Thread: [amazon.com sellers from china/asia](#)

Does anyone know any chinnese or asian sellers on amazon? I have a few dollars to spend but seems like only asian sellers ship to europe and shipping is free. Amazon ships part of the products they sell but I prefer not to spend 50\$ shipping fees on 20\$ item ? .

I know that a lot of Chinese sellers usually only sell small products from Amazon such as chargers or charging blocks. That's the only real time I've ever experienced Asian / Chinese sellers on Amazon.

They only mass sell basic electronics like chargers, cables, etc.

Bought a charger off of a Chinese seller once, and it broke in 2 days.

Or probably anyone knows some sellers that ship worldwide?

I'm not going to pay 50\$ shipping and taxes for 30\$ product shipped by amazon, lol.

I dont know if you mean those cheap ass china sites but here are some:

www.eforchina.com (good price and ordered like 10 times from them!)

www.buyncoins.com (good price but they dont have very much stuff, well enough but not as much as eforchina for example.

www.banggood.com (also pretty good)

www.spam.com (good, ordered a few times there :)

It said spam for some reason lol wtf

Just search for something and then put "Hong Kong" at the end.

If that doesn't work, choose an item you want and pray that you can find a seller who ships out of China.

Really? I can never seem to find items that ARENT shipped from China or Hong Kong. They are usually cheap, with free shipping, but take atleast a month to arrive.

<http://www.alibaba.com/>

Check here, however I wasnt looking for sellers outside amazon. I was searching for a seller in amazon to spend my gift card balance, because most of the items amazon.com sells cant be shipped to Europe.
