Thread: [Make Your Videos Upto 70% Smaller - Great For Getting PPD Videos Up FAST!](#)

Josh Miller Enterprises - May 5, 2014, 6:20 pm

This free and simple to use software will allow you to reduce the file size of your videos by up to 70%.

I found it and tested on few of my videos and very happy with the results.

[img]http://blogs.it.ox.ac.uk/adamweblearn/files/2013/10/handbrake-0.png[/img]

The most obvious benefit of it is less time and bandwidth spent on uploading the video to YouTube! Takes just a few seconds to reduce file from 10MB to 3MB.

Just follow the link, download the software and follow the instructions that are on the blog:

<http://blogs.it.ox.ac.uk/adamweblearn/2013/10/how-to-compress-large-video-files-without-losing-quality-using-handbrake/>

I hope that you enjoy this !

Thanks for this tutorial, I'm going to use this on my next upload.

S????S??? - May 6, 2014, 12:26 am

Nice tutorial man, also nice software. thanks for share.

Ban - May 7, 2014, 11:20 am

Just saying, if you make quality videos like I do to entice people; do not do this. This is better for mass uploading so you get everything up quickly.

A person who sees a quality video are more likely to view it as legit than a video that looks small or simply reuploaded numerous times.
