doctory0 - July 15, 2015, 5:28 am

I hate to trash your thread but this isnt a unique method at all, and is not worth the price it is. want the guide free? simply just make and upload torrents to what other torrent website you want. no other information added in the guide lawl. to me this is a huge scam.

WaveRyder - July 16, 2015, 8:18 am

Does this still works? Am very much interested in buying if it does.

I really would love to buy a good spreading method. But please. Tell us in a simply way how it works.

Not all. But if there is only one sentence: Crypt, bind, go to cracking forum, upload.

Then it's not worth any money.

So please, send a screen or anything like a proof.

I personally do not use this method, and no its not a crypt bind go to a cracking forum....

Dr1v7r - October 21, 2015, 1:04 pm

None of your vouches show any actual progress or proof of this working, and it's from 2014. Far from 'unsaturated' with how many vouches there are, odds are your method is leaked somewhere.

Add some valid pics of it working and I'll buy it, till then glws op.

I wouldn't be selling it if it's not working anymore. That would be considered as scamming. It's easy to follow yes.

The only difficulty in my opinion is to make an uploading account on kat.cr, TPB,.... So I'm wondering if the ebook explains how to easily create one.

big vouch! added on skype and got everything working in no time for a awesome awesome price

Goldmouth - March 23, 2016, 2:41 pm

I mean, there is no better guide. if you read and follow these directions there is NO way you will lack installs. Ive wasted money on other ebooks. dont make my mistake. 19k and counting. get yourself a good crypter, you are going to need it.

Im not being paid to write this nor do i know this guy.

MrNacho123 - April 6, 2016, 10:39 pm

I don't know where to start. In the beginning, I couldn't seed my own torrent because of that ISP shit so I got into my dualbooted Mac and got Hotspot Shield for free. Anyways, I let it seed for ONE day and then I turn back on Windows because I'm like, "18 seeders, it can run itself now". I turn on my DNS and Imminent Monitor AND HOLY SHIT!

Connected Clients: 35

I would recommend this to ANYONE. It is so amazing and fast and autopilot too! VOUCH!
