User is a scammer, download at your own risk.

I have not tested the program myself.

Just hear to give you word :)

You know what I really love? The one you scanned on VT is 535 KB, and the download link is 327 KB.

You are a dumbass. The download link is for a .rar file which compresses the size thus making it smaller. The file scanned was the .exe file itself. Further more I did not scan this nor did I upload it to mediafire. These are the official links posted on Psycho Nation's site.

I indeed would't trust him.

Tho he's right, He copy & pasted the Mediafire url from their official website.

<http://www.psychonation.net/#!downloadspage/cwoy>

Then the first item in the list > Download.

This is my only account. and I thought I could help out the community and Psycho Nation by posting one of their programs on here. Sorry if you think otherwise but you are wrong. Also there have been other members that have posted programs from them...
