Thread: [Win7 Start orb](#)

Kaos™ - May 5, 2014, 12:52 pm

So i run comodo firewall and i like to customize my themes look. Well i tried to change my start orb and comodo blocks expstart.exe and i dont know what it does exactly and it wont change the orb my task bar just disapears, any one know how to fix it?

Aura - May 5, 2014, 1:19 pm

You can add that file and process to Comodo's exclusions list if I'm not mistaken.

Kaos™ - May 5, 2014, 1:29 pm

i have tried and everytime i look its back in the blocked files

Where did you get that theme from anyway ?

Kaos™ - May 5, 2014, 1:36 pm

which theme? i got the orb changer from i wanna say rocketdock not 100% sure tho my actual windows theme is sufferance-blue

Reptar - May 5, 2014, 9:00 pm

I think you can disable the AV through Task Manager. Just kill the processes then try it again.

Jagster™ - May 6, 2014, 12:58 pm

Is this comodo firewall? Just have it ask you every time a file executes if its safe or not and check the allow file option.

Exeptt - May 6, 2014, 2:10 pm

Go to the comodo website, and search how can you add windows theme to your list.I think you can find the answer there.Good luck bro :).

stevenm - May 6, 2014, 3:21 pm

There may also be multiple places where you have to add the EXE as an exclusion. Disable the AV temporarily, install the software that it's having an issue with, and physically browse to the EXE you want excluded to make sure you've got the path right.

I know that this kind of software is tempting to install/use, but most of the time it degrades performance and isn't worth the added hassle for the visual effect.

Kaos™ - May 6, 2014, 10:37 pm

Fixxed this issue closed all the apps i use to stay safe and bam it worked

Imao.

Did you even consider my idea?

It could have worked easily just by saying Comodo to treat the program as an allowed application. I changed my orb today too and once I did that it didn't ask me anything else.

Comodo is tricky. When you think you disabled all the services, it still blocks them and gives you error because you forgot to disable ONE hidden service, Comodo Cloud.
