Thread: [Insidious Miner Revamped | Version 3.0](#)

S?Nk - May 5, 2014, 5:20 pm

Insidious Miner has been active since: 2/01/2013 ?

Insidious Miner has been and will continue be the best standalone miner on HackForums for years to come. I have been around long enough to watch dozens of other miners COME AND GO like nothing, they can't handle the customer pressure and need for consistent updates. I CAN! Buy Insidious Miner today and you won't be let down and you'll always receive my FULL SUPPORT! Don't be fooled like the rest. ?

Disfigure - May 5, 2014, 5:29 pm

Vouch, Vouch, Vouch, Vouch, Vouch, Vouch, Vouch, Sank always has wonderful products.

Marky Marky - May 5, 2014, 5:32 pm

I am definitely interested in this product.

S?Nk - May 5, 2014, 5:56 pm

(May 5, 2014 05:32 PM)-Moon Wrote: [\[CITE\]](#) I am definitely interested in this product.

Great, let me know if you have any questions before you purchase.

Kuky - May 5, 2014, 6:05 pm

Does this drop files or is the mining code injected and custom coded?

S?Nk - May 5, 2014, 8:10 pm

(May 5, 2014 06:05 PM)Kuky Wrote: [\[CITE\]](#) Does this drop files or is the mining code injected and custom coded?

The miner only drops 1 exe and copies itself to appdata for startup. There are no drops of anything else such as .dll files. ?

\$uicidal - May 6, 2014, 1:18 am

I've been a user of Insidious Miner for about 2 years now and it's never let me down.

I have absolutely no complaints about it as it has worked flawlessly for me over the past 2 years.

Huge vouch for Insidious Miner, no other miner can offer you the same amount of quality and value.

Decayed - May 6, 2014, 4:19 am

Upgraded from the previous Insidious Miner which always worked great - Upgraded Without Problems.

Can only vouch for Insidious Products!

Cmd Prompt - May 6, 2014, 5:52 am

I love the thread layout. I think the switching showing the details of each feature is way too quick though lol.

Kuky - May 6, 2014, 9:06 am

(May 6, 2014 05:52 AM)Cmd Prompt Wrote: [\[CITE\]](#) I love the thread layout. I think the switching

showing the details of each feature is way too quick though lol.

I agree. I had to look at each "box" maybe 2-3 times each rotation to read what it said

S?Nk - May 6, 2014, 11:04 am

Thank you for all the feedback already guys!

(May 6, 2014 09:06 AM)Kuky Wrote: [\[CITE\]](#) I agree. I had to look at each "box" maybe 2-3 times each rotation to read what it said

I will be having my graphics designer slow the images down about 5 seconds to make it easier to read before it goes back to the feature names. ?

Thanks for the heads up. ?

S?Nk - May 6, 2014, 11:52 am

Update

Simple bug was fixed which crashed the builder on non-English computers.

Banana_ - May 7, 2014, 7:53 am

Just waiting for my upgrade. I am looking forward to using this again.

joniator11 - May 7, 2014, 8:22 am

Is bite crypter compatible with that?

Decayed - May 7, 2014, 2:56 pm

Hey SaNk - I just played around a bit with the new version and by doing that i thought of a little additional feature for your next version:

I think it would be nice if there would be an option added like creating profiles for your pools and/or setup. So the users would not have to enter all the data again for a new build.

Also i would like to throw in the idea of an failsafe option like the common cgminer has - in case that a pool is down for some reason it would be a nice option. Maybe it would be possible to implement that feature so the miner jumps over to a backup pool to safe the shares generated.

Its just a little hint for an improvement - dont want to talk bad about the miner. Its an awesome product and works smooth as a babys ass!

S?Nk - May 7, 2014, 3:39 pm

Thanks for your ideas and I will definitely consider implementing those in the upcoming updates.

I will add the profile option as I was already planning to do that in the original edition of Insidious Miner.

As far as the backup pool address that's a feature I could almost definitely implement but the problem is most big pools don't go "offline" they just lag and the mining software still will 'work' just not efficiently so that feature is a bit counter intuitive.

I'm glad you're liking the miner and thanks for the input!

Upcoming Updates

Settings Profiles

(Save setting profiles for Pool Host & Port, Worker User & Pass, Intensity, Max GPU Temp, Startup Name and Process Name)

OpenCL error bypass

(Any pc without OpenCL cannot mine using GPU as the framework is required for the mining software to properly utilize the hardware, when a PC doesn't have OpenCL it will use a CPU miner instead)

Marv48 - May 7, 2014, 5:42 pm

Just upgraded to new software, hope its cool!

Cesar Morales - May 7, 2014, 9:12 pm

Does this miner use injection?

-Astro

S?Nk - May 7, 2014, 9:17 pm

(May 7, 2014 09:12 PM)A?tro Wrote: [\[CITE\]](#) Does this miner use injection?

-Astro

I think what you're asking is does the software run in the same memory space as the miner bin itself, if that's what you're asking then yes it does, it runs the process in its primary thread.

Cesar Morales - May 7, 2014, 9:28 pm

-Astro

It's not using a runpe, the software being executed doesn't require it as it's only 2/35.. It's a custom compiled version of cgminer with no dlls or .cl files dropped, they're all stored inside the exe itself. Here is a scan below. ?

(May 8, 2014 04:45 AM)joniator11 Wrote: [\[CITE\]](#) Can i mine omnicoins with it?

Thank you!

Yes it says in the thread as well as in the GUI that you can mine OMC. OMC is a script-based currency, Insidious Miner can mine ANY script or sha256 based crypto currency.

You should see much higher speeds once it runs for a while, the speed will register low for the first period of mining.

atf.....

It's a small fee considering the new updates that I've released. Many more are also going to be coming including a private mining pool for customers only and a built-in statistics panel in your miner builder to see how many connections you have to your worker etc.

Disfigure - May 12, 2014, 5:10 am

(May 11, 2014 07:58 PM)UnderHunter Wrote: [\[CITE\]](#) So is lifetime or is not life time license?

Many people don't see all the new features that have been added and how the miner has completely changed from what it used to be. It's an entirely new edition and for \$8.00 I think that's fair. I normally don't respond to members like him because I don't feel like starting an argument with him over my sales thread. But yea, you're right. It's a new edition that won't happen for at least another year..

S?Nk - May 13, 2014, 5:25 am

Upcoming Update Notice

There will be a private Litecoin mining pool which will be limited to customers only coming soon, 1-3 days. This should solve any lag issues that are faced when mining on public mining pools with thousands of people mining on there. Also there will be no worker peer limits (max connections per/peer). If you haven't noticed yet on pools that don't ban workers for multiple peers (connections) to a single worker you may have noticed that specific worker is getting very low hash speed. This is because the pool sets a limit of x amount of peers, for example they set a limit for only allowing 30 peers to connect to a given worker to prevent overhead and lag. So instead of 12,000 kh/s you will maybe only see 2,000 kh/s.

I'm going to be coding a separate dialogue in the builder to where you can view your hashing speed from the pool, possibly number of connections to your worker as well as see your worker details and load your configs over to the main builder form.

Thank you to all of my customers who've been mature and patient over the past year and thanks to everyone for their continuous support to the project and anyone who has upgraded to the new Edition without complaining about the fee.

Bro, this is going to be an insane update - I mean in a positive way :D
Just feeling nervous to check it out and can't wait for the release.

This miner is getting better and better - so much great new features in that short period of time - its really worth its money!!!

S?Nk - May 18, 2014, 9:39 pm

Update - Insidious LTC Mining Pool

The Litecoin mining pool has taken a lot more work than I originally presumed. I've had to install many different dependencies and do lots of tweaking on my new dedicated server to get the pool to work how it should. This pool should be extremely more reliable than the other mining pools currently being offered to the public such as pool-x, wemineltc and more because there shouldn't be anymore lag or issues with not seeing your mining speed due to pools having thousands of connections from other miners. The first mining pool I'm releasing is going to be for Litecoin, I do have plans in the future to add more types of coins to the pool such as Doge, OMC and more!

Thanks to my customers for your patience.

S?Nk - May 20, 2014, 1:21 am

News

I've done a little more work attempting to figure out how I should setup the mining pool and I've decided p2pool would be the best option. I'm having issues with payout and the node isn't working

as expected so the pool may not be out for a while longer than expected.

S?Nk - May 21, 2014, 10:59 am

To everyone attempting to purchase via auto-buy it is now working again. If you ever have questions about purchasing e.g the auto buy won't work please just contact me directly to purchase. Thank you.

S?Nk - May 24, 2014, 5:38 pm

Anyone who refers a customer to Insidious Miner will receive 20% commission no questions asked.

RedSkyITM - May 25, 2014, 2:34 pm

So no x11 algo support possible? It's pretty efficient when compared to scrypt and SHA256 so it'll be less detectable. I think it'll be a great feature to add if you can as most of the newer cryptos are choosing it over the other algos.

S?Nk - May 25, 2014, 8:08 pm

(May 25, 2014 02:34 PM)RedSkyITM Wrote: [\[CITE\]](#) So no x11 algo support possible? It's pretty efficient when compared to scrypt and SHA256 so it'll be less detectable. I think it'll be a great feature to add if you can as most of the newer cryptos are choosing it over the other algos.

Please add me on Skype to explain more about this "x11" algorithm. I may consider adding it if I can get more information from you first.

And the software does not work

Yea sorry there was some weird glitch with the hosting? Its fixed now after I restarted my hosting. Enjoy. ?

.Phasmatis - May 29, 2014, 12:28 pm

Squishy's Super Bot Shop is now an official sponsor of Insidious Miner.

S?Nk - May 30, 2014, 7:55 am

Update

Update was released a few days ago and I forgot to release a notification. This update will invoke admin privileges upon execution of the builder to prevent the 'crash' when building your miner. If this does not help you may still be required to run the builder as administrator manually.

.Phasmatis - May 31, 2014, 2:51 pm

Online and helping customers if needed :)

S?Nk - June 1, 2014, 8:05 am

(May 31, 2014 02:51 PM)SuperSquishy :3 Wrote: [\[CITE\]](#) Online and helping customers if needed :) Thanks for offering your support! ?

S?Nk - June 2, 2014, 2:14 pm

News

I've had a few random bug reports recently with issues regarding the miner properly executing on Windows 7 64-bit as well as Windows 8 64-bit in certain languages and the fact the complaints continue coming in I'm doing a complete overhaul on all of the code and starting from scratch. There was also a common issue with the builder crashing after building due to lack of administrative privileges and that's been taken care of by invoking administration rights in the manifest of the builder. Everyone should expect the update to be released within the next 2-3 days if not sooner. Thank you to everyone who's been patient and reported any issues.

Update Released - 6/03/2014

Many pertinent errors and transgressions have been since repaired. I was first informed of some very rare bugs prevalent on Windows 7 and Windows 8 64 bit systems using different service packs or updates. I've since pinpointed the code that may have been causing that issue. I've also ascertained an issue relevant to the process name of the miner selected in the builder causing a

bug to not properly utilize cpu mining when opencl doesn't exist on the pc running the miner.

I can now subsequently advise everyone Insidious Miner is stable and should no longer face any issues in the near future unless more major features are implemented or included.

Enjoy! ?

Chet9999 - June 3, 2014, 7:18 pm

Vouch For Sank! Great Products.

Don't hesitate to PM and do sales with this user ?

Bandors Jr. - June 3, 2014, 10:32 pm

Great miner, and I'm glad you keep it up to date.

Possible ETA on when http config will be back working?

S?Nk - June 4, 2014, 1:02 pm

(Jun 3, 2014 10:32 PM)supaH Wrote: [\[CITE\]](#) Great miner, and I'm glad you keep it up to date.

Possible ETA on when http config will be back working?

Thanks, I will be adding the HTTP config shortly after many more people test the latest update to make sure everything is 100% resolved. There were also some detection's removed in the latest update that I forgot to mention, I will be attempting to make this 0/35 again but it's not completely mandatory because run-time the miners functions (startup, miner software itself) will be detected just as any other miner on the market. You'd have to CRYPT any Miner to make it most efficient.

Notice

I forgot to enable Automatic Updates on the NetSeal panel so now you'll have to re-run the builder to get the latest update. Sorry for the inconvenience.

S?Nk - June 5, 2014, 1:03 pm

Update 6/05/2014

I've released yet another update to the miner. I fixed a bug in the bitcoin builder as well as added some other things, the features implemented will be listed below.

Debug Mode

There is now a selection for both SHA256 DEBUG MODE (BTC, etc) and SCRYPT DEBUG MODE (LTC, etc) builder types. This will allow you to run a build which runs completely visible, be careful when using startup, persistence or recursive process termination as all of these features are still fully functional..

OpenCL Bug

There was a bug to which would cause an error "OpenCL not found" or the equivalent and this has been solved, for some reason pcs without OpenCL were still trying to mine with CGMINER and I figured out why.

CGMINER massive performance boost

I've implemented a thread concurrency detector which will use the most optimal thread concurrency setting per/usual systems creating a MUCH higher mining speed, if you pair that with 10+ mining intensity you're in for some good profit on your computers.

Builders Graphic User Interface

Various GUI typos have been solved such as difficulty "0-10" is now "0-20" I also fixed some typos in the tool tips when hovering over controls.

Thanks again to all my Insidious Customers who still support me and my products. There will be more products soon enough and as you all know any Insidious Products Customers will receive discounts on any future Insidious Products!!!

Thank you all. ?

Yes, Insidious Miner works on:

Windows XP (32 & 64 bit)

Windows Vista (32 & 64 bit)

Windows 7 (32 & 64 bit)

Windows 8 (32 & 64 bit)

Please let me know if you have any more questions I can help answer for you. Thanks.

S?Nk - June 12, 2014, 1:31 am

News / Notice

I wanted all of my customers current as well as eventual to realize there is a common indiscretion regarding the miner 'not working'. This issue is 95% of the time the cause of the mining pool chosen

or the mining pools server address chosen. I added the Debug feature to the miner for a reason, this is so you can test your configuration and see if the pool is responding properly before using the miner on your actual computers intended to mine on. I am becoming quite frustrated with constantly having to help customers with the same basic problems in regards to the miner 'not working' when it's always the pools 95% of the time, the other 5% is either a missing dependency such as .NET Framework or an error I hadn't yet discovered and patched.

The logic of this post is to lower the amount of burden for both me and my customers and request that you all please test your miners using the debug builder with no startup, persistence and or process termination enabled before complaining to me..

Related Image (This is a common example of a pool that is not responding well, I've highlighted the sections that indicate a problem)

If anyone was experiencing issues with NetSeal they seem to be solved.

S?Nk - June 19, 2014, 9:45 am

Re-Sellers Needed

I would like to have some users re sell on other forums for me. I would like the forums sold on to be decently populated and your commission will be based on how many sales you can get, the more sales you get the more commission you will earn. I'm willing to start at 15% commission for anyone who refers someone to Insidious Miner that buys.

S?Nk - June 21, 2014, 3:01 pm

I no longer need resellers. Thanks guys.

Warning

There are many new miners being released by the same person(s) using re-sellers that have different GUI variations. As I do not wish to have retaliation from these vendors I would rather not

say any names. I have multiple sources who have assisted me in purchasing and analyzing a few new miners that have been released that were of question and they have precisely the same code as 3+ other miners being sold currently.

Many features in these miners such as "Idle Mining", "Runs In Memory" is not true. We have personally tested the new miners being released and found it controversial that they don't have many realistic appearing vouches but rather short and sweet "best miner ever, 'good luck with sales".. Another huge problem with these massively resold miners is people are buying them over and over not even knowing it just because the software shows 3-4 even 5 extra features. These variations have terrible error handling and thus far most features as the ones mentioned previously are confirmed fake. Do not get cheated by these miners claiming these features and watch out for any new miners being released with equivalent features as it's truly someone trying to make a quick buck and not wanting to stand around long, we've all seen this before, come on I've been here since 09 and Insidious Miner has been around nearly 2 years, I'm not going anywhere am I?

My best regards. ?

spidum - June 21, 2014, 4:48 pm

Probably be buying this today looks great.

Franklin Hatchett - June 21, 2014, 9:08 pm

What kind of money are people making with these miners?

S?Nk - June 21, 2014, 11:51 pm

(Jun 21, 2014 09:08 PM)Franklin Hatchett Wrote: [\[CITE\]](#) What kind of money are people making with these miners?

You can make whatever you can push for depending on how many computers you have to mine on. Some make little some make a living. ?

Sagax - June 22, 2014, 3:05 pm

Just bought the miner with BTC. Wasn't AutoBuy though.. Got redirected to coinbase.com

Messaged you on Skype, please respond with the details.

spidum - June 23, 2014, 7:14 pm

SaNK are you planning to add any of the features of nefarious miner? The http and rootkit functions would be awesome as hell.

S?Nk - June 23, 2014, 11:22 pm

(Jun 23, 2014 07:14 PM)spidum Wrote: [\[CITE\]](#) SaNK are you planning to add any of the features of nefarious miner? The http and rootkit functions would be awesome as hell.

Yes I'm planning to implement further features. It's hard for me to add many features as I have other projects outside the Insidious Products line that I'm currently occupied with although yes you can expect further added features big and small.

Vezel - June 25, 2014, 5:25 am

Is this still FUD and will you be refuting it?

S?Nk - June 25, 2014, 9:04 am

(Jun 25, 2014 05:25 AM)Vezel Wrote: [\[CITE\]](#) Is this still FUD and will you be refuting it?

It is not currently FUD although I am planning to release a few minor updates as well as remove some if not all detection's.

Notice

Due to the recent issues that have been found when using the most common mining pools such as wemineltc, pool-x and more I can only recommend any customers current or future to use p2pools. An example of such is here: <http://wafflepool.com/>

Many of the highly if not overly populated pools such as wemineltc are not functioning properly causing much unwanted confusion with customers believing the miner is 'not working' when this is not the case.

spidum - June 27, 2014, 12:59 pm

Im having some issues with getting the debug build to even open. I have tried it with settings that I know work but it does not open. Added you on skype.

Terlox - July 25, 2014, 4:02 pm

What currency would you prefer for your miner? (Most profitable)

Is it working after crypting? (vb.net?)

S?Nk - July 25, 2014, 5:15 pm

(Jul 25, 2014 04:02 PM)Terlox Wrote: [\[CITE\]](#) What currency would you prefer for your miner? (Most profitable)

Is it working after crypting? (vb.net?)

I would recommend going on crypto mining forums and looking sha-256 coins and litecoin coins. The most profitable in my opinion and most easily accessible and exchangeable would be Litecoin.

You can crypt the miner with nearly any crypter that supports .NET

Let me know if I can answer any more of your questions, thank you.

S?Nk - July 26, 2014, 10:45 pm

Thanks again to all of my customers for not unnecessarily bothering me over the weekend for support. For once I can relax on the weekend, lol.. Not that I don't mind helping of course.

Neurohazed - July 27, 2014, 3:58 pm

It looks great!

Is it FUD? What is the average hashrate per bot you guys are getting?

S?Nk - July 28, 2014, 10:29 am

(Jul 27, 2014 03:58 PM)Neurohazed Wrote: [\[CITE\]](#) It looks great!

Is it FUD? What is the average hashrate per bot you guys are getting?

It's not currently FUD but it's least detected than any other miner on the market right now. I will get a scan soon once I can load some money into scan4you.

Profitability margins are quite high due to opensdk checker and gpu & cpu mining. Average hashrate per/bot is usually 15 kh/s to 100 kh/s, gaming computers can produce up to 400 kh/s though. ?

Vans22 - July 30, 2014, 4:33 am

Very interested. Is it Insidious Miner support "Idle Only" features ?

Expect some cool new updates soon.

S?Nk - August 20, 2014, 12:37 pm

News

I've been playing with detections and you should expect many detections being removed soon.

I'm working on a miner designed for specifically x11 algorithm. The miner will not be implemented into Insidious Miner although any Insidious Miner customers will receive a very generous discount as usual. x11 has been known as the most profitable mining algorithm for a while now so since it's held that reputation I'll be releasing another miner very shortly.

S?Nk - August 22, 2014, 9:56 pm

Update

Some detections were removed from the external libraries, a few minor improvements have been made which should give higher profitability on lower-end graphics cards.

S?Nk - August 29, 2014, 8:13 am

Sorry to everyone who's been trying to contact me for the past 2 days to purchase, I was away on a business related trip. I will be available this entire weekend for anyone needing assistance.

S?Nk - August 31, 2014, 9:51 pm

I've responded to everyone who's contacted me to purchase or had any questions. Thank you for your time.

S?Nk - September 2, 2014, 12:48 pm

Update Notice

I've removed numerous heuristic signatures from the miner which were detected (strings, variables, etc..).

I am going to do a few revisions before fully releasing the update. Stay tuned!

M?e?dal - September 2, 2014, 1:35 pm

do i have to crypt it with some crypter to make it fud or it is already fud?

S?Nk - September 4, 2014, 12:12 am

(Sep 2, 2014 01:35 PM)darknezzrises Wrote: [\[CITE\]](#) do i have to crypt it with some crypter to make it fud or it is already fud?

The miner has very low detections currently and an update is being released in the next couple days as stated above your post. ?

S?Nk - September 7, 2014, 10:34 pm

Update

Files have been updated and any major detections have been removed.

ProOgar - September 8, 2014, 9:21 am

working with unicode computers?

100% fud? or need crypter?

S?Nk - September 8, 2014, 2:58 pm

(Sep 8, 2014 09:21 AM)ProOgar Wrote: [\[CITE\]](#) working with unicode computers?

100% fud? or need crypter?

It works with unicode computers, it's not 100% fud the current rates are 5/60, the only major AV detecting it is NOD32.

Regards.

S?Nk - September 11, 2014, 2:19 pm

Server downtime has been resolved, it was only momentary.

S?Nk - September 18, 2014, 4:38 am

Sorry for not being around much the past few days, I'm back and ready to assist anyone. Anyone who's pmed me has been responded to.

Zeitgo - September 20, 2014, 8:08 am

One of the best miner's i have tested and used not only on HF but over other sites also, and the price is pretty low for the features !

Huge vouch

wewlad - September 21, 2014, 2:03 pm

Bought, and created the miner. Waiting to test on some people. Should I crypt it? Or will that mess with some of the settings. Also, if I file bind it to a jpg, will that mess with it? Thanks, great product.

DenialService - September 22, 2014, 4:01 pm

I've compared the same clients with different miners, that one is giving best results.

Vouch for Sank his product killed my bot killer :(

S?Nk - September 23, 2014, 1:11 pm

Thank you everyone for still supporting the project. The miner is still running strong and I'm looking forward to new customers as always.

S?Nk - September 26, 2014, 6:14 pm

Sorry for late responses today for anyone who messaged me with questions. I'll be available all weekend to help you guys out.

S?Nk - October 2, 2014, 5:27 am

News

Insidious All-In-One HTTP controlled BOT coming soon!

Amazing features, beautiful HTTP admin panel to control all configurations.

This BOT will revolutionize the market!

mr.good - October 2, 2014, 6:06 am

Big vouch, works fine.

Keep up the good work.

S?Nk - October 3, 2014, 4:28 am

(Oct 2, 2014 06:06 AM)mr.good Wrote: [\[CITE\]](#) Big vouch, works fine.

Keep up the good work.

Thank you for the feedback, I'm glad its working out for you. Sorry about the initial delay in support.

S?Nk - October 8, 2014, 1:38 pm

Sorry about late responses to you guys the past 2 days, I'll be here for a while now and I'm ready to help.

grosseteub - October 9, 2014, 1:53 pm

never hesitate to buy when you see Sank in a project , Sank means quality !!

best regards

S?Nk - October 9, 2014, 2:50 pm

Update!

The bugs with the Litecoin Debug Builder are solved.

Problems with host not downloading on some machines is solved.

Run-Time detections are solved.

Finest regards to all of my customers, stay tuned for Insidious AIO!!!!

Blue Sapphire - October 11, 2014, 9:21 am

A very good man ?

It's surely worth it if the main thing you'd like to do is mine. If you're interested in further monetization methods check out Insidious AIO botnet here:

<https://hackforums.net/showthread.php?tid=4501124>

vinkoDlak - November 26, 2014, 6:21 am

I dont write on HF a lot. Usually because i dont have anything smart to say. When I want to bitch about something (ie. lousy service OPs are giving), I'm too lazy.

But now - here it is, my experience -

Bought this yesterday, via BTC autobuy. And then, autobuy is not working, shit, now i have to write msgs to someone proving my business again.

But SaNk was perfectly professional about it, even apologized to me waiting for him to respond (like half a day)

Great customer service, and great miner builder. Works perfectly. Will consider checking out and buying his AIO too after this good experience.

S?Nk - November 26, 2014, 8:07 pm

I'm very glad you're pleased with my product as well as my customer service. I'm looking forward to doing business with you in the future as well! ?

Also, thank you for leaving feedback not many people take the time to do it.

Transmission - November 28, 2014, 10:53 am

Just purchased this, Currently attempting to build my bin on Virtual Machine on my mac (real pain in the ass) But Looks great so far I can't wait to try it out! I will update with my results!

xHAXORx12 - November 28, 2014, 1:11 pm

looks and sounds really awesome, might have to try it :P

Transmission - November 29, 2014, 6:09 am

Absolutely fantastic program! Coded extremely well, beautiful easy to use GUI, and great results. best of luck with sales this is truly a great miner!

S?Nk - November 30, 2014, 3:59 am

(Nov 29, 2014 07:09 AM)Transmission Wrote: [\[CITE\]](#) Absolutely fantastic program! Coded extremely well, beautiful easy to use GUI, and great results.

best of luck with sales this is truly a great miner!

Thank you for the feedback as well as everyone else. I'm glad I can provide a quality miner at a fair price.

Notice

Anyone who was recently 'banned' has been unbanned. It was a mistake I made which caused the licensing system to believe you were using a tampered builder. I've since fixed the bug.

S?Nk - December 2, 2014, 2:58 am

Notice

Recent customers who've ran into the issue where your builder crashes during building please just contact me on Skype for faster support.

itakedown - December 6, 2014, 9:48 am

I bought this product the support is really good and the miner definitely works I tested it out on my computer you should think about buying this product its the only working miner I used.

S?Nk - December 7, 2014, 1:01 pm

(Dec 6, 2014 10:48 AM)itakedown Wrote: [\[CITE\]](#) I bought this product the support is really good and the miner definitely works I tested it out on my computer you should think about buying this product its the only working miner I used.

Thanks a lot for the review and I'm glad it's working good for you. ?

S?Nk - December 12, 2014, 8:51 am

Notice

There was a short glitch in the licensing system where a few licenses were locked / banned unintentionally.

This is solved and anyone who's account was locked or banned is now unlocked and or unbanned.

S?Nk - December 22, 2014, 7:54 am

Any Insidious Miner customers will get a \$30 discount on Insidious AIO Botnet!

<https://hackforums.net/showthread.php?tid=4501124>

SIM-2251019 - December 27, 2014, 6:45 pm

I'm interested in buying this, but I have to ask before hand if it's compatible with Windows 8. Other than that it seems like a great tool.

S?Nk - December 27, 2014, 9:28 pm

(Dec 27, 2014 07:45 PM)Kokopelli Wrote: [\[CITE\]](#) I'm interested in buying this, but I have to ask before hand if it's compatible with Windows 8. Other than that it seems like a great tool.

It's compatible with Windows XP all the way up to Windows 8. It's also compatible with 32 and 64 bit versions of windows.

Maddog1929 - December 28, 2014, 6:45 am

How exactly does this mine with cpu? Does it alternate between cpu/gpu or does it mine both at the same time? Im asking because I do not see any options on the builder.

S?Nk - December 28, 2014, 9:01 am

(Dec 28, 2014 07:45 AM)Maddog1929 Wrote: [\[CITE\]](#) How exactly does this mine with cpu? Does it alternate between cpu/gpu or does it mine both at the same time? Im asking because I do not see any options on the builder.

It mines both CPU & GPU at the same time. It doesn't alternate they run synchronously.

S?Nk - January 6, 2015, 9:07 am

Happy New Year Everyone!

Let's hope for a productive mining season!

S?Nk - January 15, 2015, 1:38 am

The project is still going!

Just to let anyone know who's been asking me in PM this project is still available. Although my main focus is on the Insidious AIO Bot which you can find by viewing my threads, this will still be in production and be available to everyone! :)

azurrot - January 15, 2015, 10:23 am

Hello i added you on skype, id like to upgrade the old version, please accept or write pm to me

Vector Dynamics - January 15, 2015, 11:47 am

I bought the old version ages ago.

Considering that was a lifetime license, do I get this aswell?

S?Nk - January 16, 2015, 8:47 am

(Jan 15, 2015 12:47 PM)Vector Dynamics Wrote: [\[CITE\]](#) I bought the old version ages ago.

Considering that was a lifetime license, do I get this aswell?

This is another version so there is an upgrade fee of \$10. Regards.

Vector Dynamics - January 16, 2015, 11:19 am

(Jan 16, 2015 09:47 AM)S?Nk Wrote: [\[CITE\]](#) This is another version so there is an upgrade fee of \$10. Regards.

Idk I kinda feel cheated. Especially as op states its the same project:
"Insidious Miner has been active since: 2/01/2013 Pirate"

And what I paid for was lifetime of that project.

S?Nk - January 16, 2015, 12:47 pm

(Jan 16, 2015 12:19 PM)Vector Dynamics Wrote: [\[CITE\]](#) Idk I kinda feel cheated. Especially as op states its the same project:

"Insidious Miner has been active since: 2/01/2013 Pirate"

And what I paid for was lifetime of that project.

I'm sorry you feel that way. For the amount of changes that were made \$10 is not too much to ask for.. ?

S?Nk - January 19, 2015, 2:14 am

Bitcoin Auto-Buy has been fixed for anyone who's been attempting to purchase using BTC.
Regards.

(Mar 4, 2015 02:01 PM)DiCE1904 Wrote: [\[CITE\]](#) Still seeing miners running this from a loooong time ago, very very impressive

Yup it's still rocking, don't plan to stop either! ?

Kogan - March 14, 2015, 12:39 am

Is this still viable to buy? Is it FUD? What coding language is it coded in? Does it drop any additional files on execution?

Thanks.

S?Nk - March 14, 2015, 5:59 am

(Mar 14, 2015 12:39 AM)Kogan Wrote: [\[CITE\]](#) Is this still viable to buy? Is it FUD? What coding language is it coded in? Does it drop any additional files on execution?

Thanks.

The last scan was like 9 days ago and it was 5/59, the only 'major' anti virus was nod32 the rest were like ahnlab or some less common av's which were sharing the same detection, so yes it's still viable to buy and I am still supporting this project. It's coded in C# and it does download a modified version of cgminer as well as a modified cpu miner to keep the size low. If I implemented the files the bin would be like 2 MB. To purchase just PM me for payment details and once you've sent the payment I will send the license credentials.

Thank you. ?

S?Nk - March 16, 2015, 1:53 pm

I realize there is a problem with the 'profile saving' and you have to re-enter your information for each build. I am working on fixing this, it's a common issue in Windows 8 for some reason.

S?Nk - March 23, 2015, 2:37 pm

Hosting issue has been resolved, profile saving works as long as you run the builder as administrator.

S?Nk - March 26, 2015, 3:26 pm

I fixed a problem that was happening with the hosting, sorry for any inconvenience.

Savage xD - March 29, 2015, 7:41 am

I believe I've responded, thanks.

minerA1 - May 7, 2015, 7:43 am

does the miner support scrypt-jane algo?

S?Nk - May 7, 2015, 5:51 pm

Sorry for the delayed response, I've sent you the information.

BotMarket - May 12, 2015, 10:22 pm

Just wanted to vouch for SaNk been using his miners for over 2 years. Don't fall for the others.

Thank you for the feedback I'm glad you're satisfied with my products!

Notice!

PayPal Auto-Buy is back up and working!

S?Nk - May 19, 2015, 11:49 am

I forgot to add the paypal auto buy, its now actually working.

Sorry the netseal API was down on my webserver. I pmed the information to you.

Armada - May 31, 2015, 6:42 pm

Clearly handled.

100% vouched, this guys serious, no BS.

I had no problem in handling the deal through him, nor should you!

Dude even upon my request TeamViewered with me and demoed the software to my defined needs.

No questions asked, Solid purchase, and will be a returning customer ?

Wish I could give +3 rep

Thank you for the feedback and sorry for not thanking you sooner. I've been very busy with Insidious AIO Botnet. I'm glad you like it!

S?Nk - July 1, 2015, 8:22 am

Insidious Miner is still an active project, I'm still accepting new customers so now you don't have to PM me and ask before you purchase. :)
